For all the horrific darkness that has befallen me these past forty-eight hours, there was one beacon of light and it shined on me of all places, amid the intimacy of a dream.

I love stories that are focused around vampires and I find them to be very interesting. Vampires make such great and interesting main characters and I love reading stories that are focused around them. I actually loved the setting of this book as it is set in Boston. I thought that the author did a great job of describing the city and making it sound so beautiful! The book focuses around the main character of a human girl named Zoe and a vampire named Alex. I loved the romance between the characters and I thought that it was well put together. It was such a romantic book with such a beautiful story line. I love romantic stories and this one delivered!

Nice new take on a vampire love story. New elements I haven't seen in other stories.

A fun, quick read about a love story which started as a dream. I thoroughly enjoyed it and definitely kept reading until I was done (luckily it was short so I made it through quickly).

I really liked this novella. The dream and the journaling angle was clever, however I wish it was longer with

more emphasis on their feelings throughout the story between the two main characters. I love a good romance and this has the potential of blossoming; we just didn't get to experience it all the way through. A build up of anticipation would have really made the story pop. All in all though, really a good story and worth the read. In all fairness, I am clarifying my review. I know this is a short story, therefore, all the details would not be there. It did get my attention. It was so good I wanted more.

It was.... not what I expected... I admit I thought it would be better. Especially seeing all the positive reviews and ratings. I would have very much liked to give it 3 stars at least, but I just couldn't.

More like a 4.5. I really liked it. Short and different. Some of the story is told in flashbacks, where Zoe reads her journal entries.

Alexander is a vampire who spends his nights preventing crimes from taking place. On one such night, he makes it there a little late resulting in two deaths, and one survivor, a young girl, Zoe. Immediately afterward he leaves her but can't stop worrying about her. So he decides to meet her in her dream the next night(?). They communicate in this way for the next 6 years. Zoe writes about her dreams that include Alexander in her journal, wishing that he was real. Alexander falls in love with her and at the end of these 6 years, decides to reveal the truth about him but upon reaching Zoe, he hears happy and yet sad news, causing him to leave her for the next 5 years.

In the present time, 5 years later, Zoe finds her journals and reads them over. These are the flashbacks that let us know more about their 6 years meeting together in her dreams. This leads to a sweet ending.

I gave this story a 4.5 because it could have used a little more of the present time and less of the flashbacks. I would have loved an even longer version of it. It's very nicely written. I did get a little distracted by all the italicizing at the end. The journal entries are shown in italics and so is the rest of the story after that. Overall, loved it. It was sweet
