Don Mardak

Armageddon and the 4th Timeline Don Mardak

"Armageddon and the 4th Timeline" is a mystical fantasy with three thought-provoking themes: the war on terror and the potential of a nuclear holocaust; time travel in an attempt to alter future events; and the teaching of new-age spiritual principles that affect the way mankind coexists.

The book was a finalist in the 2012 ForeWord Reviews Book of the Year Awards.

Jacob Lyons says

This book caught my attention straight away, it literally takes the Armageddon genre which is frankly oversaturated nowadays and takes it in a completely different direction. What makes it stand out is the unique blend of disaster, science and religion.

The scary thing about this book is the fact it is so realistic. You can actually imagine something like this happening in the real world with all the unrest. This just helps to engage you even more into the plot.

I've found in the past that some sci-fi books end up getting bogged down in technical jargon and drawn out sequences, almost like the author is just satisfying their needs instead of putting the readers interests first. This certainly does not fall into that trap. I was completely engrossed from start to finish as the plot twisted one way and another throwing up countless surprises along the way.

The characters only added to my enjoyment. I found them to be believable which I feel is an underrated element in books these days. To truly engage readers authors must create characters that are relatable to. Often this is not the case but this book was an exception so credit must go to the author.

Don Mardak clearly has a talent for writing but also a passion. I can see the time and energy he has put into crafting this book and I commend it. Overall this is arguably the best book I have read all year, a fantastic tale that thoroughly entertained me. Five stars is the only rating that will do justice to this epic.

Misha Almira says

Is time travel real? Do we live in alternate or parallel realities? Is it possible or probable that we can change the future? This story shows us human potential by taking a deeper look into two worlds; the unseen spiritual realm and the tangible physical reality. We get to decide if one is more important or less than the other. Is it possible to only live in one without the other? This story guides us into a truth beyond words.

At the age of twelve, Eric meets an enlightened teacher, when he gets separated temporarily from his parents. They are on a vacation in Jerusalem. He spends only a short time with the master, while he learns insights and meditation. He has to leave, but the chance meeting changes him indefinitely.

Years later, Eric and his wife get a letter from the Tibetan master, Shimahn, requesting they visit his ashram in Tibet. He has a plan that if implemented could affect the future of mankind. They must let go of what they know and attempt to change the past, to save the future.

In the meantime, there is a mysterious ship spotted between Bermuda and Newport, Rhode Island. It is believed to be a Pirate ship, but truth is much more threatening.

It was unpredictable and clever. The author makes accurate references to stories from biblical history, and although it is fiction, world history is woven into the tale in a beautifully believable way. There are several stories happening simultaneously and are told seamlessly. This is a book I will read over and over.

Joawmeens says

"Armageddon" 't pass this book by! @badwordplay,

When I saw this book on the digital shelves of my not-local-at-all Amazon store, I looked at the cover, and thought "Oh, this is a book along the lines of a DeGrasse-Tyson, or a Sagan, that explains about the universe. After I clicked it, I realized something: You should not judge a book, based on its cover. That's a really good quote I just came up with, I should copyright it....

Anyway, while there are a lot of scientific and spiritual ideas in this "Armageddon", this book is actually a fiction book. It deals with such minuscule and totally into important things such as time travel, religion and spirituality, and the potential and danger of an all out nuclear world war. And one man trying to stop the possible end of the world. So you know, a lighthearted read...

I only make jokes about it, because I really enjoyed this book. It was refreshing to read an apocalyptic-type story that wasn't about zombies for once. Do I sound like a psychopath for saying that? What I mean to say is, whether or not you believe that a zombie outbreak could happen (and I will debate anyone on that subject), that kind of apocalyptic story seems a couple of steps removed from reality. Like, if it happened, I think people could organize enough to get the outbreak contained. But a story like this is grounded so much into reality, that it makes it a lot more engaging, and a lot more unnerving to consider the real life possibilities. Not that I'm one of those tin foil hat wearing conspiracy theorists (it's actually made out of ALUMINUM, thank you!), but it does make you consider things you probably never have before.

I think this is a very fascinating read, and a very well done fiction novel. I blew through this book, and I am curious to see where Mr. Mardak goes next!

Tanya Watt says

I'm speechless...

Armageddon and the 4th Timeline is definitely one of the best books I've ever read. I read the whole thing in one night,

I was so deep into the story I couldn't even think of stopping until I knew how Eric was going to change the circumstances that were happening to the world around him.

There is so much going on with this story I can't even begin to explain. You will meet some pretty extraordinary people, and if your anything like me, you will feel a sense of fear as you imagine the very thing happening to our world now.

My favorite character was Eric. I loved reading of his journeys and the remarkable people he saw every time he left that chair in the library.

This is a kind of book you have to experience for yourself, it will change your way of thinking and maybe

even the way you live your life.

I recommend this book to everyone!

