## Raspberry Jam Carolyn Wells

*Raspberry Jam* is a classic locked-room whodunit featuring Detective Fleming Stone and is widely considered to be one of the best of the Fleming Stone Mysteries. Millionaire Sanford Embury is found dead in bed, alone, with the door of his second-story bedroom bolted shut from the inside. He was known to be a controlling husband, refusing to give his pretty young wife an allowance of cash or her own checking account. Was his wife a party to the murder, or perhaps did she commit the murder in a fit of rage? Who else had a motive? And how does a clue of raspberry jam point to the killer? Curl up with the classic cozy locked-room mystery from the author of *The Clue*.

I was a little confused at first with this book because I thought all three of the main characters were pretty bad (OK, Aunt Abby wasn't so bad), particularly the spoiled brat of a wife. But then again, Wells does seem to simplify her characters into people I would never be friends with, let alone let in my house! She comes through with a good story.

This is pure melodrama with a classic cliffhanger followed by a dead body in a locked room. While I never got over disliking Eunice, the mystery was great, especially as detective Fleming Stone with sidekick Fibsy gets to the bottom of things, especially why the book's title is Raspberry Jam. Quite clever all in all.

A very disappointing mystery. You have to read 40 percent of the book before a murder happens. The first 40 percent of the book is talking about telepathy and visions. Eunice and her husband also fight a lot of over money. I did not like Eunice, she was so shallow, also played the victim card much too often. Her fits of temper got annoying. Aunt Abby was different, she claimed that she was psychic and saw the dead man in her room, saying goodbye. Depends on your perspective, if you believed her or not. Most just thought she was an older lady, maybe a little crazy. I am picky about titles of books and if they fit the story. You almost have to finish the book to see where the title fits in. Raspberry jam on a sleeve was the final clue before the murderer confessed. This story does have an interesting tie to Shakespeare's play, Hamlet.

### **Roberta says**

A thoroughly entertaining and different kind of mystery. A quick read with vivid characters.

### **Imsathya says**

The good thing about the book was its fast pace. Short dialogues, quick introductions- it almost felt as though you were watching a 2-hour movie in a fast-forward mode so that you could see the full thing in an hour

It's a good book for a snappy read but there is little satisfaction to be derived from it. It's a pretty silly

mystery belonging to the locked-room genre. Every character in the book emerges cliched and very un-original. The end is very predictable and boring.

I suggest that when you finish this book you try and explain how the crime was done to a friend. I have not laughed like that in a while. And I honestly cannot tell if the author intended it that way.

So this is an updated review. I've read it again, and it was just as fun the second time. It was a mystery, I guess the first might have been just a bit more fun. I remember the first time I read it I was in suspense the whole time not only over finding the murderer but whether it was really a who-done-it or a tale ghostly visitors.

This time I enjoyed Aunt Abby and Fibsy more and detested Eunice, Embury, and Mrs. Desternay even more. That Fibsy will grow on you. The incomparable Fleming Stone? I still don't have an opinion of him. He just wasn't there enough to either like or dislike.

Oh, do a bit of research about that solution. It's really interesting and will show you a bit more of how she plotted her stories.

A very light mystery that takes determination to keep reading since the dead body only shows up about 1/3 of the way through. The female suspect is "gorgeous when enraged" so spends a lot of time in angry hysterics which got old after a while. I liked Inspector Stone, though, and his sidekick, Fibsy.

This classic mystery has elements of what all classic mysteries seem to have (a horrifying murder, innocent suspects, complicated relationships and a good detective) and more. This author adds an aunt who believes in the supernatural and a con/show man to the mix. This is a basic locked room conundrum where one person is murdered and the two suspects are innocent. The key is trying to figure out how a third suspect could have come in. The major clue (raspberry jam) comes surprisingly through what the aunt believes was a ghost! Well-written. I was pleasantly surprised to see the main woman in the story wasn't the sweet little damsel who did no wrong. She has a temper and is spoiled. (There were times I got impatient with her.) This adds a great little dimension to the story.

This is the first book I have read by Caroline Wells. I really felt and enjoyed the the feeling of watching an old American golden years production. If you bare this in mind you will really enjoy yourself, the descriptions, the language all add up to create a 'perfect day' feel, even if there is trouble in paradise just remember you have to look good! - if you're not a fan of the 'old' then I don't expect you to be reading this or if you are, your in for a slog which might explain the poor ratings by other readers.
