## **The Megalodon Mix-Up** Amanda M. Lee

Charlie Rhodes' life has taken a turn.

Not only is she working her dream job, but she's also taken on a dreamy co-worker and is officially dating the office security chief.

Yeah, she's still trying to wrap her head around it, too.

She doesn't have much time because a high-profile incident in Florida means the team is on the hunt, and this time the likely culprit is none other than a prehistoric shark that's been extinct for millions of years.

For Jack Hanson, the mere thought that a Megalodon is hunting the Gulf of Mexico waters is too much to bear. He's on edge and irritated, and that's on top of the fact that Legacy Foundation co-workers are starting to find out about his relationship with Charlie.

For her part, Charlie is enjoying herself. Not only is she looking for a giant shark, but she's investigating in the middle of an author conference and the victim was the one person hated by absolutely everyone. She's learning on the job ... and it's a tangled web of lies and intrigue to wade through.

There are suspects at every turn, blood in the water, and hungry sharks looking for a meal. It's another fun-filled adventure, and the stakes in this one are graver than anybody anticipated.

Although I like the series overall, I felt this story fell a little flat. I felt as if parts of this was a rinse and repeat from other series the author writes, and that the inclusion of the relationship was being forced - as if the characters are being made to act a certain way now that their relationship is starting that isn't really how they've been developing as characters so far.

And it seems that the writing reflects this when Jack constantly has to reassure Charlie about the things he likes about her. Honestly, it's become a constant theme in the author's writing. It's not necessarily a bad thing, but I think when it appears in every single book of every series - it starts to get a little old.

Don't get me wrong. I'm glad Charlie and Jack are getting together - the chemistry is definitely there. But I think it feels like it's following more the Landon and Bay relationship rather than developing on its own.

Will still continue the series, though. I have hopes it'll get better. :)

#### Fantastic

Love this series. Have read every series this author does can't wait for the next one. Thanks for another great read

#### Another great story

I learned a lot about authors and their writing journey. Who knew there were so many pitfalls. I had fun trying to guess the author's names. The Lily connection was great. Even as a character her essence came through.

The actual story had me second guessing myself on whodunit. I won't say more to ruin it, but I liked the sleeping arrangements. Progress.

#### Highly recommend!

I love Amanda Lee's books. They are always well written with great characters and very engrossing. I'm very fond of Charlie, she was less of a dingy in this book. I can't stand Laura, the fact that I hate a made up character speaks to the writing. This series should be read in order. Each book builds on the last. The

mystery was great, I had no clue at the end!

#### **Loved it!!**

This book was amazing. I truly loved reading it.

It follows Charlie as she travels with her entourage to investigate a suspected Megalodon attack. A woman body is found ravaged by sharks in the sea.

Complications arise when everyone hated her. she was a truly horrible person.

Charlie and Jack are slowly embarking on a relationship but decide to hide their changes equation. Things get messy when the relationship is discovered by a member of their team.

What does this mean for their new found relationship? will they discover a Megalodon caused the death of the woman or is there another explanation for it?

I loved how my favourite author, Lily Harper Hart makes an appearance in this story. I loved Charlie interaction with her.

I was intrigued by Jack as he was different in this book compared to the previous books. He was more light hearted and more jovial with the acceptance of his growing feelings for Charlie.

Fab book and series. Can't wait for the next book.

#### **Exceptionally funny and entertaining**

And exceptionally funny and entertaining series. A great cast of characters written with heart went in a bit of sarcasm. A supernatural investigation team chasing around the country after all the different supernatural sightings. Kind of like one of those TV shows. They look for Bigfoot werewolves mega sharks chupacabra and who knows what else but they look for if they hear about it. A very interesting team one of them is even a little bit supernatural herself she has psychic in Connecticut abilities you won't be disappointed check it out

#### **Another great book!**

I read it from start to finish, I couldn't put it down. I really enjoy this new series and can't wait for Charlie and Jack's next adventure. And the rest of the gang of course, lol. The only disappointment was that Charlie didn't kick the crap out of Laurie for shoving her off the boat. At the very least they should have fired her. (then they could beat her up). LOL!! Or throw her to the sharks, now that would have been fun. Rotflmao. Keep the great books coming. One of my favorite authors.

