## **Determining Possession** Christina C. Jones

Good decisions don't always leave you unscathed.

Sometimes, the best choice might be the one that leaves you vulnerable. The one that forces you to face a not-so-distant past that hurts, or go through with something you never thought would come to fruition. The one that makes taking a risk your only viable option.

Wilhelmina "Wil" Cunningham is no stranger to pressure. The child of an Olympian and a title-winning boxer, and a former Olympian herself, Wil has gained an "America's sweetheart" sort of reputation - a high pedestal to fall from when her world gets rocked by betrayal and deceit, from more than one direction.

Not that long ago, Ramsey Bishop dominated the field, as one of the best running backs the league had ever seen. Personal tragedy drew him away, but he made a promise he can't take back, and no one will let him forget. Keeping that promise though... much easier said than done.

But Wil believes he can. And Ramsey believes Wil can and will bounce back from the misfortunes that have the potential to destroy her if she lets them. Their supportive, motivational back and forth is just one element of what has grown into a friendship neither of them would choose to do without. But could it be... more?

With their recent pasts littered with baggage and sorrow, and both of them facing uncertain futures, Wil and Ramsey have enough stress on their hands, but they'll have to make a choice - continue their friendship as it was before, or risk it all for the possibility of something amazing?

### Loved it

Christina C. Jones has done it again. Book 3 in the Connecticut Kings series was just as good as the 1st two books. I was rooting for Will and Ramsey from the moment they were introduced. If you love Love this is the book for you.

### A perfect match born out of friendship!

I loved Wil and Ramsey's story, the way he treated her, protected and shielded her. He was a true friend and turned out they were perfect for one another. And that comeback for my favorite Fantasy football team The Connecticut Kings, getting a glimpse of the lives of Trent and Jade, then Cole and Jordan, love it! Great addition to the series which I am really enjoying!

You know how you can read a book and it feels like a roller coaster ride, with all of it's dips and climbs and fast descent???? Well that is the TOTAL opposite of Wil and Ram. These two were more like a slow, easy carousel.... going round and round until they found their way. Determining Possession was all about friendship, lovers, family, promises, expectations, and taking a jump! If you are looking for a slow burn, this is it.

Wil was an All-American girl who not only had her future mapped out, but came from a family of black sports royalty. She was supported and encouraged in all of her endeavors, so when there was a chink in the plan, she had to adjust in a way that she wasn't used to. Didn't want others to see her crown slipping! Ram was right there to support her as a friend, so when it was time to become more, he slid right in.... literally!

Ram held his issues and thoughts close to his chest. He didn't ever want anyone that he cared about to worry about him, so he internalized everything. It's a good thing that Wil was there to balance him out.

Once I delved deeper into the story, I realized that these two were so much more than friends to lovers. They were best friends who became better lovers and I think a tear slipped when they showed that communication is key. This was a direct result of their friendship. When other factors began to insert themselves into their relationship, they handled the handle!

As usual, CCJ comes through with her #BlackLove excellence and makes us all believe in it just a lil bit more. If I had to sum up this story in one word, it would be: Providence!

Sidenote: I sure do hope that we get a play by play from Clay and Soriyah and I really think that Darius

wasn't a totally horrible dude, Wil just wasn't his destiny.... but I'm not excusing his bad arse behavior!

Black romance lives when Christina C. Jones pens a book. Come meet Wil and Ramsey co-workers and friends. Wil is trying to get over a broken heart when her ex is caught with his pants down which causes shame and humiliation. Ramsey lost his mother and is trying to hold it together day by day. A chance opportunity to continue with the one other thing that he loves football present itself. Does he have what it takes to return. Can he live up to the promise he made. Determining Possession is a story about what happens when all these issue collide and the best person to face these challenges with is sitting right beside you.

This is the third installment in the Connecticut Kings series and I absolutely love it. The chemistry between Wil and Ramsey are off the charts, the plot of the story is never boring, you read this book multiple times and still cant get enough. The sub characters you hope and you pray that she can find material for them to write there's story because baby let just say she would blow your mind with those stories. She is one of my favorite authors because she can tell a story, she can weave her magic and make sure you fall in love the hero or heroine and or the sub characters. While loving a fictional NFL team instead of the one you grew up watching and routing for 30 plus years. I am never disappointed in a CCJ novel or a short story and you wont be either. If you never pick up a CCJ novel be sure to search her and get what can because her books are worth every dime. This series is a collaboration between CCJ and Love Belvin. Bravo Ms. Jones Bravo

Delightful read introducing this couple in the 3rd part if the series. Christina C. Jones has a knack for bringing out emotions while reading her stories. I feel I know them personally. Such was the case for Ramsey & Wil. Despite their ups and downs, they found the middle & worked wonders with it. Great read

#### **Touchdown**

This is book three of the Connecticut Kings and it has definitely become a favorite for me. I was ecstatic to hear that Love and CCJ were continuing this series. CCJ introduces us to new characters here: Ramsey and Wil. They started out as friends, but grew closer after Wil's life began to throw challenge after challenge her way. I loved that I got to connect with previous characters from this series. I also loved the length of this novel because when your reading from your fav, you never want it to end.

