This is a great book to read and I highly recommend you to read it. It gives you a different perspective on life...well to me at least and I'm such an emotional person that I even cried while reading this book.

It would have to be by far my favorite book. But, I hated how the book ended

This book is one of the few books I enjoyed reading. Logan, the main character, just died in a car crash and is now floating between heaven and earth. Logan always takes the easy way out, but this time he was told that his little sister is in danger and that Logan must somehow reach out to her before it's too late. I found this book interesting, not only because the content was good, but because it brought up a new perspective regarding the afterlife. I think this book is great for someone that has lost a family member because it is being told from Logans point of view, how he reacts to what has happened and how he is going to get through it.

Usually when you look for books in this type of genre, the stories are told of how a person lost a family member and the guilt behind it, but this book is the exact opposite since the main character is willing to do everything he can, even something as small as tilting a glass of water just to get his family's attention and know that he is present.

This book uses a mediocre type of English, so I recommend this book for people with a little bit of knowledge in order to fully understand the book.

Logan, the main character, wakes up to find himself stuck between the living world and heaven. He has just died in a car accident and is warned that someone is harming his sister. He must go back to the living world,

unable to be seen or heard by anyone, to save his sister. The plot is one reason on why enjoyed reading this mysterious book. Another reason I enjoyed reading this was, it provides a great new perspective on what happens and where one goes after death. Not only does it deal with the afterlife, but with family coping with death. Also, this book dealt with being abused or knowing someone that is being abused.

One part I found difficult was, how Logan must attempt to make contact with earth to complete his "secret mission". In the beginning of the story, I was confused on what Logan's mission was. Until the characters started talking about Logan's younger sister, and her eerie conflict.

The only realistic part in the book *Exit Point*, was the situation between Logan's sister, Amy, and her uncle. Today, there has been child abuse all around the world. I believe by reading this book, it shows how no matter what happens, you should always tell an adult or parent what's going on. The unrealistic part in my book, would be that there are five exit points during your life time. Therefore, you have five different ways that you can die.

I read this book because the title and the cover of the book looked very interesting to me.

"*Exit Point*" is about a 16 year old teenage boy named Logan who takes exit point number two. This book was very interesting because it was Laura Langston's idea of what happens after one dies. She sees that everyone has many different opportunities in their life when they can die, it all depends if you want to. Logan was supposed to take exit point five, and die in his seventies, meaning he had four other near death experiences before then, but he took the second exit point and died in a car accident. I never really think about what happens after death, but this was an interesting look on life and death. This could be true, that when people have near-death experiences, they don't die because psychologically, they don't allow themselves to, but when people do die, it could be because they let it happen. Logan was stuck in between heaven and life and earth because he had to get a message across to his sister. This book was very similar to the movie "*Lovely Bones*". "*Exit Point*" was a short book, but it really made me think. I read it within two days, and normally it takes me two weeks to read a book. It was easy to read and it kept me on the edge of my seat the entire time. I feel that my reading level is much higher than this book, but the concept of the book was fascinating. I wasn't too thrilled with the ending because it left you guessing. I had to make up the ending, and just assume that whatever I wanted to happen in the end, happened.

The book I read was *Exit Point*, written by Laura Langston. This book is a fan-fiction, but the way it is written, feels so real. It is a fan-fiction but the thoughts, ideas, and events are actually happening in the real world today. The book begins with Logan, the main character who is living between two worlds. The afterlife and with the living. It is difficult for Logan to understand that taking the easy way out is sometimes difficult. In his afterlife, he meets his grandmother Arlene, also known as Gran in the story and Wade who is supposed to lead him to complete his challenges and to make sure Logan leaves his afterlife safely. His mission was to help save her younger sister, Amy who is being molested by their uncle Herb. Herb threatens Amy not to tell anyone that he does disgusting things to her so she keeps it all to herself. She is scared and Logan knows because he can read her mind. In order to help Amy, he appears in Amy's dream, telling her that she NEEDS to talk to someone about it. Even if Amy does tell her parents, they will not believe her because she is just "a kid". The last thing he could do to help Amy is to appear in front of one living person and tell them to stop Herb from hurting Amy. No one will listen to Amy if she tells the truth, his mother is

too depressed to think straight even if the situation between Amy and Herb does seem fishy, at the same time, his father is denying the fact that Herb is doing bad things to Amy. How will Logan convince one of them to help Amy? If you are interested or curious about how they will help Amy, you should totally check out this book. Knock yourself out and enjoy this short book written by Laura Langston called Exit Point. There was this one part where it left me curious, why Uncle Herb would do such disgusting things if he were known as a good man, pilot, father, and husband? I recommend anyone who is interested in young adult, and mystery books to read this book. It left me curious, but it also left me picturing possible things that could happen.

