Slade Laurann Dohner

Book 2 in the New Species series. The books can be read as stand-alone stories, but it is advisable to read them in order to get the most enjoyment from the series.

Dr. Trisha Norbit is flat on her back in a hospital bed, pinned under a really big New Species male. Though drugged out of his mind, he promises her ecstasy and is determined to deliver—but hospital staff intervenes. 215 is a man Trisha will never forget. But, when she meets him again at Homeland...he doesn't even remember her!

The nosy new doctor wants to know all about the breeding habits between humans and Species. Slade proposes a hands-on education but she's not interested in a one-night stand. He can't offer more because he's haunted by the memory of a woman he once tried to claim. He's shocked when he realizes they are one and the same. He's blown it—she'll never give him a chance now.

But, when her life is in danger, he's the only one who can save her. As they flee through the wilderness, their desire ignites and cannot be denied. Hot sex, on the run, has consequences that are even more dangerous and will change their lives forever.

Reader Advisory: There is a scene of an attempted rape.

Este es el segundo libro de la serie New Species y cuenta con la historia de Slade y Trisha personajes secundarios del primer libro.

Slade y Trisha se conocieron un año antes cuando él es traslado a la unidad de urgencias donde ella trabajaba como doctora en una de las revisiones él ataca a Trisha pero no para hacerle daño él quiere tener sexo y le promete que ver las estrellas de placer ya saben no? Esas cosas que los hombres prometen y prometen, el asunto es que él está bajo la influencia de los fármacos que le han sido suministrados y antes que acabe cumpliendo su promesa el personal lo detiene.

En la actualidad él no la reconoce y eso le molesta a Trisha porque en ningún momento ha dejado de pensar en él.

La historia en sí me gustó un poquito más que la anterior pero Slade no, muchas veces me molestó su actitud y lo grosero y ofensivo que era con Trisha, en cuanto a la pareja anterior me gustó más era tierna y muy dulce.

La serie todavía no me ha enganchado totalmente le voy a seguir quiero leer el libro de Valiant.

Slade is book two in Laurann Dohner’s New Species series. If the first book hadn’t convinced me just how kick ass this series is, this second installment would have done it. **DAMN!**

Dr. Trish Norbitt and Slade meet when Slade is first rescued from Mercile Industries. She is one of the doctors on call when he is brought into the hospital. The sexy encounter leaves them both reeling and stays with them long after that fateful night. They see each other once again when Trisha takes on a position at Homeland, the main base where the New Species are residing and starting over. Trisha is quickly disappointed when she discovers that Slade does not remember her from the hospital. Instead he is a crude jerk who likes to goad her with his rude comments and inappropriate proposals. When Slade discovers exactly who Trisha is he becomes determined to redeem himself. He is a man on a mission. A trip away from Homeland puts Slade and Trisha in grave danger and also makes Slade realize just how much he has to lose if he is unable to protect the woman he has claimed as his. Volatile human protestors, danger, being on the run, one virile New Species male and the woman he has claimed all make this one heck of a read!

I think that Ms. Dohner is on a mission to obliterate any and all ovaries when it comes to this series. These books are **H.A.W.T.** and this installment was no different. These New Species boys and their randy ways are all about mounting and, let me tell you, they can get the job done. Phew!

I am not sure I need to elaborate any further; however, just in case some of you require further clarification....

Need I say more?

All in all, *Slade* simply solidified the fact that I am now a huge fan of this series and can't seem to read these books fast enough. Valiant is up next and after meeting him in this book I am so excited to meet the woman who will bring him to his knees.

Mona says

He would have gone days without food or water just to know her body.

Slade, the second book in the New Species series, features Dr Trisha Norbit and Slade, an NSO officer. They meet at the hospital, right after the New Species are freed from Mercile industries. An intimate meeting experienced like no other, stays with the two long after their separation. Seeking a way to learn more on New Species, Trisha applies and accepts a job at Homeland, where New Species currently live. With the memory of her encounter with Slade always haunting her, Trisha is surprised and disappointed to find Slade doesn't remember her from the hospital.

