Nada Elfeituri says

Libya is a predominantly tribal country. Family and tribal origins play a huge role not just in society but also politics. This has had a lot of negative repercussions on the country, but tribalism can also be a useful tool in times of strife, as Libya is learning now.

This book is a dictionary of Libyan tribes; their roots, cities of origin, sub-tribes and family branches. It's in alphabetical order, with tribal family trees in the appendix.

It's kind of difficult to use because there's no index. It's also appears to be missing some families and tribes. This is a rewriting based on a book of the same name compiled by Italians, which could account for some of the missing info.

I'd recommend it to anyone interested in Libyan genealogy and history.
