## **Xenia says**

This book is excellent and is my second time reading it. The information contained within is most precious to me. My love and gratitude goes out to Saint Germain and Godfrey Ray King. Your loving service to Life is certainly much appreciated by me and such a blessing to all humanity.

---

## **Andrew Jules says**

### **Excellent and inspiring**

I've actually had this book for 20 years and just finally reached the stage in this life to read and understand it. So blessed

---

## **Ivan says**

I rated this book with only two stars much earlier and I don't know why. Perhaps I wasn't in the right place on my Spiritual path. Now I am reading the second book and the world is a different place where more possibilities exist and I'm not so quick to dismiss them. I have a good friend much younger than me but wiser in many ways I definitely will be offering to loan this book to. I will be interested in seeing what HE has to say about them. The first one I believe is online for free at [www dot sacred-texts dot com](http://www.sacred-texts.com).

---

## **Tuscania says**

This is a great metaphysical book. In 2000 I visited Mt.Shasta, CA & I was imagining tracing Guy Ballards steps. I've read it a few times & every time I read it I learn something new.

---

## **Semisi says**

Incredibly awesome... This book and books 2 & 3 have given me lots of answers I have been looking for.

---

## **Steven Monahan says**

### **Quite uplifting**

Thoroughly enjoyed this book. Much different than most as it tells a weaving enlightened story. You can't

wait to get to the end. I hope you find what you have been seeking. It may be closer than you thought.  
Namaste

---

### **Cy Winther-Tamaki says**

This book takes you through the miracles that are actually quite normal when considered in the scope of Universal Law. Following Godfre Ray King's journeys with Ascended Master Saint Germain, he is shown glimpses of magnificent civilizations past; how they rose to power by following the Will of God, as well as how they fell into ruin as the citizens turned towards worldly pleasures. He also shares gems of spiritual wisdom. This book is an enlightening treasure chest of knowledge to the seeker.

---

### **Mrs. says**

The late author, Guy Ballard, writing under the pen name Godfre Ray King, claims that these were true events. Whether you believe that or not, the book is a highly entertaining and riveting tale of a man's search for God and truth.

---

### **Gloria Piper says**

Here is an astounding memoir of King's many visits with St. Germaine. The Ascended Master takes King to hidden places and forgotten cities where we are told of magnificent surroundings and great inventions that seem miraculous. However, what we would deem as miracles, King says, are really natural phenomena not yet understood by our present society.

King's memoir is at times stirring and at times tedious. The tedium comes from seemingly endless descriptions of opulence and speeches that tend toward preaching. Yet his liberal use of dashes focuses our attention on the important words of his message in a way that in most cases allows us to be stirred. Within us an understanding of Scripture and perhaps our own experiences arise, and we see a connection.

Those interested in spiritual growth may want to read again and again the parts that explain the I AM affirmations and the necessity to lead a God-centered life. The practices explained here are instructive and beneficial enough to be life-changing. And although King describes the treasures that St. Germaine shows him ad nauseum, the real treasure in this book is the guidance to personal perfection. It can awaken in the reader a deep yearning for that perfection and for a relationship with the spiritual.

---

### **Lisa Bresnahan says**

Very beautiful images. Highly inspirational.

---

## **Ben says**

I own the original version of this book from 1934

---

## **Elizabeth Eiler says**

The passion of the author is clear, although he writes in a florid, formal style which might have seemed old-fashioned or stilted even in 1930 when the book was written. There are some valuable wisdom teachings here, though the writing style and continued repetition of the same ideas and phrases made the reading tedious. Channeling a book of Enlightenment teachings in 1930 took a lot of courage, and I applaud the author for publishing his work.

There is a call I respectfully disagree with, to concentrate only on the heart, throat and brow chakras. " 'In this New Order, the discipline for the neophyte will be focusing and maintaining his attention entirely upon the three highest centers of the body, and he will do all his work at these points. ...only by looking away from the lower centers will he ever be able to rise out of misery and limitation.' " (No mention is made of the crown chakra).

This is a practice I specifically caution my students and clients against. As incarnated beings on the Earth plane, we need to integrate the entire chakra system as a whole to achieve and maintain balance and health. Cutting off the root, sacral, and solar plexus chakras not only cuts off the flow of feminine energy, it prevents a person from being grounded and securely anchored in the lifetime. The root chakra is a source to both receive nourishing energy from the Divine Feminine and also to release for transmutation the dense energies which harm body and spirit. The sacral chakra is the seat of creativity, procreation, sexuality, and sensuality. The solar plexus is the base of our personal power and the seat of the personal identity.

Rather than viewing our primal, Earth-based, and magnetic feminine chakras as representing those parts of humanity we need to abolish, they should be seen as necessary parts of the total incarnated beings we have chosen to be. Work in the upper chakras is very taxing on the body and spirit when there is no outlet for grounding this powerful energy. For example, long periods spent channeling, in astral travel, performing mediumship, or even giving healing sessions can lead to migraines, anxiety, and nightmares if the intense energies being used in the higher chakras are not moved through the system and released through the root. Grounding is essential health maintenance and even medicine for all of us!

Perhaps what is being discussed is a process of Ascension rather than a path to Enlightenment. This would make more sense -- cutting off the three lower chakras if the body is being transcended at the time of soul transition which occurs at physical death.

Even though the author describes a powerful bond and interaction with a panther, an animal who communicated directly with him and the Ascended Master and performed a Divine purpose at the Master's instruction, no mention is made of animal spirituality or of the God-self inherent in animals. Generally, they seem to be regarded as "lower" beings which is a disappointment, and probably a reflection of the cultural milieu of the author in 1930. I assert that God-self or Godspark is not "higher" or "lower" in any creature -- human or not -- as all emanations of God/Goddess are equally Divine.

I particularly enjoyed the teachings about manifestation and co-creation which must have seemed quite

radical at the time. Definitely a book to ponder and provoke deep thought!

## **Thomas SpiritHawk says**

Must Read

---

## **jacqs says**

A personal account of the author meeting the Ascended Master St. Germain in 1930. They travel through time and space to lost continents, ancient civilizations, past lives, and to current secret retreats and mines inside mountains. It was recommended to me because so much of it takes place inside the Tetons and Yellowstone and because I am hungry for information about the spiritual planes. It was a fascinating read, kept me up very late every night. At times I was dubious about the accuracy of the details, and sometimes I got tired of the descriptions of the "beautiful," sumptuous decorations of the palaces. Occasionally it sounded preachy or judgmental about how people should honor God, but overall his attitude is positive and open-minded. After reading the book I learned that it led to the "I AM Activity," a spiritual movement that had some controversy around it. That controversy took away somewhat from my experience of the book, which by itself is a lovely account.

## **Bob Seeker says**

Must read material for all travelers on the path of Ascension.

Beautiful green softcover, I wouldn't say it's a normal paperback, it's embossed and "feels different" to your standard paperback. The paper itself is a golden yellow and the text violet (upon reading the book these color choices are self evident and wonderful additions).

Therein we learn of Guy Ballard (writing as Godfre Ray King) as he encounters Ascended Master Saint Germain and the instruction he receives from him. We are taken on journeys to (among other places) the Royal Teton, Yellowstone, the Amazon and ancient cities & are treated to descriptions of the wonders that Guy sees and is taught.

The first in the Saint Germain Series is such a foundational book that without reading this you are holding your own ascension back, read it now and meet with Ascended Master Saint Germain yourself!