### **Top notch!**

Ms. Lee never fails to impress me and I look forward to reading any book from her various series. This once has a young woman hiding her paranormal abilities while working with a special investigative group looking for paranormals. I just hope Charlie doesn't drag out not telling her boy friend (who is the main skeptic on the team and security manager) about her talents. Marine veterans can handle the truth any day; lieing by omission is a deal killer however and unforgivable. Hopefully it will happen in book 4!

### **Funniest one yet**

I loved this book and the quirky writers represented. Charlie and Jack take things further, Chris is delusional, but sweet. He did display some backbone which I loved. Laura is a huge problem as usual. During this book, the crew find themselves in FL at a writers conference to research an apparent shark attack, from a very large predator. So many funny quips in this book.

### **Another great book**

I love Charlie and Jack, I mean who wouldn't love a guy like Jack, this story was funny and it is always fun to watch Laura get put in her place. Ms. Lee is one of my favorite authors and this story did not disappoint. I can't wait for the next installment of Charlie and Jacks adventures with the rest of the gang.

### **Great**

I liked this a lot. I am looking forward to when Charlie decides to tell about her ability, and to see if her powers start to grow. Was good to see them come out with the relationship and to see Laura get a bit of what she deserved but she hasn't really gotten all she does. As usual Millie is fun though she took a back burner to some of the authors.

Thought it was fabulous that Amanda M Lee used her Lily Harper Hart identity. Entertaining in all kinds of ways with that addition. ?Is that how she pictures herself or just that character? I have read some authors take on slightly different personalities when under a pen (different) name.

Highly recommended as I do all her books under both names.

A wonderfully humorous mystery, with a dash of kooky romance and a little magic.

I am loving getting to know Charlie Rhodes, Jack and all the gang with the exception of Laura, nobody wants to know Laura or get to close to her just in case you catch a huge dose of the Nasties...lol but Laura does add to the humour level I'll give her that.

I do love that Charlie is settling in more with the team and her new job I also think Jack already suspects she is more than she seems and I don't think he will have a problem with it at all but that's all for future stories.

A Megalodon Murder was the mystery for Charlie and the team this time around, could a pre-historic predator really be out in the ocean just waiting to kill people? or was it more a human element? I really loved the mystery side of this story having a writers conference in the mix made for a lot of fun and lots of suspects. I also loved the 'banter' between Jack and Chris over whether a Megalodon had resurfaced...lol it was funny especially when both these guys are beyond stubborn...lol

### **Love this series!**

The characters and the cases they investigate are intriguing and exciting. There are always edge of your seat moments with very descriptive and often scary creatures. This book became thrilling in other ways too, but no spoilers from me. Looking forward to more books in this series.

### **Shark attack!**

Another winner. Loved the characters and the way that the romance is unfurling plus Laura is an absolute gem. Talk about a manipulating, conniving and ruthless baggage. Plus the plot certainly had me fooled until the end with enough twists and red herrings to please any mystery reader.

When a body is found with strange shark teeth markings, the team soon find themselves heading for the area. As the teeth size does not match any of the living shark size. Could it possibly be a Megalodon? As the team look into the author's death they discover that there is a list of suspects a mile long of people that might be responsible. The author had been responsible for victimisation of other authors leading to ruined careers. Throw in a new romance, a green eyed monster, sharks and a conference full of authors and their egos for a great read. Can the team solve the case? Was it a shark? Or was the perpetrator human? Can they fight the jealousy in their own team?

### **Sarah Leenart says**

Wonderfully hilarious and tongue in cheek (?) insight into the world of authors. Charlie and team attend the murder of an author at a writer's conference, based on the fact that it might have been the extinct megalodon due to the size of the bite marks on the body. Whilst the supernatural link was weak in this story, the fun of the characters more than made up for it. Also Charlie and Jack start to explore a relationship and they are super cute, although there is one team member who is more than put out and would like to cause trouble. I did not see the actual murderer coming until Charlie did which always adds to the reading enjoyment. Looking forward as ever to the next outing.
