Chris Pike

## Unknown World Chris Pike

Bestselling author Chris Pike brings a fresh voice to the post-apocalyptic genre with another pulse-pounding, harrowing story about survival.

*He was a man of quiet faith and determined courage who lived by an unwavering code of honor. He was a firm believer that the good guys would win and the bad guys would lose, although it didn't mean there wouldn't be casualties or injuries in the process of winning. EMP survivor Chris Chandler wasn't one to back away from overwhelming odds, and as of now, the odds weren't stacked in his favor. One way or the other, people were going to get hurt here or killed.*

Amanda Hardy and Chris Chandler have been living comfortably at the Double H Ranch where they took sanctuary after the EMP. Deciding it was time to head to Austin, where they both have relatives, they leave the safety of the ranch to embark on a journey filled with unknown perils.

They have meticulously planned for the trip, carrying extra food, ammo, and water, and they think they are prepared for every possible contingency, except for one. Amanda hasn't been completely truthful with Chandler about her past—a past that rears its ugly head and will cost lives.

*“Chris Pike draws the reader into the story with richly textured prose and vivid descriptions, using the right mixture of unexpected twists and turns, raising the question: If it happened to me, could I survive?”*

## **From Reader Review Unknown World for online ebook**

### **Fernando Correia says**

#### **Action and suspense**

It's the third book in the series and this time the action moves to the big city. Chandler and Amanda will come face to face with danger and will have to rise up to the challenges. It's entertaining and the kind of book you don't want to stop reading.

---

### **Allison Minjares says**

#### **Love your books but**

You ended the first book with the dog just being killed. One there was no reason to kill him off two the way you did it made it seem like his life didn't matter to anyone. I almost didn't read anymore of your books. Whether you like the animal your writing about doesn't matter. You need to remember who matters without the readers you have nothing. I am one of hothouse crazy cat ladies who preaches spay/neuter with over 20 TNR'd kittens and cats. Along with 4 rescue dogs! I also happen to love snakes I wasn't thrilled it had to die but I understood it. But I don't understand why you made the dogs life of no importance!

---

### **Helen says**

#### **Very interesting read.**

I stumbled on this author and am happy with this series. I love post apocalyptic books this author has put together one with lots of interesting drama. I hope you enjoy.

---

### **Brandon says**

Faith, Family & Firearms: an apt motto for this series if ever there were one.

Part 3 focuses mainly on Chandler and Amanda after they leave Holly's ranch and head toward her Great Aunt's in Austin. The decide to stop by Chandler's parents house first, along the way. Forced to make the trip on horseback, the drama moves at anything but a trot. A deviant ex-boyfriend from Amanda's youth is setting up his own small fiefdom, similar to what Cole's had been; only, better armed. But, before they can get there they come across an old traveler's trap, beating into Amanda the lesson that people aren't to be trusted implicitly, regardless how they appear, and especially during an apocalypse.

I love that Pike added a whole dimension to this part with all the sniper "stuff." The backstory, the rifles, the craft, and the family trade all made it that much more interesting for me. The addition of a rather infamous location, also relating to precision shooting (albeit a negative one) was an interesting touch.

---

## **Chessy The Cat says**

Chris Chandler and Amanda Hardy leave Dillon and Holly to take Amanda home to Austin. With everything seemingly running as well as can be expected post EMP at the ranch now is as good a time as any. Their journey will be anything but smooth even though it has been made easier by having the horses that Holly loaned them. All along the way danger is waiting to challenge their wit and their resolve. It is also a time for Chandler and Amanda to learn more about one another. What they learn may be more dangerous to them over time than anything else.

Pike's third novel in The EMP Survivor Series, Unknown World: A Post Apocalyptic/Dystopian Survival Fiction Series, explores a new set of characters while expanding on the ones we already know. She does a good job of bringing in history without it distracting from the storyline. The pace is fast and makes for a quick read. Be ready for a thrill ride and gut-wrenching action.

Surprisingly to me was the breakdown in editing/proofreading in this book. Books one and two were very well done. This book had two continuity errors between book two and three. There were at least three times the wrong name was used. It was suggested to me that I had an older version. If so, this is the latest version on Amazon. Maybe, it hadn't been updated yet?

Overall, it is a good addition to the series.

4 out of 5 stars.

### **Salivating for book 4**

As indicated in reviews of books 1 and 2, the story, author's skills, story-line, characters and overall continuing story has created high interest, high expectations and confidence that the next book will be the hot topic and page-turner high quality work that the two previous books are. I love this genre, have rated a few in the 5 category and many in the 4 category. This author is top of the line. I even requested an email notification for book 4!!

---

## **Jeff says**

Chris Pike does another good job with this continuing EMP story. We follow Amanda & Chandler as they head home on horseback. For the most, a believable journey home. I like the characters. The bad guys are bad & the good guys are good.

