## **Infinitude** Ruchi Banerjee

The year is 2173. Humans are a near-extinct group herded together in protected sectors. Mira, a regular, self-absorbed, 16-year-old pimple buster, resident of Sector 51, has no clue how drastically her life is about to change when she accompanies her mother on a research project to a distant tropical jungle. There, Mira discovers a tall, super-intelligent and rather good-looking boy called Neel, who introduces her to a whole new world of mysterious possibilities. But before she can even begin to understand her feelings for him, things take a nightmarish turn . . . Carnivorous mutants are on the prowl. A deadly new breed of the forest, they have Mira trapped. Rescued by unlikely saviours, she finally learns the ugly truth of her world. Now, Mira must fight not only for her own life but also for humanity itself as she is pitted against a far stronger, smarter and more evolved enemy. Her only hope lies in Neel. But will he be able to overcome the overwhelming odds against them? Will this be the end of the human race? With electrifying action and forbidden love, Infinitude is the riveting story of two young lives caught in a deadly clash of civilizations.

# From Reader Review Infinitude for online ebook

## Victoria says

I actually read this entire book in one sitting, it was very well written and a pleasant surprise for me. I honestly wasn't expecting for this book to be as good as it turned out to be so I'm glad I decided to read it. The story line is good and holds your attention throughout the story but tapers off at the end, which isn't necessarily a bad thing but it's a matter of what you are looking for in a book.

## Shay says

Actual Rating - 3.5 stars

What to say? I literally don't know. So, I'm one of those reviewers who writes a review as soon as I finish a book, sometimes within minutes of finishing a book, and I'm usually thinking of everything I want to say in the review while reading so that I don't forget things. So as I read I rate a book, it goes up and it goes down and my review goes up and it goes down and with this book the ending threw all of that away because I just can not comprehend it. Let's jump in shall we?

I wasn't sure what to expect going into this book, I thought maybe aliens or some kind of experiment surrounding Neel and obviously I thought there would be some nice creepy beastly animals and I did get that in a way. I don't want to give away the whole plot but I will say it's definitely something I haven't seen before and once I got to the part where things about Neel and the sectors were explained I got really into this book and it was really unique and enjoyable. But the beginning was kinda slow, though still enjoyable and had me smiling quiet often, but the end, the epilogue as many epilogues do, kinda ruined it for me. I just don't understand the point of it, at first with the last chapter before the epilogue I thought maybe there would be a sequel to end things but now I'm thinking not because there would be no point after that and like I was really loving the book and then that. I get it from one perspective and I think it was kinda brave of the author to end it like that and I still really enjoyed the book and would recommend it but from a readers stand point as someone who just spent the last four hours or so very invested in this plot and these characters it irritated and disappointed me, but it's definitely an unique ending and if I'm honest for what the story was it was probably a realistic ending one that most writers would be to afraid to try.

Likes -

-The plot - Seriously I can not tell you how excited and happy I was when I realized what this was actually about, what Neel was, because I haven't read anything like it before and it was just such an awesome concept.

-Mita + Jaggi + other secondary characters - I am a sucker for secondary characters and these did not disappoint. I love Mita the most I think though mainly because I wanted to see romance between Mira and Jaggi so that not happening I thought kinda made his character pointless even though I still liked him.

-Mira - She's not my favorite character, I admit, but once she finally figured out what was going on I enjoyed her as a character. I did not like her relationship with Neel.

-The writing it was very descriptive which I loved and the book was just all around well written.

Dislikes -

Neel - I didn't like him at all. He's kinda a creepy stalker for one, and I'm not into the brooding bad boy type thing, he's always watching you with smoldering eyes that set you on fire? No thanks. And then you know we learn the truth of what he is. Also Insta love, I have to point out like i have a few times that I think Insta

love is mainly considered a bad thing when you don't like the characters involved in it so I didn't count that against this book when rating it.

The ENDING - Just another reason to hate epilogues, I just wish the last chapter before the epilogue didn't end on a cliff hanger because then I could pretend said epilogue never existed.

Overall - It is a really enjoyable unique well written book with a bad ending, that I would recommend even having said that.

Would I Recommend This? Yes

Who To? People looking for a fast interesting unique read and honestly fans of Viralsby Kathy Reichs

Will I read more from this author(or series)? Probably.

Has got a beautiful abstract cover, a promising synopsis and even started so strong but somehow in the middle of it all, it loses vigor and ends in a mess. Ruchi Banerjee thought up a great concept for her story but it lacks finesse.

