## **The Bewundering World of Bewilderbeests Bailey Fort**

Beyond the high seas,  
A-way to the east,  
Lies the Bewundering World of Bewilderbeests...

So begins this charming adventure that introduces us to a colourful cast of strange and silly creatures. Rich illustrations and delightful poems full of wry wit bring to life such confounding beasties as a juggling Millipus, a scatter-brained Two-Headed Mugwump, and more. Bailey Fort's picture book debut captures the heart and spirit of a host of unique characters with a lyrical cadence that makes it a pleasure to read aloud, for both kids and parents alike. Welcome to the Bewundering World of Bewilderbeests.

Ages 3–8.

### **Sinead says**

I was lucky enough to win a Goodreads Giveaway for this book - thank you Goodreads.

From cover to cover I could not get enough of the colours and fantastic drawings of creatures in this book - and I wasn't the only one. My 3 year old step son loved it too - lots of belly laughs had over me trying to pronounce the various silly and made up names of the creatures - the whole day after reading it he got us to repeat them to him - 'buffalope' was his favourite - daddy is a buffalope is something we have heard quite often. There was lots to see in the pictures and the bright colours and images were definitely a draw. This book reminded me of Lewis Carroll's writing and was no less funny with its various tongue-twisters. Highly recommend (I think the tongue twisters will make for a brilliant adult drinking game too - watch out at our next gathering... :) )

### **Christel Elliott says**

So fun! My boys and I often read this at bedtime and it seems to make them have silly dreams. The illustrations are lovely and the "bewilderbeests" are so creative and cute.
