## **From Reader Review LEGO Harry Potter: Characters of the Magical World for online ebook**

### **Marlee says**

My son, age 9 loved this book and would have given it 5 stars. Children who like Harry Potter and Lego will most likely enjoy this book. It's organized into 7 chapters, based on the 7 years of the books. There are some interesting facts in the book and it's arranged so that information is quite easy to find. My son and I read the whole book together and he enjoyed it so much that he went back over it several times.

---

### **Sarah says**

Very cute. I learned a lot about the what was used from other sets to make this one. Lego creators are very resourceful and imaginative.

---

### **Roberto says**

I love all the characters in the Harry Potter world. My favorite movie was the last movie because I thought the fighting was cool and it has so much action. My favorite Lego Harry Potters are the set that comes with the Troll and the set that comes with the Basilisk.

---

### **Lu Ann says**

Originally, from the appearance of the book's facing, I thought this to be a story with one of the characters. Wrong! This simply tells briefly of each characters and their components. it also lists each character and where they can be found. It is a great marketing tool. The book also briefly describes each character and describes their styles, tools and structure.

I had hoped to use it for my grandchildren but decides none would be that interested.

The book is very well illustrated and descriptive.

I am glad I won it but I would never have purchased it.

---

### **Nicole says**

Glad to add this to my collection of Harry Potter books. (especially for free)  
I was a bit disappointed in the lack of detail in the book.

However, my kids were really excited and are enjoying all the pictures!

---

### **Ann Williams says**

Great non fiction book for 4th graders who love LEGOS and Harry Potter. This book has a clear introduction with a full explanation on how to read this book. Luke(my resident expert on LEGOS) and I read this book together and we were able to learn so much about the world of Harry Potter LEGOS and the minifigures! It is an easy to read reference book with many different text features. It is possible to set a purpose for reading by focusing on just one text feature and reading that information on each page. For example, if you want to know they year the set was produced, you can read just for that information. This book will become a new mentor text when we discuss non fiction reading. Luke and I will be reading LEGO Star Wars next!

---

### **Sierra says**

I received this book as part of the First Read giveaway by Goodreads.

If you're interested in collecting the Lego Harry Potter sets, this is the perfect book for you. It's has very detailed information about every character and creature piece that can be found in any Lego set, which can be very useful if you are looking for something specific.

Since it is about the Lego sets specifically, sadly there is no new information about the Harry Potter universe to be had in this book. It does go into detail about the history of the sets themselves (such as who was the first character to have a double-sided head) so if you're a Lego fan, it's perfect.

The best part is the minifigure included with this book, can't say no to a free exclusive piece!

---

### **Sarah says**

Entirely creative and fun.

---

### **JC Hume says**

I like this book because it tells me about every Lego Harry Potter character and what sets they came with.

---

### **Caitlyn Van says**

fun!!!

---

### **jacky says**

Fun. (Not so fun seeing the major female characters who were overlooked by Lego, but that is not the book's fault).

---

### **Max Kidd-may says**

It was ok but u will probably already know most stuff

---

### **Melissa says**

It was great to see close ups of all the characters to appreciate the detail that went into each one! The book points out unique things, and tidbits like what other characters have the same hair but in different colors, or where Lego creators took pieces from dinosaurs to make the dragons, etc. Full of great info you'd learn nowhere else, and great for die-hard Harry Potter Lego fans such as myself. I'm so glad they switched to flesh-colored faces, as the yellow ones now look so weird for a true-to-life series like Harry potter.

---

### **Stacy says**

This was a cool book. It was fun to learn more facts about therefore Harry Potter characters.

---

### **Claire says**

This is really cool! I love Harry Potter and I love Lego! So this is perfect for me. Great little tidbits about the Lego and the details are fantastic. Great book!

---