Slade previously known as 215, can't forget the sexy redhead he woke up to at the hospital. She haunts him on a nightly basis with thoughts of their encounter and fantasies of finding her again. He makes a fool of himself by acting like an ass towards Trisha with his crude come-ons and rude comments. Seeking a way to redeem himself, Slade works to seduce Trisha and to retrain his intense need for her by giving her what she deserves. Only not all plans are followed through when planned by a horny New Species male, with the

female of his dreams ready for the taking.

These two are intimate in the least expected places and at the most inconvenient times. But...its still sexy as hell. Especially all the dirty talk growled by Slade *sigh*

"Bend over for me, Trisha. I'm going to fuck you the way I've wanted to since I saw you."

I'm usually all for a romantic setting, on a bed cuddling, but with these New Species males and their love for '**mounting**', mate I've found my new preference there.

Trisha, a doctor at Homeland, wanted Slade from the moment he touched her. A trip out of Homeland brings Trisha and Slade to great danger, with the two fighting for survival. Dependent on Slade, Trisha forms a close bond with her protector. But will all be the same between them after they return to Homeland? Will her feelings be shared by Slade, or will all be forgotten? Well, go read it to find out people!!

Suspenseful, heart stopping read, that's full of surprises that **shocked** and pleased me extremely. But even saying that, I will admit to loving Fury, book one in this series more. It just didn't hit the "OMG I love this book" mark for me. From the relationship formed, to Slade's thick-headedness, at times I was left a tad disappointed.

I will definatly be continuing this fantastic series and recommend it HIGHLY to all my PNR lover mates, who love a bit of animal in their men xx

My New Species Reviews:

Fury (New Species #1)

Karla says

3 Stars! In my humble opinion, not as good as the first!

I'm in the minority, I didn't care for this one as much as the first book in the series, where everyone seems to be of the opposite opinion. Slade got on my nerves, his sense of humor rubbed me the wrong way and it got old. I felt like I was watching a bad comedy routine. It didn't care for the first half of the book, and I came close to setting it aside, but the second half was much better, and eventually Slade won me over.

Vanessa Chambers rocked the narration again.

Vintage says

Woof.

Review

Well, 2 out of 3 ain't bad to quote Meat Loaf.

This "New Species" book did not do it for me at all, and it's all due to the hero.

Apparently, since being released from wherever, Slade has been reading Harlequin Presents on the sly as he is channeling Greek/Spanish/Italian/Sicilian tycoon behavior with slut-shaming, abandoning her after ONS, running after ONS, martyrdom, protecting the heroine by hurting the heroine, assuming the h is a slut on the basis of such meaningful actions like who she's standing next to, accusing her of infidelity and mind-numbing guilt among other things. Toss in his magic penis which excuses him of the necessary grovel, and HP H.

The h is okay, but another blonde?

Sidenote:

What a bummer that New Species guys can detect when you've had sex! Awkward. It's going to be interesting when their little New Species daughters start dating, and the uber-alpha, over protective instincts go into overdrive.

On to .

Maida»-(`v`)-» says

RATING: 1.5-2 Just Meh Hearts.

Well, the rating kind of speaks for itself. I really enjoyed the first one in this series, and for all the right reasons too. *Slade*, in comparison, did not gain any brownie points from me. I'll make this simple, since this entire series is a guilty-pleasure venture for me.

What I Liked:

1) Dr. Trisha Norbit. It seems the women in this series are just plain old awesome, and full of snark and **backbone**. No clueless, dumb, or naive women in here, and lets just say, that goes a long way in making me one happy reader. So, for putting up with Slade's stupidness and for her great personality, Trisha gets a full star.

2) The concept. Again, I can't help but be drawn to the concept of this series. The animal/human fusion is

interesting, and different. I'm always craving different, so this is my wish come true. Applause for that Laurann Dohner. And I have no doubt, this aspect of the series will keep getting better and better. Hopefully. :P

3) Secondary characters. There are so many potential new men being introduced and I am beyond excited for some of there stories, especially Brass, Justice, Tiger, Moon, Harley and Smiley's. They are such a great, humorous bunch, and I can't wait for them to find their own mates.

