## Rubicon Jack McKinney

Optera! Birthplace of the Flowers of Life and their agents of retribution, the Invid . . . nexus for an unfolding of events that had left the galaxy reshaped and redefined . . . and now the focal point of the Sentinels' long campaign to liberate the Quadrant from the Regent's tyranny.

Edwards is on his way to Optera, in flight from Tirol with his prisoner Lynn-Minmei and a handful of Invid Inorganics under his control. So too are Breetai's Zentraedi -- closing on the very world the Imperative bade them defoliate generations ago -- and the renegade forces of Tesla, mutated beyond recognition by the fruits of the Flower.

The Sentinels themselves are not far behind. However, they have Peryton to deal with first -- a godforsaken planet cursed by fate and time itself. But what awaits Rick, Lisa, and the Human Sentinels there is a mere primer for what is to come: the realization that they have journeyed across the galaxy . . . to wage war against each other!

### **Edward Smith says**

I loved Rubicon. It was a very good end for the Sentinels (which despite its quirkiness, was a good storyline). I actually liked Rubicon much more than the Prelude to Shadow Chronicles which is now officially "canon". Prelude to Shadow Chronicles removed a lot of things which I liked about Rubicon, such as Breetai's climactic fight (which was retconned to being killed by Edwards ingloriously), as well as killing Rick and Lisa's unborn child (I loved Roy Hunter!). Rubicon essentially wraps up the civil war in the REF, with the defeat of the Regent's Invid, and ends the Sentinels with the REF preparing for the final attack to liberate Earth for the Regis.

The final act for the Sentinels Saga, this helps close it with a bang, taking the place of book #19 in the Chronological order. This also ties the Sentinels Saga storyline back into the one occurring on Earth as well, and helps to set up some of the events that occur at the end of Symphony of Light.

This is it!! The battle for freedom in this neck of space and beyond is here. I really liked it and I know this has all been replaced now over the years as non canon. But that's a boardroom choice not mine. So I'm sticking with this story line.

Great series of books for kids that enjoy or are interested in science fiction. I read these books in middle school (I'm now in my 30s) and loved each one. The stories are fun, engaging and relatively fast paced. I'd be tempted to reread them now just for old time's sake if I didn't have so many new books on my to-read list.

I knocked it down a peg because, in retrospect, there are some aspects that are a bit too cheesy. I'm sure when my kids are old enough, they'll get their own copies.

**The Sentinels' Robotech War comes to an end!**

*This is the fifth prose novel in the five-book series of “The Sentinels”, part of the “Robotech” franchise.*

**NOTHING IS THE SAME AFTER ANY WAR**

This is the final book in the saga of *The Sentinels*, part of the *Robotech* franchise, where it was told the war that never was shown in screens.

The REF got bigger beyond its initial conception, developing a vast fleet and also mechas beyond their wildest dreams. The Sentinels campaign was successful to liberate the Local Star Group. The Invid Regent's forces were beaten even with an unexpected evil twist at the climax of the conflict. The space sector is secured again and peace is enjoying and progress is on full, but...

...what they have to pay to achieve that...

...was simply too costly, too dearly...

...and even many of the surviving ones, they won't be the same anymore...

...hails of victory were exclaimed, but also tears of sadness fell.

And even in the middle of those bittersweet feelings post-war...

...one of the sent battlecruisers to Earth came back, but...

...not with its original crew aboard, but...

...some loved ones and some strangers, but all friends, however...

...with sad news about the outcome of the Second Robotech War at Earth against The Robotech Masters and the impending arrival of the Invid Regis' forces due the blossoming of the Flower of Life there.

The horizon is clear, the REF must return to home, to face the Invid Regis.

The Mars Group fleet is deployed and sent there (but if you read the Third Robotech War novels, you may know how that would result).

The Jupiter Group fleet is ready to follow, with the SDF-3, in command again of Admirals Rick Hunter and Lisa Hayes-Hunter...

...but never is as easy as it supposed to be in *Robotech*...

...*The End of the Circle* is yet to explode!!!

The Sentinels Robotech War ended, but still there is much to happen!

### **Deslni01 says**

The Sentinels are left with two planets to complete their original mission to rid the quadrant of war: Peryton, a cursed planet, and the Invid homeworld Optera. This is an exciting epic finale as all of the various characters in the power struggle converge - The Sentinels, The Invid Regent, the evolved Invid scientist Tesla, the REF, the remaining Zentraedi and the renegade Edwards - on a drastic fight of domination surrounding Optera.[return][return]This volume completes **The Sentinels** campaign that took many familiar characters from the Macross Saga across the universe to investigate the Fourth Quadrant. This final volume ties all of the loose strings from the saga rather quickly, but in an exciting ending the reader won't see coming.

### **James says**

I'm still stubbornly slogging my way through some books I've basically out-grown, but want another read-through of before I donate/sell/burn them.

It was going so well up until this point. The first 4 Sentinels novels, while shallow and pulpy action and space opera, at least had a good pace, non-annoying characters (outside of minmei who was mercifully minor) and creative machines/planets/aliens which is all I've ever really wanted out of Science Fiction. Unfortunately, the plot really falls apart in this last book (of the sentinels anyway). There are just too many moments that seem out of character for too many characters. Minmei as assassin. The invad Regent out in the middle of the battlefield (he had been portrayed largely as an ineffective coward/bully at this point), Breetai's apparent death wish and lack of fighting skill, minmei's song debilitating the zentraedi after they had had years to adjust, the fighting machines the evil Colonel Edwards cooks up to freak out the RDF (in like a day he manufactures grotesque naked versions of all the main characters to demoralize them. it was just dumb).

What I liked about this book:

- a) Colonel edwards in control of optera.
- b) closure on the storyline.
- c) How the curse of peryton is ended

Next up: The Robotech Masters invade earth!

Great SiFi series. Giant battlesuits battling outer space monsters, what more can you ask for. Very recommended
