But leaving Audrey behind, to become the lone pawn in a dangerous conspiracy, was not an option. For being with her made Brian remember what it felt like to be human, and alive. SDDU #4

4 1/2 Stars! ~ Audrey travels to Malaysia with her sister so that she may adopt a child. While she deals with the legal work, her sister takes a sightseeing trip to Borneo. The tour group is ambushed by Malaysian guerilla's and all are taken hostage, the money raised will pay for their over throw of the government. Audrey raises the ransom for her sister, and she too is taken hostage by a different group. Brian's career with the SDDU began four years ago, and one his first mission into Malaysia he was captured by the guerrillas. For four years he experienced torture and deprivation, to the point he was uncertain if he'd every be able to function in the real world again. He was plotting his escape when his captors brought Audrey to camp. He couldn't leave her behind and suddenly his instincts as an SDDU agent overcame his instincts of personal survival.

If you like action, adventure and romance; this one won't disappoint you. Together they battle their way to rescue Audrey's sister and the other hostages. Along the way, Brain finds himself wishing to be the man he used to be. Audrey's acceptance of Brian as the man he is now, helps heal his nearly broken spirit. I found this book to be incredibly well written. Not only for the great action, but for the depth of emotion.

SDDU = Special Designation Defense Unit; an elite group compiled of agents from all the US agencies; CIA, FBI, SEALS, Special Forces; the best of the best.

This was an above average Harlequin Intrigue chasing through the jungle. Really liked both characters and all the action!

It was ok I guess. I was kind of hoping for a pregnancy in the end to make it truly fantasy, but I guess the coldness to death and necessity is going to have to be close enough

Once in awhile I come across a Harlequin that is different; a story that has an interesting plot and engaging characters. CAMOUFLAGE HEART by Dana Marton is one such book. What would happen to a prisoner of four years that lived under horrific conditions and finally found a way to break out only to come up against a roadblock because of his nature?

Brian Welkins was just that man. He was held captive in a Malaysian prison, given up for dead. Just when he

is trying to escape again (there have been other unsuccessful tries) the guerrillas snag Audrey Benedict. Brian's honor comes into play, should he try to save them both when fruition is bleak at best? His answer is yes. From there on the narrative grips you, the reader, so be prepared to devote some quiet time so you can complete the book. You won't want to put it down once you start.

Is it a bit far-fetched? Of course, but it still has many realistic elements that keep you going. Both Brian and Audrey are smart and act like adults should. The hero is an alpha male but he's not overly dominant. He's been damaged both physically and mentally for a long time and it shows. Our heroine has smarts; she is both complex and able-bodied. Still, she is in unfamiliar territory and knows when to accede to Brian. Given the less than ideal setting, Ms. Marton could have her come across as whiny or immature but that was not the case. At 251 pages the book makes for a fast read and I think you will enjoy it. Here's one for the KEEPER shelf.
