Random, but interesting and funny.

I recently finished this book. It takes place in the future, when Earth's population is dwindling and the main character is the one to save the planet (guided by the alien that created Earth.) It's hard to sum it up just like that, but it's a great combination of imaginative thinking, sci-fi, and young adult.

Great book! I really enjoyed this because It was super quirky, totally unexpected and just something completely different. It has roots in the science fiction and dystopian genres aswell as some fantasy :)

Would recommend to anyone who is willing to give something a little different a go :)

Loved this book, could not stop reading and had me waiting for the next book. a cult classic that should be made in to a movie, just as good as "The Hitchhikers Guide to the Galaxy".

I first read this book a long time ago (I was roughly about 11). I saw the book at my local library and liked the cover, so I checked it out and began reading without knowing what it was about. This had to have been my first book that I found genuinely funny, at that age my interests in literature wise was mostly Goosebumps and Horrible History books, so this was pleasant change and surprise for me.

I was hooked on the book from the first day I started to read it, I found the plot very interesting and characters very colourful. My favourite character at the time was Ethel, the whole idea of a chicken as one of the central characters was absurdly hilarious to me.

After reading the book I returned it the library and eventually forgot all about. But 5 years ago I came across this book while on Amazon looking for something nostalgic to read. I had to buy it and enjoyed reading it the second time almost as much as the first. This book will always remind of being young during that period of my life, for that nothing less than 5 stars will suffice.
