## **Really Professional Internet Person** Jenn McAllister

Jenn McAllister, better known as JennxPenn, has been obsessed with making videos since she found her parents video camera at the age of eight. A shy child, Jenn turned to film because, unlike life, there can always be a do-over. Really Professional Internet Person offers both an insider's guide to building a successful YouTube channel and an intimate portrait of the surreality of insta-fame and the harsh reality of high school. Brimming with honesty, heart and Jenn's patented sense of humor, Really Professional Internet Person features top ten lists, photos, screenshots, social media posts and never-before-posted stories chronicling Jenn's journey from an anxious middle-schooler just trying to fit in, to a YouTube sensation unafraid to stand out.

## Nicole Jacob says

Basically this was just her account of her lift from middle school to now as a YouTube sensation.

There really was absolutely nothing entertaining about this. The audio book was only 5 hours long, I easily finished this in a day. But I found myself zoning out and not really paying much attention. There was nothing relevant or of interest to me in this story. Perhaps it's my age, or the fact that I am not really involved into the whole YouTube video stuff (I'm just a watcher of music videos, and these other 'skits' or 'short movies' were never of interest to me).

It almost reminded me of those books written by comedians or actors/actresses that discuss their eating habits and how they came to be what they are. The content is just a stream of consciousness.

Phenomenal! It was a really inspiring book and like all books written by YouTubers, they really connect to their audience. They are a voice to everyone and have experienced a lot of the same things as their readers. This book was relatable and gave really good advice on how to get through different situations. Was amazing and a definite must read for 2016

Anecdotes in the life of a millennial vlogger. This book gives some good insights into the thought process of a young lady who lives her life in front of a camera. She has great humor and bubbling energy.

"Really Professional Internet Person" is a biography about Jenn McAllister. She's most known as "Jennxpenn" on YouTube. She started making Youtube videos since she found her parents video camera in the chest under a piano, ever since then, she has been obsessed with creating YouTube videos. In this book you will follow her through her journey of life including friendships, adventures and so on. In her biography, she gives advice that is helpful.

One of my favorite parts of this book is when Mr.Hentz asked Jenn "What do you want to do in life?" and in the beginning she told her teacher that she wanted to go to school to become a psychologists because of how she always reading articles about it and read that psychologists make a good living that's when her teacher told her "Do what you love and the money will follow". This quote made me realized that you should spend on doing what you truly passionate about and money will be worth it later because life is too short to do something that you are not passionate about.

I recommend this book for those who aspire to become a YouTuber or struggle with friendships, or just

simply need advice. Her biography explains her life journey the good times and the hardships of her life and how she became a YouTuber. Overall this book has influenced me and made me realized things that I never realized.

Jenn's great. As a YouTube lover, I was never really TOO into her videos, I actually wasn't even subscribed to her channel. I got the book from a family member who knew I liked the website in general; she hasn't ever heard of "jennxpenn" before. I do like the way she describes the pros and cons of being a young content creator, and how her anxiety helped/didn't help her. However, I just disliked the format of the book. Some chapters were random and some lists were plain dumb. But overall I would recommend this to someone interested in YouTube.

| Really Professional Internet Person | Jenn McAllister | Biography |

Really Professional Internet Person Follows YouTube star JennxPenn and her journey to becoming one of the internets most popular YouTubers.

\*SPOILER-ISH SECTION\*

I loved this book! I'm kind-of torn between giving this book a 3 stars or giving this book a 5 stars. On one hand I wasn't the biggest fan of the writing style but on the other I really loved the stories and all of the life lessons this book had. So I am going to give it a 3 stars (Sorry Jenn)

This book had SO many, I cant even stress about how many valuable life lessons this had. I was also able to relate to this book immensely, like Jenn is me.

I love how she explained that once you leave High School/Junior High the only thing that matters is your grades nobody cares about how popular you were or what sports you played they just care about the way you are now (or in my case how I am in the future).

I highly recommend this book even though I only gave it a 3 stars I still really enjoyed it!

