## **Rhinoceros** Colin Forbes

Tweed, Paula Grey and Bob Newman are on the trail of five heads of state who are conspiring to cause massive civil unrest throughout the western world. Dictatorsip will be the only acceptable form of government. Tweed knows the identity of four of the ringleaders, but who is the fifth?

# From Reader Review Rhinoceros for online ebook

## Titus Andothorpe says

Harmless entertainment. Not mind expanding, but that was not what it was written for.

---

## M Wads says

Has to be the worst book I have ever read!

---

## Manoj says

Beginning with a trail of murders covered to look like suicides, tweed and his team are on the trail leading to one of the most disastrous schemes planned by the elite four. The whole story goes on about discovering the good side and its counterpart. A final twist before the climax when it all falls open. Again for a seasoned reader, the story unveils a little earlier than the author would have liked to. However there is enough stuff to keep the grip on. One can always like a better ending where I thought it could have been a little better. Otherwise, a good read.

---

## Bev Taylor says

wow - so this is what the secret service get up to! some times it is better not to know .... !

aides t top statesmen are being murdered in various countries by a mysterious mr blue

so begins tweed's search for the truth, together with his formidable team

who is trying to destroy the world as we know it and by what method? who is who and whom can u trust

as tweed says - no one is what they seem

great characters that u can really feel come alive on the pages - both the goodies and the baddies

bev

---

## Sneha JM says

I think this is a nice work of detail. Unfortunately, I did not like it much. However, its a preference based opinion. People who like suspense and can follow fast paced writing might like it more.

---

**Thomas West says**

R has read it 2

---

**Andreea says**

"Nobody is what it seems"...the last line of the book...so true in so many ways. Colin Forbes is one of the most talented writers...you can just keep reading and reading his books and always finding new and surprising intrigues.

In this one...Tweed and his team are on the hunt for "Rhinoceros"...is he a good guy or a villain?!?! The plot take us from London to Hamburg to Travemunde...always on run, always trying to figure out who is the bad guy. And as always...Tweed does it, his unique way of thinking, and with the help of his extremely diverse team, the good has no chance but to win...just remember...."NOBODY IS WHAT IT SEEMS".

---

**Peter Thornton says**

Utter rubbish. Colin Forbes should get out more.

---

**Denis Dennehy says**

Not for me. So unbelievable that it was not interesting.

---

**Philip Raby says**

Probably the worst book I've ever read. The dialogue is unbelievable and stilted and what planet is the author on? A character puts a motorbike in the back of his car, which he constantly refers to as his 'hatchback', and three passengers as well. People drive around in 'limos', talk in cor-blimey accents and use public telephones. Is it the 1950s still?

The plot is ridiculous and shows the author had no understanding of technology.

Utter trash, don't waste your life reading it.

---

**Marie-aimée says**

my favorite english book

---

**Paul says**

Far better than many of Forbes' more recent instalments, largely because it shows a different side of Tweed. Often vulnerable and insecure in his convictions 'Rhinoceros' shows Tweed to be ageing and flawed, surely his and his team's charmed life can't continue for very much longer?

---

**Linda Fox says**

This has to be the worst book I have ever read. Bad story, bad characterisation, terrible style. I finished it as a challenge to myself.

---

**Luke says**

50p! This cost me 50p at a second hand book sale and I want it back. I finished it in the hope that at some point the author would admit it was a joke at the expense of the public at large but to no avail. I have wasted too much energy wondering how this came to be published and should probably waste no more. I beg you not to read it.
