Randa says

For some reason I missed reading Nawal Saadawi while I was growing up. I wish I met her writings before, she would have answered many of my burning questions and made me feel less alone in my rebellion against social norms. These books were published some 40 years ago and they are still relevant and revolutionary now as they were then. This in itself is a condemnation of our society which has failed for decades to redress the injustice suffered by most Arab women throughout their lives.

This edition contains early studies about men and women and society in addition to the book published in English as "The Hidden Face of Eve" .
