This We'll Defend: The Weapons and Equipment of the US Army Russell Phillips

The U.S. Army is the best-equipped force in military history, from the simple bayonet to multi-million-dollar technological marvels like the M1 Abrams tank and Apache Longbow helicopter.

This We'll Defend outlines the most important weapons and equipment the Army currently uses. All facts, figures and images in this ebook are direct from publicly available Army sources, edited and annotated to form a short, easy-to-use but comprehensive reference.

Included:

Tracked Vehicles

Individual and Crew Served Weapons

Aircraft

Air Defence Artillery

Anti-Armour Weapons

Indirect Fire Systems

Nuclear, Biological and Chemical (NBC) Defence Equipment

Wheeled Vehicles

Logan Gambill says

Has good info

It is a good book and personally I like the stryker it has good equipment you will like this book

Lee says

It seems to be a well researched book about the u.s. general. Equipment used by the allies.....it could have gone futher with experimental and hi-tech munitions i.e. drones and rockets

It was a good basic inventory of conventional arms and vehicles...I wish it had gone a bit more in depth with anti-missle seeking rockets and drones currently being developed

Mike Lannom says

Pretty much on target

It is all current equipment so nothing special.

I'm surprised it didn't tell what type of fuel the M1A1 Abrams used gas or diesel?