I was able to read EXIT POINT thanks to a student who shared his copy with me.

Logan is dead, although he isn't really sure at first. When he opens his eyes, he is surrounded by gray robed figures and swirling colors. He is being told that he was supposed to take Exit Point 5 but evidently took the easy way out at Exit Point 2. Exit Point 5 would have meant extending his life until 2066, however, his early departure ended things for him in 2004. Well, that's a bummer.

When he is visited by Gran, Logan realizes that he is indeed dead, but if this is heaven, things are definitely not what he expected. Gran and his personal guide to the afterlife, a guy named Wade, are quick to inform him that he has a mission to accomplish before he can completely cross over. His job is to save his sister Amy from a rat bastard and his plans to sexually abuse the nine year old. Unfortunately, it may be tricky since the rat bastard is none other than Logan's uncle Herb.

What follows for Logan is a crash course in learning how to make contact with the living. It is not as easy as one would think, but he knows Amy's safety depends on his ability to learn quickly.

Author Laura Langston takes readers on a fascinating adventure into the afterlife. Logan's ability to make contact with his loved ones will have readers thinking carefully about unexplained sensations and random memories they may experience involving their own lost loved ones. I will be thanking my student for generously sharing this quick read with me.

### **Zak Engstrom says**

This book is very interesting. I liked this book. This book is full of suspense. The author is Laura Langston. The characters in this book surprise you at every turn of the page. The main character, Logan, is a naive and some people will say, he is a typical teenager. The minor characters are his grandma, his younger sister, his father, his mother, and his girlfriend Hannah. The other main character is the main character's guardian. The main character, Logan dies in a car crash because he was drinking and driving. He died at exit point two. Before he was born, he signed a contract saying that he will stay alive until he reached exit point five. He

would have been eighty-one years old at exit point five. He became a ghost and could watch over anybody on earth. He decided to look over his family. He soon realizes that his little sister, who is in fourth grade, is being molested by his Uncle Herb. He tried communicating to his family telling them what is going on. This is a very hard thing to do because it takes much skill and practice to successfully communicate with the living. For the good he has been trying to do, the "council," gives him one time to materialize. The council is people who look over the ghosts and make sure they are trying to do good. He chooses to materialize in front of his dad. He hopes that his dad will listen to what he is saying and help his little sister. The dad listens to what his son is saying, and confronts his Uncle Herb. The uncle denies it all, however, the dad also confronts his sister and she tells what has been going on. Then Logan ascends to heaven and is in peace.

In conclusion, I liked this book because it somewhat related to real life issues. The problems between Logan and his sister are problems that happen in the world today. I am glad that this book had a happy ending, but I think this is typical among most books and movies. I think that if you want to read a superb, short book, that you should definitely check out this book. I felt bad for Logan in this book because one bad decision changed his life forever. He feels guilty, because if he were alive he could help his sister in an easier way. This is a wake up call to some teenagers who do unwise things. Finally, this book could change the way people think of what happens after you die.

Exit Point has been a book I could never forget. I originally read this book in 8th grade and still think of it now in college. The novel sticks with you as the people in it feel so real and raw. Logan is illustrated as the confused and impulsive teen, which makes it all seem real and scary. You would expect the protagonist to have a heroic nature to them- but he does not. Logan is as befuddled as the reader themselves, thus creating the immersive nature of the book. Truthfully, I wanted the ending to bring more justice, but just shedding light of his sister's situation gave peace to Logan and freedom to her.

'Aight so all of y'all need to shush and listen up.

I may or may not be boasting here, but this book is around 130 pages and I finished it in about fifty minutes.

Anyway. Those fifty minutes were a roller coaster ride of emotion for me, lemme tell you. A story with a dead kid? Awesome, cool, okay. A story with a dead kid that realizes that he died earlier than planned for him, and now he has to somehow save his sister while he's practically a ghost?

Why haven't I heard of this sooner?

Yes, it is short, but the shortness doesn't hinder the pacing or anything too much. There's a deadline, that's a fact, and the writing does a good job with the pacing. There's a sense of time running out, and especially at

the end, it definitely feels like time is running out as fast as the pages.

With the quick pacing, the amount of emotion that I felt for the characters that built up over that time was certainly surprising. I was cringing (the good cringe, if there is one, when things get real) at points, laughing, and dreading turning the page just in case the ending wasn't what I expected it to be even though I sped through it anyway.

Although it was a short read, it certainly impacted me a lot more than I expected it to. Even through some of the parts I actually expected to happen (as some parts you can expect ahead of time, probably), this book was fun to read and use as an excuse to stupidly waste time in study hall.

Thank you, my friend that knows I'm talking about you, for telling me about this.
