I've been a Leanore Elliot fan and friend since 2010! Her work is amazing and I respect her very much. Each time I download another Leanore Elliot story it feels a little bit like Christmas morning. I can't wait to dive into the world of her wicked imagination and enjoy the worlds she creates. If you're looking for a great read this one is it. Leather and Lace is one of my favorites. I love a good time travel romance and this one has a great hook. I loved the ending, but I'm not going to spoil it for you. If you like Cowboys, sassy women, and a love so powerful it'll twist time you'll love this story. I found myself surprised a few times and that's a very good thing. Thank you for doing what you do Leanore, please never stop writing lady.

Rated 4 Stars

I could not stop laughing during this book. This SS takes place in the Old West. The modern day heroine travels back in time and meets up with a true cowboy. There is some hot STEAM. The Hero thinks she's a witch and it's just too funny.

Great little SS full of all kinds of fire.

A good read! I enjoyed the characters who were both from different times & finding out how they connected on so many levels. An entertaining read & I'm not usually one to read paranormal romance. Look forward to reading more from this author.

This was a really good read that I didn't want to put down, and very hot! I loved Jess, admittedly nowadays if he acted like he did in the story he'd most likely get slapped and called an ass, but not in his era! I loved how the brass scope connected them, how it had first been engraved as a gift to him from his father in 1830 and then over a century later her father bought it and engraved it to her. That one item having special significance to both of them because it was a gift from their respective fathers. I loved how it was what brought her to his time and to him. I loved how they felt an almost instant connection and fell for each other so quickly. People may not always fall so fast for others but then they don't usually find themselves in the kind of circumstances Jess and Lacey were in. I have to admit that I'm kinda glad that at the end Flap got brought over with Jess as well! I did like Flap a lot too. I'm glad that Jess got his revenge on his fathers murderers as well as still getting to be with Lacey. At first I wanted her to end up staying in his time because

I believed she could adjust better than him, but then I thought about it and realised that actually it's better that he seems to have been brought to her time instead. After all, what is there for him in his time really? His father is dead, his home destroyed and he didn't really have anything to miss, but her dad is still alive, plus she has a home and life so she'd have more to miss. Plus I think with her help Jess and Flap (assuming that is that Flap chooses to stay in her time too) will adjust quickly to her time and she'll help them find their places in her world. A really enjoyable read.

A fun time of past meeting present. So full of excitement, humor and heat it was hard to put down! There were so many lines that had me laughing but one of my favorite is "John freakin' who?" Which is what Jess (aka Leather) asks Lacey when she compares him to John Wayne.

Jess is a hardcore cowboy (even though he denies it) that is hell bent on revenge for the murder of his father. Along the way of tracking down the murderers he spots Lacey right in the path of his horse and snatches her up with him on a spur of the moment decision. Once he has Lacey in his life he becomes side tracked (at first without realizing it) because of how drawn he is to her. This feeling is unfamiliar to him for he's never experienced anything like it before.

Lacey is a modern day woman full of spunk and sharp wit. She cannot believe how easy it is to even just look at the hunk of a cowboy before her, nor does she want to stop! She also finds herself with feelings she's never experienced before for the hunk of a cowboy named Jess.

Together they go back and forth to each others time. Fear of losing one another runs deep for both of them because the time travel unpredictable. But the time they have together is very well spent in each others arms and hearts.

Well this book was my first western read ever, and I loved it. A nineteenth century rugged fierce cowboy, and a twenty first century sexy woman find themselves in the company of each other by chance (or fate?). I'm not going to give away spoilers of how that comes to be, but it's quite interesting.

While Jess, (the cowboy), is on a quest of vengeance, now with Lacey (the sexy woman) at his side, it doesn't take long for them to fall for each other.

Though not "epic" (as is my common style of reading, along with some dark erotica) this story is fun, humorous and ultra HOT! If I'd had to rate it on heat level, it would be a scorching 5 stars and then some!

Author Leanore Elliot sure knows how melt the reader into a puddle of goo at her feet!

I have to admit. I don't usually pick up and read erotica. It's not something that I find all that interesting,

mainly because of my preconceived notions that there's no, or hardly any, plot in them. Also, with 50 Shades of Grey out, I'm not one to follow trends.