Lifesaver155 says

This novel just defined and set a new and very high bar for what it means to be an "Armageddon" storyline. Sometimes I feel like authors that write about the end of the world like to put zombies and other creatures of the like in there and blame them for the end of times because it is easier than looking at the things that really may bring about the end of times. Well, Don Mardak did exactly the opposite in Armageddon and the 4th Timeline. He tackled the end of time with issues that really do face us as a country and planet, and used those as a basis for his thrilling and engaging novel. This novel was thought provoking like no end-of-times novel I have ever read and that was paired with incredible characters that had me rooting for them from the start. Never have I read a novel that was able to weave such a complex and captivating storyline, and yet tie it in to themes that run through our lives in reality as well. I have not been a fan of most end of the world, way out there novels, but this one changed my mind. It has relevance, and depth, and wrapped it all up in a thrilling, engaging, exciting, and incredibly well developed storyline that had me reluctant to put this book down for anything. I can not wait to read other books from this author and I highly recommend getting this novel right now and starting in on it. You will be glad you did!

Píaras Cíonnaíth says

This Truly is a Mind-Bending Story!

This is a fast-paced adventure about the war on terror and the potential nuclear holocaust that the world is now facing. Armageddon and the 4th Timeline is a mind bending tale that will take you on an extraordinary journey through time and space. This really is an amazing story! I haven't seen such creative expression from an author in such long a time.

This is a well crafted piece of fiction. I have no doubt that fans of this genre will love sinking their teeth into this one! The story flows from scene to scene effortlessly, and the author shows exceptional ability when it comes to storytelling.

With a mixture of New Age spiritual principles, this fascinating page turner will give the reader much to think about regarding life, spirituality and the future of the human race.

The author undoubtedly seems to have his finger on the pulse of humanity. He has an uncanny ability to express our fears in this absolutely mind-blowing fiction...or is it? I guess with Quantum Physics, anything is possible!

A highly recommend read! It's not that often I'm caught off guard...but this story definitely had me engaged from the beginning. It's one of those rare stories that come along that makes you want to read it non-stop until you get to the end. I'm not giving anything away here. And this, I hope, will only add to the mystery!

Karl says

Wow, what a read! The aptly named 'Armageddon' is a great book that focuses on the possible and complete annihilation of mankind at this uncertain period in time, and what we can do to avoid it. Dividing our known reality into two; the spiritual and the physical, Mardak explains that we may be able to survive within a different reality.

This book is extremely eye-opening and will make you think. A lot! With quantum physics and religion, this book really has to be read with an open mind. It is seriously bridging the gap between fiction and reality and takes a good hard look at the future of mankind! The story is very, very clever and extremely well plotted; I'd even go as far as to say that it is close to perfect!

I highly recommend this work of genius not just to fans of this genre, but anyone who fancies a good, mind-blowing read. I will most certainly be looking out for 'the Don' again! *****

Sue says

Wow, this book was something else! And I mean that in the best way possible! I'm still reeling from it. When a book has me thinking about it well after I've finished it, I know I've got a keeper.

It was a perfect blend of sci-fi, action thriller and New Age spirituality.

From the start it was gripping and thrilling, with the fate of the world hanging in the balance. Real world threats added a sense of "Whoah, this could really happen!" that heightened the suspense and tension. Add the totally believable theories and rationale behind the time travel and the profound life principles and Wow.

Yeah, as you can see, I really loved this book.

There were many intriguing and credible characters with action taking place throughout multiple locations around the world. The story was wove in a way that really had me reading up late into the night.

Definitely recommended if you want something that will vastly entertain and expand your mind!

Kevin Lintner says

"Armageddon and the 4th Timeline" is an amazingly good read. Even though it is heavily influenced by Mr. Mardak's studies in Christian mysticism, there is enough action and suspense to keep anyone reading from start to finish. Don Mardak is a masterful storyteller who goes out of his way to enlighten readers with his lessons in spirituality while still entertaining them as well. The author meshes together science and military thrills in an end of the world scenario that is just heads and tails above any other Armageddon fiction that I have read. The characters in the book are very well developed and are very believable. None of them seem like just paper people. They all have a place in the book and their dialogue is natural and not forced or fake. This is one of those books that I thought I would never finish and then before I know it I was done and was

wanting more.

Chenelle says

This book is an excellent and unique concept which I have never read before. In all honesty the book kept me at the edge of my chair the whole time. The twists and turns of the plot are what made it so amazing to me. The characters were flawlessly conceptualized. What I loved most about the book is how alive the characters became to me like I was in another zone. I loved the vivid descriptions and I can just imagine all the things Mardak created in his own little world becoming real. This book truly opened up my eyes to spiritual things I could have never imagined.

The plot had a very good outline and I loved how it tackled head on the issues that plague us in the world today. There is always the issue of war where there is religion and wherever there is religion it is contradicted by science. The back and forth of the plot in this book really created an interesting and thought provoking novel. It truly raised some philosophical questions that have been asked for generations. This book is a perfect read for those interested in the end of times interpretations in the world. It will also expose you to some realities you never thought existed. I found the spiritual aspect most intriguing and could easily identify with the book. In all I think that this was a Outstanding Creation.

