## Kanwal says

I used to love this book as a kid.

---

## DMackD says

I loved this series of books when I was a boy but this one along with Whale adventure was probably one of my least favourites.

---

## Tanderton says

One of my favourite Adventure books by Willard Price. action packed and filled with fun this a great book for 9-12 year olds.

---

## Edward says

This is a feeble effort that is dramatically worse than the disappointing *Tiger Adventure*. The story is impaired once again by the animals being captured without a struggle, but even a child's credulity is challenged by the swift taming of a polar bear and the capture of a whale. With chapters such as 'A Sheep Can Kill' and a villain called Zeb, this book marks a desperate end to the otherwise fine *Adventure* series.

## Jess says

Certainly one of my favourite Price books, I ended up buying three different copies over 6 years as I just read and re-read them so frequently the spines fell apart!

---

## Angela says

Action, adventure, survival, environment, conservation...

I loved these books when I was a kid. At the time, they seemed to border on sci-fi regarding the at-the-time-amazing technology the boys used.

Of course, looking back you can see how these stories are flawed, but I still think they are enjoyable. In fact, it would make for a really interesting middle school science project for children to read one of these books and then compare them with the knowledge of the world and technology we have today.

Tough book about survival in the extreme.