And, that's about where all the good ends, unfortunately.

What I didn't Like:

1) Slade. This guy I could not warm up to. He's an asshole in the worst way possible. He thinks he's funny (you are not, I assure you!), and he is just annoying. Did I mention he is rude? Well he is. I did not like his character, and the way he treated Trisha for most of the book, didn't sit well with me. He left her, and then when something major happens, he was beyond rude to her, blamed her without even asking questions. Idiot. Then all of a sudden at the end he loves her and wants her after everything clears up. Umm...how about no? There was nothing redeemable about him. I was angry at Trisha for taking him back...but...a story's gotta have its HEA, right?

2) The ending. Wait...what ending?? There is none. A sudden clearing up of a situation, and cliff drop. The book just ends. I actually was not expecting that. Simply, it was just a bad "ending", there was no lead up to it. I can't describe it any better way than that. Not my thing.

3) The plot. I actually did not like the storyline in this. Its so generic and it kind of felt pointless, in my opinion. Majority of the book is Trisha and Slade being on the run from the bad guys in the freakin woods until they can be rescued?? Are you kidding me? You'd think a big, strong beast-man could out run humans, but apparently not. *eye-rolls* By the time it actually kind of got interesting and worth reading, I was past the point of being generous.

Overall, not my favourite of the series, but I am hoping Valiant will redeem itself.

I am totally enjoying this series!!!

Doc Trish and Slade are one of my favorite couples in this series. They find themselves in a survival situation in the woods while being hunted by hate group fanatics. There is quite of bit of violence, and lots of action in this book. Oh and the sex is Amazing!!

Trish and Slade are so funny together. They joke and pick on each other and really make me laugh. I enjoy their hummor. Loved this book and look forward to more from this series!

SLADE & TRISHA

Slade, Slade... deep sigh

"Are you still interested in learning something about the breeding process between our two species?"

The worst line he could find to make a pass at Trisha.

But he is so cute and funny. Especially, when he was promising one thing to himself and in the end he was doing the exact opposite.

The forest scene was pretty hot.

My second favourite NS after Fury.

Barbara? says

Another reread. I forgot how annoying Slade is. He's kind of an asshole really.

Jo ★The Book Sloth★ says

This book was at the same time better and worse than the first one.

The baddies

1)The sex. Yes this is erotica so it wasn't the sex as a whole that I found disturbing, it was the sex-on-the-dirt-without-nearby-shower that I had a problem with, especially since they were running for their lives

through a forest the whole day. I mean sweat, germs, they don't even have water to drink let alone clean up. I mean Eww...

2)The first half of the book was kind of boring. Thank god the book wasn't bigger because I believe I would have dropped it before the fun stuff.

3)I failed to see the relationship development. I know that for the New Species guys love is at first sight(or at least obsession is) but I would like to see a more satisfying love story!

The goodies

1)The second half of the book more than made up for the first! It was exciting and it had twists you wouldn't expect and ACTION!

2)Moon, Harley, Brass! The New Species guys Trisha befriended were just AWESOME! I loved all three of them(maybe Moon a little more than the others).

3)Valiant! I already look forward to reading his book! Hope it isn't a dissapointment.*fingers crossed*

If I based my rating in the first half of the book it would be a 2 if I felt really generous but since the book had the second half too I will give it **3 stars.:**)

Jilly says

Comparing this book to the first one is like comparing carob to chocolate. Sure, carob looks and smells like chocolate, but it doesn't taste even half as good.

That is a cruel trick, mom!

The New Species world is really cool. We have these science experiment people who are half animal/half human trying to simply exist. They aren't trying to mess with the humans, interact with them much, take their jobs, or hurt anyone. They have their own compounds to live in even. So, what's the problem?

The problem is that anything new and different = fear.

Fear = anger

Anger = kill them all!!!

As far as the back-woods dumbass hillybilly hunter boys are concerned, it's open season on New Species. They want to get them some of those there animal heads to mount on their walls. Cuz, there's nothing classier than a room full of animal corpses.