Set in the distant future 2173. 16 years old Mira is our protagonist. Humans are almost in the endangered

category now and just like any normal teenager she only cares about her dues. And then reality comes crashing when she accompanies her mother to a remote research facility and meets gorgeous Neel and comes face to face with the bleak nature of their life and what was actually happening outside.

The author did great with the world building and bringing her story to life. Even providing it with such a strong start and a powerful motifs to bring on the action too but it starts to loose focus after that and even a lot of info-dump too in the middle which was very disorienting. I am all for shorter stories, the last one I checked, "All you need is Kill" (the book from which the movie 'Edge of Tomorrow' is adapted) was even shorter than this and it packed quite the punch but here it needed a balanced build-up which sadly I didn't find. And that epilogue was definitely not needed.

*"A beautifully crafted dystopia but falling short on its execution"*

Story Rating ~ 4 Stars

Character Rating ~ 4 Stars

Imagination ~ 5 Stars

Romance Rating ~ 2 Stars

Heat Level ~ 1 Star

Ending ~ 2 Star

Overall Rating ~ 4 Stars

This was a very exciting and imaginative read, but I can't say that it was a romance, because really it wasn't. This is the first book of this type I've ever read and I was not sure what to expect, however I can say I was pleasantly surprised.

The story was REALLY good; it captured me right from the start. I found myself trying to find time to continue reading. The story is set in 2173 and centers around a young woman, Mira, and her mom. All the humans live in the sectors that they are born in, never to leave them. Mira's mom gets passes and they fly on an xepfels, which are future flying ships, and go to the jungle where Mira's mom will pair up with a co-worker from her past. Everything that takes place in Mira's new home is much different than anything she could have imagined. Once she's settled in, she meets a few people, not sure if you could call all of them friends, but one of them, Neel, takes a particular liking to Mira. These new friends take Mira on a particular adventurous journey. While reading this part of the book I swear I was in awe of a particular scene every bit as much as Mira was. The world building was spectacular and I could not turn the pages fast enough. But with the jungle comes many dangers which Mira faced time and time again. I don't want to say too much and give the story away.

My favorite character of course was Mira. She was very bright and tried to stay brave even under the most horrific of situations. There was a different species that was introduced too, they were a super race called Erons. The Erons were faster, smarter and stronger than humans, but they were also very BAD and dangerous and posed a threat the humans.

This was an excellent book until the ending/epilogue, which I felt could have been done SO MUCH BETTER! I was a bit confused and I really did not feel a HEA ending here. There were just too many questions left unanswered, otherwise this could have been a 5 star rating.

My overall thoughts on Infinitude are that for a book that was WAY out of my normal read, I truly enjoyed it. After reading this Young Adult dystopian novel, I would not hesitate to read another, if it's as good as this was. For those of you who like a fantasy/futuristic read with lots of adventure and imagination I say give Infinitude a try, I'm sure it will surprise you too!

*\*A copy of the book was provided by the author in exchange for an honest review\**

## **Cristina Riquelme says**

I was surprised as the book started because the first scene was a bit stronger than you left wondering what has happened. And from there I could not put it down, the story about the future and humans almost extinct. Our protagonist is a 16 year old young woman left her sector to go live on an island with her mother and everything she knew about her world changes.

I liked as the protagonist Mira, I found a strong character despite the difficulties she encounters and love her witty. How is attracted to Neel but he is different and is about to discover how different it is.

Actually the story attracted me a lot and I really liked the way the author describes things, now the end was unexpected and I hope there is a second book because the author cannot have me hanging there.

If you like science fiction literature, you will like this book and it has really been fun and I really did not expect the events develop.

### **REVIEW**

I found the book to be well written. When I first started reading the book, I was rather excited. I wanted to read about the year 2173, humans are near extinction. They are put in groups that are guarded. Enters a 16 year old, into herself, Mira. She resides in Sector 51. I thought to myself, how many sectors are there? How many people are in a sector? Her mother went on a research trip to the tropics and took Mira with her. Mira had no idea how her life was about to change. Her life was about to enter into a lot of mysterious events. Little did she know that some carnivorous mutants were on the prowl. Will this be the end of Mira and her world or will she be able to find a way to fight for her life and win? It turned out to be better than I thought it would be. It has a good plot but I felt, as the story went on, my interest began to grow less and less. I felt that it was similar to a lot of the 'other worlds' sci fi books. I felt that the characters needed a little more description. I was looking for a lot different. Well written, fairly good plot, but just didn't leave me wanting more.

Grab a copy and read it for yourself. Gather your own conclusion. We all see the written word differently.

Different stories appeal to different readers.

I was given a complimentary copy of INFINITUDE from the author, Ruchi Banerjee for my view of the book. No other compensation took place.