Love and Christina took this series to another level when they dropped a book trailer for it where you got to see a visual for these characters. You need to check this out if you haven't. I cannot wait til Love drops the next book in this series. I guess until this I will be re-reading this one.

### **Touchdown it is CCJ!!**

I love Christina and Love's dynamics in creating this wonderful series of love in warm hues. I love the references and connections from other characters from previous stories that added to Ramsey and Wil's story without taking the focus off of their budding union. It's truly a community of characters that I find myself wanting to be apart of. Will is brilliant, witty, charming, beautiful, caring, and will check you when you step out of bounds with her. She knows her sports and delivers it with a sharpness coated in natural sweetness. That damn Ramsey is a man's man baby! He's intelligent, fine, smart with his money, has a nice eggplant, big on family, and absolutely adores his mother. His attentiveness towards Wil was just...my my my!! Talk about being "present" with someone! Relationship goals no doubt! In CCJ fashion you'll get fed quality meats, fruits, and veggies that will leave feeling well sated with a craving for more of her delectable writing. Kudos CCJ for another Winner!!

### **Amazing**

When I say this book was everything. I mean that. Christina is just fantastic at this. I love her work. This couple was just amaze-ball, lol. Ramsey is everything and more. I couldn't think that Christina could top the last one, but she proved me wrong. If I could give it twenty stars, I would.

### **5+ Star Studded Review**

The third installation in the CK series was a winning combination with a great storyline, beautifully crafted imagery, and a sexy couple to deliver the chemistry and connection to make us believe them. Ramsey and Wil were co anchors for a television sports program. The two were thrust into a different level of friendship after Wil's ex publicly humiliated her by cheating on her with his TV costar, and lying about it for years. Ramsey had also survived his own relationship demise and the loss of his mother. Although the initial relationship after the breakups was more a FWB, it quickly developed into friends and lovers.. The other back story was about Ramsey getting a chance to get back on the field for the Connecticut Kings. As the story progressed, it was obvious Darius was Ramsey's place keeper. I don't think she loved him all of their relationship, he was just familiar. On the contrary, from the first intimate moment between Ramsey and Wil it was pure fire between them. The closet connection, Hot!, The Bali trip. Hot!... Then the back story with the supporting cast was nice. Tariq, Naima, Chloe, Cole, Jordan, Rashad, Trent, Jade and nem, it was very nice... I always love the parents... Bravo Mrs. Jones. You scored a victory!

**They were champs in more ways than one!**

Both Wilhelmina Cunningham and Ramsey Bishop were champs in their own right. They were besties through their mutual job even though Will had some resentment towards Ramsey upon first meeting but soon became friends who had each other's back through each other's personal trials.

I love the way Christina wrote these characters by making them friends first and then realizing that they were in love with each other. This story mostly portrays Black males in a positive light and the women are strong and independent just like the ones I know in real life, handling the challenges life throws at them with dignity and grace. Their friends' support system was on point and amazing. I just love Ramsey's love for Will and how he calms her fears. The realization that Lena and Darius were just placeholders until they were ready for each other's life was amazing. Will was a little nerve-racking with her fears from thinking she was tainted with bad luck from Darius' cheating, losing her job and sex-pix scandals to name a few. It was not until her mother made her see that she had more to be thankful for that she calmed down and allowed herself to go be swept up in the flow of love. Both she and Ramsey determined possession with each other for their own personal touchdown and HEA. In my opinion, this has been the best Connecticut Kings book so far, but I have one more to go. This is my first book by Christina and I sure will find more to read by her.

## **Wilki J says**

Wil and Ramsey aren't just coworkers, but have become solid as friends could be. When Wil's life spins out of control publicly, Ramsey is her shield and shooter. Ramsey has a lot going on himself and when he finds his way back on the playing field, he realizes it's not the only game he has to focus on. With restricted calls in play now that there's been an interception, will Ramsey and Wil make it into the end zone unscathed?

I. Don't. Know. What. To. Say!!!! I am still an emotional wreck after reading this: total epitome of book depression! I can't sleep and it's been a physical task to move on. I just can't get my life! Do you hear what I am saying??? I can't function!!! Having written a plethora of books, Jones never ceases to surprise me with her literary talents! The theme friends to lovers was definitely explored here, but she brought a fresh take that had me weeping for joy! I can't describe how refreshing and unique this storyline is; Ramsey and Wil's journey to lovers had so many twist and turns, I could barely keep up! The drama is beyond high in this book as Wil and even Ramsey's life gets placed on the 'Highlight Reel'. As public figures, they go through their fair share of controversy that will leave your jaw on the floor ...or picking up your Kindle to swing on someone! The pacing of the storyline was effortless and the lulls and highs of each scene is well placed and gives the reader a true literary escape!