So, in the last book we met Trisha, the human doctor for the New Species, and Slade, one of the New Species police officers. She was very smart and cool, and he was a little bit of a jerk. So, it shouldn't have surprised me that he was a much bigger jerk in this book. And, he was! He jerked it up, baby!!

They are traveling together to a location that the leader is looking at to buy more land for their people. But, word gets through to a hate group and they are run off the road in the mountains and then it's redneck hunting time! Git yur guns, boys! So, Trisha and Slade are running through the woods, trying to not get killed.

So, being the gentleman that he is, Slade informs Trisha that she can lay close to him that night to stay warm only if she gives him a handy. Really? That's our hero?

"Want to keep warm, Doc?.... either rub me or move away."

"Release my hand."

He didn't. He moved it against him.

I don't know about you, but I think this is pretty rapey behavior. He pulled that crap on me and I'd put his balls in a vice grip until he cried like a girl. But, of course, she ends up having sex with him in the dirt. After running for their lives and peeing in the woods all day without food or water. Romantic!

That was my problem with the book. Slade was all "I love her, I'd do anything for her" in his thoughts, but he was rude, crude, and abusive in his language towards her. I just couldn't like this guy. He is on my I-wish-I-could-kill-this-book-character list. I'm tempted to join one of the hate groups that is trying to hunt him. I can buy some camo. I can learn to spit and scratch myself.

There are good parts of this book, too, though. Trisha has three guards that have become her best buddies and they are fun and hilarious. Harley was my favorite. He was constantly cracking jokes.

"A friend? I thought we could elope to Vegas and have Elvis marry us."

...He lifted up the material on his arm. "I had a spot picked out here to have your name tattooed on me and I thought I could have my name tattooed across your ass. That way I could actually say I owned your ass."

The other two guys, Brass and Moon were also really funny. They provided the personality that I wish Slade had.

Oh well. On to the next book, but I'm nervous because the guy it's about was a huge alpha in this one. Maybe he'll be nice and sweet in the next one..... it's possible...

Alp says

Not what I expected... It wasn't bad but wasn't amazing either. The first half of the book was so boring that I almost DNF'd. Slade and Trisha kept running away and hiding from the bad guys who came to hunt them down in the woods. They were in the woods half the book! And there was almost no story here! Slade had repeatedly ticked me off when he kept giving her hot and cold treatment. I don't understand what was wrong with him that he kept calling her Doc. Yes, she's a doctor but she has her name, and her name is Trisha. Jerk!

The second half was much better. There was drama about Trisha's pregnancy that helped pull me out of my bad mood. Thankfully, Slade could redeem himself in the last quarter of the book, otherwise you might see me ranting on about him much more than this!

And about the heroine, Trisha, there was not much depth to her character. I knew she's a doctor, graduated from medical school at a very young age, and that's it. There was no mention of her personality or background so I felt like I couldn't connect with her (as a character).

I found the story was overly long and the sex scenes weren't appealing enough to hold my attention. I skimmed through some of them just to finish the book. The best thing about this book is Brass. He is very funny and caring. He really should be a hero!

However, I liked the second half and it was nice enough to make me want to continue this series. And that was the reason why I gave it 3 stars.

Slade snorted. “Women.” “Men.” “Smartass.” “Dumbass.”

When I read a shifter book I expect a fated soul mate kind of love. That bam! your are mine and I knew it the minute we met kinda thing. The I am never going to let you go thing . I got that kind of love in the first book with Fury and was looking forward to some more in this book, but what I got was Slade!

“You’re mine, Doc. I’d fight anyone to get you back and I’ll kill any man who touches you.”

Slade:

I didn't like Slade . He annoyed the shit outta me! he was wishy washy, jerky and kind of a chicken in this book . I thought he would get better in the book, but by the time he comes around I already didn't like him and he didn't do anything redeeming to make me soften to him. I didn't hate him he wasn't such a asshole that I couldn't stand him or anything , he was kinda like the little boy in 3rd grade that pulls your hair and flings mud at you because he likes you, and he never grows up! Then at towards the end he just sees the light and loves her, is never letting her go and all is good. I don't think so! He also called her sweet thing all the time making me picture him in my head like this

This is my impersonation of Slade.

