DW McQuain says

I really like that the book never stops. There is no "the end".

Emily Traasdahl says

Good book.

Rachel Meyer says

[I wasn't that sad when he died, as harsh as that seems. (hide spoiler)]

Salima says

yes I know they're kids books but I still like them

Tess Herrick says

Good book.

Sarah Newman says

This was an okay addition to the series, and the writing was fine, but I feel the story has gone on too long.

Catherine ~Whatever you are, be a good one~ says

Important information: Every book of this series is written by a different author. Brandon Mull was the first and my favorite.

The plot of this story was good. It was exciting and, while not the most original book ever, it made you want to know what happens next. The ending, though, wasn't exciting. I love (and hate) a good, dramatic cliffhanger that just makes you die waiting for the next book. The ending here wasn't one of those. Like, I'll probably read the next book, but I'm not particularly compelled to.

Now, the characters. This author did it better than the last one. The normal main characters haven't really

changed or grown too much, but the addition of Worthy was interesting in a good way. He has grown and changed tremendously.

The setting is well-done as usual. Erdas has some complex history, and it's fun to learn more about, being explained understandably. It does seem like the authors add things to it on a whim, but it isn't terribly confusing.

I spotted two grammatical mistakes: A period was used for a question, and woman was used for the plural form. "The woman...their heads." Other than those, I have no technicalities to pick on.

To sum it up, the plot and setting were good and the characters were okay, but the ending wasn't good and there were a couple grammar mistakes.

Rachel says

WHAT THE HECK?!! You can't just kill my new favorite character like that! If Worthy's really dead, I'm going to be (more) upset.

Joe Holman says

It is a good series though I wish I had read this one shortly after the previous one. There was also confusion as both this one and the previous one, written by Scherfer, are both number 6 in the series.

Emma says

Why must you hurt me in this way?

Caleb Block says

Continuing the story of the Heart of the Land, another search for a relic (classic for this series) will bring an entire roller coaster for the reader.

Tara says

This was such a good book, such a shame that Worthy died at the end it made me so sad, he was a hero and didn't deserve this death but such is life people come and go.

Charlie Thacker says

This is a good book that is part of a good series. The book has a really neat idea with the spirit animals but the writing could be a lot better

Pam says

This book didn't hold my interest as well as others have but it does continue the storyline and build on the characters. Looking forward to the next books.

Kimberlee says

Wildcat's Claw picks up where book #5 left off with the main characters plus Anka and Worthy evading capture from the Oathbound. Now that the group holds the Heart of the Land, Worthy thinks he may have a lead on the next treasure: the Wildcat's Claw. Unfortunately, the group will have to travel to Conor's birthplace, Trunswick to get more information. With Oathbound crawling the countryside and a population out for vengeance against the Greencloaks this journey is fraught with danger. Our six heroes must make it to the Wildcat's Claw before they are captured and executed.

Wildcat's Claw is a return to everything I enjoy about the Spirit Animals series. Though I was sort of nonplussed about the addition of "political intrigue" into the canon of the series, Varian Johnson does it well. I'm glad the author returned for another book. There's a great understanding of the characters, though I would have loved to see more of Rollan's brand of humor. As always, I'm not looking for much depth in these stories, but I'm happy that all the characters featured in these books have growing backstories and motivations. Plus, we aren't overloaded with characters like we were in book #4.

This was an enjoying read. 4/5 stars.
