Amanda Bond says

Excellent

Excellent storyline and characters that you grow to love.

Hannah Loree says

I wish there was more!

I need more I need to know what happens to Chloe and to see how everything plays out for Connor and Mazie!

Liz Williams says

They misspelled “torture” as “torcher” and that was the most interesting part of this book.

Bobbi says

Not like the first

The first book had humor and made me laugh. It also had a strong and confident female lead that you couldn't wait to turn the page to see what happened next. This one is missing the humor and has a whiny, sniveling female lead that you just want to punch. So, I am hoping the author gets things back to the first book in the next installment.

Melissa Derda says

Good but short

I really enjoy these books the characters and the story line but it's a little annoying to wait a year and get a shorter book in a series that already has short stories.

Christina Tyo says

Read these books

These are some of the sweetest books I have ever read. There is action also but the love is what makes the book

Donna Langley says

Wow

I waited a long time for this one and wasn't disappointed! To short tho?! :-(but looks like another long wait for the next one but I love this whole story and all the characters except Stacy lol

Amy says

Started it.. Got bored and gave up...

Andrea Heltsley says

Good addition to the series. Could have been so much better if developed more. I wanted to see this couple have their own book. Overall, four glittery stars.

The potentials

Great books, loving reading them. Loved the part about there mates giving them special powers. Great romance and laughter. Awesome

Charlene Pratt says

Short but enjoyable

Still like the plot and characters. Seven chapters is short but this book concentrated on only two characters and was complete enough for now. It's unfortunate to have to wait so long for the next one but I am looking forward to it.

Alaina says

[Mazie is the true mate of Conner because I hated how she doubted herself since the first book because she didn't want to turn 18 years old and find out that she was just a regular human. (hide spoiler)]