I picked up this book as a free kindle read and popped it open. The first thing I was surprised about was that it actually had a plot. A small one, but it was definitely there and enough of one to keep one reading to see what happens.

One thing I did not get is the immediate casting off of clothing and sex between the two main characters within minutes of meeting each other. Maybe it's a convention of the erotic genre, I don't know, but that is one thing that didn't ring true to me.

Other than that, I did enjoy the novel. I enjoyed the play, verbal and physical, between the two main characters.

If you like a good erotic romance, then you'd enjoy this one.

Pure Ecstasy!

What a brilliant story for everyone's imaginative fantasy to be sedated. Mrs Elliott does a fantastic job combining this Western cowboy "Leather" with the modern day woman "Lacey" in a time travel adventure.

The electrifying connection between Leather and Lace affects you immediately and will have you glued to the pages as Jess (Leather) woo's Lace with his cowboy rough voice and swift moving body. The erotic scenes will stay in your mind for days to come and will have you smiling inwardly as you think about him lifting Lace up high in the air to feast upon her mons to shut her up. LOL

I laughed out loud because In one of the scenes Lace tells Leather she never wants to eat snake again and Jess teases her with yeah she only wants steak (him). Well later after he feast on her mons and has given her the greatest organism, he puts her down and looks at Lace and tells her "A long with your dinner of Steak? I plan to have my cherry pie, every God Damned day!" LOL

I loved the plot to the story and how they figured out how they ended up in each other's world at certain points. The ending left me wanting more in the end as it left with the perfect happily ever after.

Excellent read!

A fun book with some clever elements around the time-travel theme. Leanore came up with some good ideas and implemented them well. I felt like there could have been more character development, but, honestly, I was so caught up with the story that it didn't matter. Overall, it was a really fun read and I'd recommend it to others.

Well... yes the cover is hot and whats inside and it will certainly not only have your toes curling but your heart a racin.....

Lacey stumbles across Leather ( Jess ) - when she was looking through her scope whilst doing her job surveying - she is taken back in time to the 1800's where here she meets Jess. ((( One smokin hot cowboy with A grade beef !! )) snickers ....

The time is set back in the 1800's where we meet cowboys and indians, goons and the western fronteer !! Not like Lace's world of laptops, funky music and ladies whom wear jeans and shirts - not pretty frilled dresses . lol.. Two people from different worlds collide and a new story begins..

A sexy cowboy, who not only tantalizes Laceys loins but gives her ecstasy a girl can only dream of. This cowboy not only knocks Lace of her feet - in more ways than one \*\* waggles eyebrows \*\* but shows her love, passion and lust like she has never experienced. They both are experiencing something they have never felt before. But they both come from different worlds?

Jess is after the killers of his father - and along the way stumbles upon Lace - he finds her cocky, forward (Brazen)) as he calls her - yet completely irresistable. The passion they find, he has never shared with another and in time they find they have both fallen in love from within different worlds.

A journey of revenge,action, discovery and love - Lace and Leather will not only have you panting in anticipation but your blood running to all areas of your body.. lol.

Leanore has created a story both intriguing and tantalizing. Unique and creative, sexy as sin, and definably one that will leave your panties bunched. Wonderfully created characters - which both have characteristics I'm sure you won't forget and the entwining of two worlds a wonderful addition?

It's funny, and quirky, romantic, passionate and filled with action and certainly an adventure.

I had myself giggling at certain parts ((\*\* I'm to sexy for my shirt \*\* .....))) I can imagine the looks on those goons !!

Naked cowboy = leather boots, and a whip!! Time travel, damsel in distress and all the goodies one could want in a sexy filled read. Even weight lifting of a different kind \*\* wobbly knees \*\* geesh !!!

If you after something short, and sweet yet sinfully sexy then Lace & Leather will wet your appetite!

## **Great Western Time Travel**

Lacey is a surveyor working a site in the Roswell area when she brings out her antique brass captain's scope her dad gave her.

Looking into the scope, she sees a trail of dust and as it comes closer, she sees it's a cowboy riding his horse towards her quickly.

This starts as a wonderful adventure with a cowboy from the 1800's and Lacey from 2010.

