# From Reader Review Entwined for online ebook

## **Sami says**

I won this book in the Goodreads giveaway. I liked it well enough, but there was nothing that gripped my soul while reading. Mostly it was a light, easy read for those that enjoy a little poetry. It was done well in my opinion.

---

## **Cameron says**

lovev dovev poems for the twitter age.  
or, if you're of a more romantic bent, for writing down on little slips of paper and hiding them around your house for your lover to find...

---

## **Julia Sapphire says**

I was sent this book in exchange for the honest review

This collection feel flat for me unfortunately. The poems, though I enjoy short poems, these were very short with cliché lines and analogies that I have read before. There was only a few poems that I enjoyed but I found a lot of them were repetitive of one another.