Erik Christian says

The story of Armageddon and the 4th Timeline is extraordinary, to say the least. The book is written in a way that doesn't conform to the cookie-cutter stereotype of other Apocalyptic books, and the author has done a great job of making it stand out. I was so deep into the story I couldn't stop until I knew how Eric was going to change the circumstances that were happening to the world around him. There is so much going on with this story I can't even begin to explain. You will meet some pretty extraordinary people, and if you're anything like me, you will feel a sense of underlying doom, as you imagine the very thing happening to our world now.

All the concepts expressed in the book are unique in that they explain something perfectly that is usually disregarded as unrealistic or impossible. The author knows his craft well, and all the terms (military, religious, political, etc.) used are correct, and all his characters are unique and complete. I usually don't think about "End-of-the-world" concepts, but this book had me thinking. I look at the news differently now. I want to participate more in spiritual practices, meditate and even eat better. Thanks Don for a great book! It doesn't feel like just a book, but a new scroll of some kind.

Vinny Lee says

When asked to read the book Armageddon and the 4th Timeline by author Don Mardak and give my honest opinion, I was pleasantly surprised not to find it filled with aliens and zombies like so many other books of this genre. We humans are so quick to pass-the-buck of our own possible destruction on to something outside ourselves and out of our own control. Fortunately there are those among us like Don that see this dilemma we are in, as our own problems to solve and who also have the talent to write about it in such a way to keep it interesting as well as intensely thought provoking.

I hear people cry "Save the Planet." Like there is something outside ourselves to save it from. The planet has survived worse than the atrocities we humans commit by taking it all back and starting over. We should all be finding ways to "Save Ourselves." The planet will survive and rebuild from our human follies. The question is; will we survive the errors of our own human ways? What an arrogant and foolish species we are to think we need to be saved from anything but ourselves.

This book brings to light in a very entertaining way the errors we as an "intelligent" species are committing. They say that the mark of insanity is doing the same thing over-and-over again and expecting different results. Perhaps our insane leaders could be convinced to comprehend this thought and take it to heart when defining our fate as a species with their arrogant, short-sighted and war-mongering decisions made on our behalf. I'm sure there are a lot more "intelligent" species in our universe than ourselves. However, if they are smart enough to get here, they're smart enough to see the errors of our ways and just wait until we "do ourselves in." There will be no fight or invasion needed. The planet will welcome the newcomers with the same opportunities it gave us to get it right. I hope they do.

I really enjoyed reading this book by Don Mardak from beginning to end. The characters and story-line were well researched, thought out and presented in such a way as to appeal to a wide range of readers; providing it's read with an open mind. The mix of science "fact?" with spirituality, history and possible future outcome makes for a very intelligent read. Although I'm not prone to reading a book twice; this book will be an exception and I'll be returning to it time-and-again to pull more of the subtle nuggets of insight and wisdom from it's pages.

Holly says

"Is this the end of it, or only the beginning?"

Addictive from the first page to the last, this apocalyptic read included well formed characters, and setting that pulled me right into the adventure. I loved the variety of philosophies explored combined with alternate realities. With each new plot twist I found myself asking more questions and thinking about the book long after I had finished it. Although "science fiction" usually isn't my genre, I will definitely be reading more of Don Mardak in the future!

Janja K says

Great mystical fantasy that will encourage you to think about the science, religion, war, your life and much more!

I love to read good inspirational and mystical books and Armageddon and the 4th Timeline is definitely one of them! This is certainly not an ordinary story, far from it.

Armageddon and the 4th Timeline is a mystical fantasy, which contains many various elements and symbols of a great book that draws you into it: spirituality, mysticism, science, quantum physics, God, apocalypse, politics, war, end of the world, interplay of fiction and reality and even time travel! It definitely will not leave you indifferent.

The book is really well written and great to read - it has great, extraordinary characters and many surprises. The story jumps back and forth between the various events, times and places, which makes reading even more interesting. The book will encourage you to think not only about the war on terror and other events that are happening around the world, but also about the spiritual principles and finding the truth in your life.

I definitely recommend it!

Oscar says

Having purchased this on a day off whilst at home I decided there was no better time to start reading. Several hours passed before I even looked up again as I immersed myself in the story. Rarely do books like this come along, so in-depth and brilliantly crafted with underlying messages and examinations of the real world.

In a genre flooded with similar sounding books this one rises above the rest. It's not your typical Armageddon story, sure there is plenty of adventure and action but its multi layered. There are religious elements, physics related content and most interestingly of all, an examination of the sometimes self-destructive motives and actions of humans. Maybe the reason this book had such a thought provoking effect on me is because you can actually imagine similar events unfolding in real life.

Even with all these different strands the plot itself is fast paced and each page flows. I was worried that the story may suffer due to the underlying messages the book has but that moment never came. From start to finish I was completely compelled. The characters are well rounded and their actions were realistic considering the surreal environment they inhabit.

To summarize I have to say that I'm very impressed. Managing to create such an in-depth book is no easy task, very few could pull it off but the author, Don Mardak, manages too without sacrificing any of the action and suspense. This is a truly brilliant book that will last long in the memory of any readers.
