### **Loopy Rosie says**

I love these books! Reading more soon

---

### **Erin says**

Audrey.W let me barrow the book.

---

### **Chent Higson says**

It is a QUILL. Not a quill PEN.

Don't judge me.

---

### **Hannah says**

i read it when i was younger because her name was hannah. its a bit to childish for me though :/ still kinda liked it1

---

### **Raine Villanueva says**

Hannah the Happy Ever After Fairy is My First Ever Rainbow Magic Book. Since I was in Grade School, I Really Want to Read Rainbow Magic Books. I saw it on their Website and I was Totally Addicted to It. As I Bought this Book, I've Read it several Times. I Must Say, this is Very Enjoyable and Addicting for me. I Chose this one because I would better Start with the Special Edition Books, Following by The 4-Part or 7-Part Book Series.

Hannah is my Inspiration to become a Book Writer and a Journalist. It is just because of her Magic Quill Pen, which Rachel Walker wrote it in a Blank Piece of Paper while facing her Fears at the Bookstore. As she Writes her Story, It feels like There's Something Happens at the Plot. The Moral Lesson for the Story is to Find The Memorable Time to Write Everything that Comes to your Mind and Imagination. Therefore, There will be a Happy Ending.

I'll Give it 5 Stars because of the Plot. I would buy More Rainbow Magic Books this Weekend to Continue the Journey.

## **Just\_me says**

Read this with my little girl last night who loves it like she loves the others and this one will become another that is well read.

But I'm only giving a three star review as I am really not into these series books, that the girls love but the there is pressure on the parents to buy or borrow the other 30 or 40 books in the series. This one cost me £1 through Macdonals and whsmith, A price I am happy with.

---

## **Hannah says**

My Mum bought me this when I was 7/8 (ish) and I loved the story and that the fairy and I shared the same name!

---

## **Tim Roast says**

I read this with my 7-year-old daughter who loved it. Anyone who has read any of the rainbow fairy books before will know why. They are designed perfectly for her age group. Each story features best friends Kirsty and Rachel having to help a fairy friend from Fairyland in their perpetual battle with Jack Frost and the goblins. This one is no different.

This story is about Hannah the happy ever after fairy and Jack Frost has stolen her magical Quill Pen which "has the power to write fairy tales for the human world, but not only that - the magic pen can also change them." And Jack Frost is changing them. "He's rewriting all the endings of the fairy tales to make them miserable!" It falls upon Kirsty and Rachel to help Hannah sort it out of course.

Also along the way there are a number of clear and simple pictures to bring the text alive, and the story is written in big text too ideal for early readers.

This was originally a World Book Day book so is a showcase, and as such it is probably a bit better than some of the others in the collection which follow predictable patterns, although a little shorter.

Overall a typical rainbow fairy story that little girls will love.

## **Charlotte says**

I enjoyed this book, but I have to point out that one of the fairy tales mentioned doesn't have a happy ending.

---

## **Ying Ye says**

I LEARNED to help each other.