The action is there. Some romance. The last scene with Chandler was terrifying. Unfortunately, the scene with Mom Chandler at the tower almost brought the book down to 3 stars. Her knife trick was too much. Everything else great.

---

### **James J. Seals Jr says**

Chris Pike continues the EMP Survivor Saga with #3 Unknown Worlds. The action continues at a fast pace, our cast of characters facing danger, strife and insidious evil as they make their way toward a better life. Old nemesis arise and continue to make life difficult, but despite all those rocks in the road, somehow they adapt and overcome. Chris Pike's character development and story plot are what keep me coming back for more. If you haven't read this series, start now.

---

### **Susan says**

#### **Book Three**

Pretty similar plot to books one and two. A bad guy with ties to the heroine takes over. He has other bad guys who follow his orders. I can't mention the other similarities without a spoiler. Still it's a well-written book with believable characters. Onto book four. I hope we get to see more of Luke.

---

### **Sheri Thurston says**

#### **Good story continues**

Good story continues. I really like the characters. I'm not a big fan of the gun worship that has been getting more pronounced in each book but it's easy to overlook it. I appreciate the clean language I would like more details about how people get on with living. Question? Can someone really get hypothermia in east Texas? It doesn't get that cold down there does it? Overall I gave it a four because it kept my interest and I like the characters.

**Every series is as exciting as the last. Unknown World is true to form, as our everyday lives are an adventure into the unknown. Enjoyed the new series because I lived in San Antonio for 13 years and your portrayals are accurate but in an exciting new way of looking at the Austin area . Everyone this is a must series to read and keep.**

Every series is as exciting as the last. Unknown World is true to form, as our everyday lives are an adventure into the unknown. Enjoyed the new series because I lived in San Antonio for 13 years and your portrayals are accurate but in an exciting new way of looking at the Austin area . Everyone this is a must series to read and keep. I am also ordering the paper books for future referencing.

### **HOOK 'EM!!!**

Being a born and bred TEXAN for over fifty years, you imagine how much I enjoyed this story. I am not gonna mention any for fear of giving something away. Suffice it to say that if you are a central TEXAN over fifty years old, I think you will enjoy this book immensely. YEE HAW!!!

---

## **Robert Chapman says**

This is the third installment in the EMP Survivor series. I really enjoyed books one and two, so I was eager to dive into book three and have the story unfold further.

The focus of the story is on Amanda and Chris as they attempt to get to Amanda's aunt's house near Austin. Escorting Amanda was a promise Chris had made to Amanda's grandfather before he was killed in book two.

One nugget from the book is the expression "faith, family, and firearms.". I may not be the worshiping type, but I do love that expression.

I gave this book a 4 on 5 star rating as there were two aspects of the story that didn't sit well with me.

The first was the amount of time spent on describing things from the dog's perspective. This struck me as a bit odd and didn't really add to the story. To describe the second issue would be to include spoilers, which I don't want to do. What I can say is that I felt a bit of *déjà vu* from the first and second books and would have preferred something more distinct in regards to the main villain in the story.

These were issues from my perspective and didn't take too much away from my overall enjoyment of the story.

### **An Action Packed Post-Apocalyptic Tale**

It's been a fun process to follow Pike's writing from books one until book three. It started strong but has really picked up in Unknown World. Pike knows how to weave a few stories into one without taking away from the overall story arc.

Unknown World's main storyline is Chandler and Amanda traveling across Texas to get to her aunt's ranch. Of course along the way they run into lots of trouble from more than one type of person. I won't ruin who or what happens, but I will tell you that it involved two different 'baddies' that really cranked the action up to 11.

Both Chandler and Amanda are pretty well explained in the first two books, but we are treated to a little more back story on Amanda -- which ends up having a pretty big part of the story. I like reading a book and thinking that I know the characters and then an author can throw in a story you didn't know or didn't expect

and it changes everything.

My favorite part of Unknown World came when we are introduced to Chandlers brother and his ability to always pick the wrong moment. I found myself laughing at the parts with his brother, especially in the final "bonus" story.

The narration for Unknown World was done by the Post-Apocalyptic master Kevin Pierce, who, surprise surprise, does a great job. He's narrated the first two books and I'm glad that he was brought back to narrate the third.

Overall, this book was really enjoyable. I could tell that book two was leading up to something, but this wasn't at all what I expected. It had a lot more action and a lot more human connection than the first 2 books. Which really 'matured' the series a bit (don't worry it's not heavy like some post-apocalyptic books can be).

I honestly could have left the series here. I wasn't sure if this was going to be a three book series or more when I started it, but I would be happy with the way it ended. With that being said, I know that Pike is writing the fourth right now that's due out sometime in 2017.

---

### **Lowell Moore says**

#### **Well written series**

Chris Pike is emerging as a polished author. There are a number of new authors writing dystopian novels now. Many allow the story to run away like a spooked horse. Chris holds the reins.
