Peyton Elizabeth wields a good story with *An Undercover Submissive*. I was a little worried that jumping into a series at book 5 would find me a little lost. Don't be put off by this. I was hooked right into the first page and never looked back. There were a few story lines I wish I would have known what happened in the past but it didn't deter nor take away from the story at all. So engrained in this book I was I didn't even realize how mad I was getting at Lashe and Sander and Trish until I walked away from the book for a moment. It hooked me that much. I was talking to myself about it. Good job Ms. Elizabeth. I will now have to catch up on books 1-4.

4 STARS

This is the fifth in the Safeword LLC series and is a return to the exceptionally good writing of the first three books.

Trish was discovered wearing a wire in a BDSM Club in order to gain information for the story she was writing. Not only was she banned from the club for life, it also turned out that her bosses were members of the club, and she resigned her job to avoid a conflict of interest.

When Kennedy Van Camp approached Trish and offered her the opportunity to explore the BDSM lifestyle,

Trish couldn't pass up the opportunity. What she didn't expect was that the two men who wanted her as their submissive were her bosses, Lashe and Sander Bartel.

Still certain she could learn enough for her story, she agrees to explore the lifestyle, but wants a contract to be day by day.

The two men are drawn to Trish in a way they can't describe, and they slowly introduce her to BDSM. As they do, all three of them begin to care for each other. Can the two men earn her trust and overlook her secrets?

This book was well written, and hotter than a firecracker, with a good plot and very interesting characters. The two Doms are caring, cautious and supportive, and the heroine was intelligent, brave, and independent about her job. Other than a few typos, this was a captivating read and I will be looking for more from this author.

This one was my favorite of the series so far. This story felt more complete to me for some reason. I hope there are at least two more books coming~ Trish's sister and Claire.

Miss Elizabeth delivers another interesting twist to the M/M/f dynamic in book 5 of "Safeword LCC".

Lash and Sander approach Safeword LCC to arrange a placement with their former employee Trish Lawton, who had threatened to write an exposé on the ultra secret society of which they are part. She has no idea.

Trish balks at her potential Dominants but then has Safeword LCC negotiate a unique contract limiting her future Dom's ability to "abuse" her or so she thinks. Her past seriously tainting her perception of the lifestyle, a problem Lash and Sander intend to cure.

Lash and Sander train her submissive side, while respecting her work but impart to her the importance of secrecy and trust in a rather interesting fashion.