I have to touch on the relationship dynamics of Ramsey and Wil: I can say without a doubt, Ramsey is now my fav book bae by Jones!!! His tough and brawny exterior is just right to handle Wil's emotional rants and his tender heart left me in tears as he went through internal struggles that touched me on a personal level. I haven't cried over many books, I can count them on one hand, but I sat and cried myself into a literal frenzy. Ramsey's emotional upheaval was so relatable to me and I loved how this author built each character up after they were so broken down emotionally and in some kind of way, physically. Wil and Ramsey's chemistry is through the roof and had me panting and crossing my legs! I know I called on the lord a few times as Wil was discovering just why Ramsey has a certain nickname \*giggles\*. Wil's public woes are intercepted by Ramsey and her self-discovery with their newfound love was quite plausible. The timeline allowed for soooo much character development as these two tried to figure out their relationship.

The conclusion was meaty and every single question I had at the beginning of the book was answered. Every. Single. One! I appreciated Jones' knack for detail; her summation of Ramsey and Wil's story was

heartly and the rush feeling readers can sometimes get when a lot is happening in a book did NOT happen here! She not only concludes Ramsey and Wil's story, but exposes us to some new and old characters who could possibly have their own book (please God)! I was also extremely extatic to see the infusion of past characters in the Connecticut Kings Series as well as other books written by Jones: we are able to spy in on Trent and Jade, as well as JJ and Cole whom help in the resolving of a lot of conflict in the storyline.

I still can't sleep. I can't move on. I'm just here, trying to get my life after this book! This has to be in my top 5 fav books..Ever. EVER! Do you hear what I am saying!? EVER!!!!

Kudos to Christina Jones!

### **Ramsey!!!!**

First it was Trent, then Jordon and OMG Ramsey!!! Loved this and wondering where he at?? I loved the flow of this book, but with CCJ I knew it would be all good.

## **Byron Washington says**

Christina C. Jones is simply a marvel. I have read around ten of her books and they all were entertaining. She has the innate ability to weave a tale, with likable and multilayered characters, and slowly draw you into her fictional world. A world that's usually so entertaining that you genuinely hate it when the story inevitably ends.

The Arizona and Arnez portions of this book are?????

????????????????

## **Gordina Porter says**

Let's just establish if I thought I loved Stenton Rogers my feelings were checked with Ramsey Bishop. So many quotes that were so meaningful:

"A man can say anything, but his actions tell the real story." ~ Carla Cunningham

"Something about liquor not creating urges, only amplifying existing ones." ~ Ramsey Bishop

"Never supposed to 'let my crown slip,' not in public" ~ Wil Cunningham

I loved how Wil had her flaws, but was an empowered female. Determined to write her on way without using her parents namesake. She was charming, edgy, sweet but sultry. Mrs. Carla and Mr. Jack were the funniest parents. When your father's nickname is JackHammer and you fall for a guy nicknamed Sledgehammer, you're destined to be. I was expecting Darius to cause my smoke in the city when he discovered how high Wil's legs really could go from those picture ??, but a guilty extra medium person would have to humble down in defeat.

Overall, I couldn't stop reading this one. Loved how the relationship literally blossomed into more. That RJ is definitely going to be a super natural kid! When your grandparents are athletic legends and your parents are living athletic royalty what's a kid to be other than great!?

### LOVED!!!

Listen, CCJ did her thang with this book. I wasn't sure that I was gonna like Wil at the beginning, but that didn't last long at all. I loved her strength and her spirit. I could definitely identify with her smile through it all attitude. Ramsey was perfection. Sharp, sweet, flirty and fun. And a really good friend.

I loved Wil and Ramsey's friendship, but it was clear as day to me that they were supposed to be together. Just perfect for each other. Ramsey was a little different than the usual hero, which was surprising, but didn't matter one bit.

I would like to give CCJ a special shout-out for giving Wil the opportunity to tell lil Becky off, and to say that sh\*t with her chest. Had the nerve to approach Wil with her fake ass tears and even faker apology. She deserved them hands, but that cuss out was delivered quite nicely. And don't get me started on the ex. He knew what ol' girl had done and why, and was still with her. SMH. Just trifling.

The cast of characters was amazing! Wil's parents were everything. Still in love and still crazy (would love to have seen Jackie doing the butterfly, lol). And the conversations with Naima, Ashley, Cole and Margot had me screaming! So real and so hilarious. They were just the friends that I'm not sure Wil knew she needed. I've been trying not to ask authors about doing stories for other characters, but CCJ makes such larger than life characters that it's hard not to want to hear more from them. Having said that, if you decide to do a story for Chloe and Reggie, or Clay and Soriyah, I will support you 100%.

If you're reading this review, and haven't read this book, you are definitely missing out.