Jess aka Leather is the cowboy and he is one hot specimen. It seems Lacey's antique scope was also Jess's where he lived in

the 1800's. The story is loaded with adventure and hot sex as the two lovers from different centuries.

I would love to read a continuation of this story and many more like it.

### **Nikki McCarver says**

Jess had been off riding the plains and taking a break from life on the ranch. His dad had pushed him to go saying he needed to see the world and find him a good-hearted woman to settle down with. Jess was headed home and was completely shocked at the devastation he rode into. He reined in his horse, while his eyes took in what was left of a once beautiful ranch and frantically searched for his father. He spied a boot poking out of the ashes and all his questions had been answered. His heart hardened as he set forth on his path to revenge. He never in a million years thought that on his way to find justice for his father's murder, a treasure would land in his lap that would make him rethink his life.

Lacey was out surveying the plot of the land a buyer had his eye on. It would be a shame to see another casino pop up and interrupt the wildness of the desert. This place had remained untouched and unchanged for hundreds of years. Lacey felt a pang in her chest because she knew that all that was about to end. Caressing the scope she had in her hand, a recent gift from her dad, she stood wondering what it had been like to have lived back then when cowboys and Indians were more than just stories. Spying a dust cloud running by, she held up her scope to get a better look. She was unprepared for the site that greeted her when she looked through.

Quicker than you could snap your fingers, Lacey ends up back in the past staring at a frighteningly beautiful authentic cowboy. She knew she should be worried but she couldn't seem to focus on anything but how he looked. And did she really want to? I wouldn't...lol,,,so I can totally understand her shock! Leanore does it again!! She takes a wonderful fantasy ( cowboy) and turns this into a red-hot ride between the past and the present. Jess softens towards Lacey and is amazed at the amount of emotions that she brings out in him. Lacey is convinced that she has never lived before she met Jess. In a short amount of time, both of their lives are turned upside down because of one little antique brass scope. But can they figure out how to work it in time? When they are separated, will this time end up being for good? Let's just say that this book is too sexy for more words!! It requires reading!! Hats off to Leanore and her newest paranormal sinsation. Readers, be prepared for one red-hot ride!!

### **Ollie says**

I freaking loved this book and want more!!! I really don't know where to begin but what I will start off by saying is after reading this book I was convinced to buy Leanore Elliott's other two books that are getting rave reviews: "The Sunset Warrior" and "Gateway to the Sun". The author does an incredible job in not only creating a very believable situation that is pure fantasy but integrating characters that are likable, lovable and humorous into the plot.

Somehow Lace travels back in time and encounter a gorgeous cowboy that is all alpha male and rescues her from being killed by Indians who are hot on Leather's trail and shooting at them. Now Leather knows what he wants when he sees it and when he gets a taste of Lace he knows he needs to discover what lies beneath the strange clothing she has on. At first Lace doesn't know where (or should I say when) she is but they both discover soon enough that the item that Lace has in her possession is the catalyst that can launch them back and forth between time. As Leather continues on his quest for revenge he finds that his heart is opening up to Lace and she in turns feels a deep connection with Leather. The only problem is where or when do they go from here.

I really loved how the author incorporated some very laugh out loud moments both the result of how Lace and Leather pushed each others' buttons, but also due to some unusual situations that the two found themselves in (bareback on a horse will definitely have a different meaning to me from now on) LOL!

Leather is one sexy, take charge kind of guy who knows how to make you feel safe knowing everything will be ok, and at the same time, be so very skilled in rocking your world!

Lace is a the type of heroine that I really like. Intelligent, kind-hearted, independent, but not afraid to show her vulnerability, her weaknesses and most of all allowing another into her heart and taking charge of a situation when the situation calls for it.

Readers of paranormal romance, westerns and time-travel will definitely enjoy this book!

Oh my gosh Leanore- you hit this story out of the park. It was freakin awesome! I was supposed to be making dinner and read the WHOLE story, I couldn't put it down. I loved the weaving of past and present together. It flowed so smoothly. I LOVED the sassy bold no nonsense attitude of Lacey. Perfect match for Jess. I do need to find me a "sexy" cowboy to ride.