I really enjoyed listening to this!

it definitely wasn't my favorite thing in the world, I just really found it hard to connect with, this story was told in mostly lists like, "how to survive middle school", I'm now almost done with high school so I think this would be a good book for teenagers ages 12-14

3.5 stars

Really Professional Internet Person is a book describing how Jenn McAllister got internet famous. Jenn shows how she created her first youtube post and what she was like in High School. Jenn also describes how what her everyday life is. Another major thing that Jenn shows is how she moves from her hometown to L.A. Jenn also adds how she meets all her other internet famous such as Andrew Lowe. This book really shows what YouTubers day really consists of. Jenn also puts in where her love for making videos came from.

This book is one of those books where you have to watch Jenn on YouTube or have a lot of background about her to like it. It talks about how she was able to overcome all the bullies and all the hate that she got growing up and not being accepted by the people that she thought loved her. Jenn talks about how she slowly learned that being a YouTuber and making movies with her friends was her destiny something she really enjoys doing. This book after reading it makes you feel like a whole new person because everything in the book is relatable to every person even if it is in different ways it talks about bullying, not fitting in, growing up, how its difficult to move out and live on ur own resulting in how its very hard to make decisions and it also gives you little top ten or give or take a few about how to become a better person little by little. I was able to relate to this book a lot because she talks about how to deal with little things that teenagers now are struggling through. I'm rating this book a five because I feel like its a book that once you start reading it you wanna know what's gonna happen next in her life since the things she talks about in her book she's never even put on the internet also because the wording she chose is strong and helps her get her point across very simply.

You will obviously love this book if you're a fan of Jenn and/or YouTubers.

You learn a lot about her and her life, a good read

I couldn't decide between one and two stars. I'm rating this *1.5 stars* as a compromise.

Jenn's a fun YouTuber and all, but I really did not enjoy this book.

It didn't entertain me how I thought it was going to, just based off her videos, tweets, other social media, etc. There was just nothing about this book. Nothing interesting. Nothing entertaining. Nothing fun. Just nothing. There wasn't anything about this book that stuck out with me or that spoke to me. It was mostly just words

on a page.

Nothing was really funny either, another thing that I expected as I've been following Jenn for a while.

This book was pretty short, I was able to finish it within a few hours, but even within that time, I was thinking about quitting the book several times due to pure boredom with it.

In all honesty, I only got this book because I liked Jenn, not being it looked interesting or anything. I had heard some bad reviews on it, but yet, I **still** got it because it was by Jenn.

And I kind of regret it. Okay, not kind of, I *really* regret it. It was a waste of time, to be honest.

I love Jenn, don't get me wrong, but this is just not her forte. I want a book to be entertaining, to suck me in, to tell me things that will stick with me, to have things pop out at me, and frankly, this book did not do that at all to any extent.

I usually enjoy YouTuber books. Not in this case.

I will continue to follow Jenn and I have ever since I read this book, though.

This was really cute! I have loved her for so long! Its really cool that she now has a book. I loved how personal she got- it makes her look like she truly loves her fans. I loved this!

### **Sami says**

Well - I love Jenn. I've loved her since I was 10 and watched all her music videos until I was inspired to start my own. This is my first audiobook and my first autobiography of a YouTuber. I liked learning all the funny things I didn't know about Jenn and I liked hearing her backstory. It was definitely for super fans or even a younger audience, but that's okay. I will always love her videos and continue to watch them today, this just wasn't my thing.

I got this at a little free library. I love Youtube & thought it would be a good find, but I was sadly disappointed.

I don't blame McAllister for the awful writing in this book. She is, after all, only 19. I blame the book industry that started giving obvious not-writers book deals, and I blame whomever thought McAllister would be a good addition to this.

Do not go into this book expecting high-quality literature. You will not find it. McAllister is not a writer; her primary medium is through video. I lost count of how many literally's and basically's there was in this book, but in her words, "This book is basically a waste of time, literally."

Her writing came across as childish.

If you are a fan of McAllister, you will probably enjoy this book. I personally never heard of her, but she sounds interesting & funny ON VIDEO. She includes lots of personal stories that I found very relatable.

Hand-written notes were included, which adds a personal touch. I found her to be a typical teen, which was charming. However, typical teens DO NOT deserve book deals, unless they write well.

Her stories of being bullied were very similar to my own, and I found them redeeming that she included them in her story. There were times at the end where it felt like she was bragging, especially when she wrote about making a movie and being mobbed at awards shows. However, I am not a hater. She seems to be a

sweet girl, I just don't think she should have written a book.