"I love you and I will be with you forever and I will fight anyone to keep you safe and get you back your mine!" " Sike!!!! Ha I was just jokin I'm out bitch see ya. " " Okay wait a minute I think I do want you after all. Yes , yes I do! Your mine again!!!!"

“Bend over for me, Trisha. I’m going to fuck you the way I’ve wanted to since I saw you. I’m going to drive so deep into that wet little sheath of yours until you don’t know where I end and you begin. I bet you’re going to be so tight that you fist around my dick and I have to fight to move inside you.”

“I missed you,” he breathed against her skin. “I won’t ever leave you again. Ever, Trisha. I’d rather

die than be away from you. I swear to protect you with my life and I won't mess up again. I learned how much you mean to me."

Trisha:

"Make me forget. Please? I want you."

Damn I loved Trisha, she totally made this book for me! She made up for what Slade lacked and she is the reason the book got 3.5 stars instead of 2! She was Brave, smart and Sassy. She fought for what she believed in and even in the face of death and rape she was brave and strong. I love that she didn't hold back and just told you what she thought! I don't think I would change a thing about her!

"I'd rather die. Just kill me!" she screamed at him. **"You're a fucking loser. You're nothing but a fucking asshole rapest."** She hoped he'd snap and kill her. **She'd rather die than live through him touching her. "And that's fucking pathetic by the way. I'm a doctor and I've seen a lot of them,"** she taunted him. **"Pathetic!"** she screamed.

"You mean 'bastard', don't you? Go to hell, Slade. Yes, the baby is yours in the biological way. In every other sense the baby is mine and mine alone. Don't worry though. In the last weeks I've learned exactly what to expect from you so stay away from me just the way you have been. I waited a week for you to call or come see me. When you didn't I was even hopeful for another week. Then you took this job and didn't even have the decency to tell me you were leaving. You just left. I hate you for that, I really do, and I will never forgive you. You lied to me and you just blew me off. Well, I can do that too. Leave me alone and stop beating up my friends, because they actually care about me." She took a ragged breath, fighting the urge to cry. **"They don't make me cry. They don't abandon me or break my heart."**

"I love being inside you." Trisha turned her head against his chest. **"I love you being there. Wow, Slade. Just wow."**

Even with Slade being a immature asshat for a good part of the book. It was still a pretty good read. There wasn't enough romance, but the sex was hott, and the friendships between Trisha, Brass, Moon, and Harley was too cute, and of course there is the baby. I am a sucker for babies!!!!

Here is my favorite moment in the book:

"Oh God," she moaned.
His mouth withdrew from her sensitive flesh. "I told you I was going to kiss you."
"I thought you'd aim for my mouth."

He tilted his head, regarding her. "Do you want me to stop? I have to admit I don't want to. I've been dying to taste every inch of you. Don't deny me, sweet thing."

"Do you want to die? That's what will happen if you do stop. Please continue."

GIVE IT TO ME, SLADE. I'M WORTH IT.

He gave it to me, alright, but I was nowhere near impressed.

To start off, this is the second installment of New Species where it has showcased Slade and the nosy Doctor "Doc" Trisha Norbit.

Their first encounter was a sizzle and it got me REALLY excited, however as I continued on, my excitement and focus wavered.

So did I like their story?

I am a big fan of teasing and Slade was a big tease. But I HATED IT! I detested him. He was crude and a jackass.

The words that came out of his mouth were just wrong.

I imagined his mouth sewn shut like this

And I'll be like

But of course that didn't happen in the story.

TSK!

So, the story grabbed me then?

On two occasions only.

1. Slade and Trisha's survival scenes. The action was great and the author injected small doses of violence. Both have satisfied me right to my core.
2. Valiant. This big hunk floats my boat. I WANT TO GET TO KNOW HIM. I WANT TO KNOW WHAT TICKLE HIS PICKLE.

So, would I give this a higher rating?

(Coz) Apart from Slade being an asshat and his untimely innuendos, banter between the New Species and Trisha didn't sit well with me. It was annoyingly silly (ESP poking a tongue out - really? TSK!) and didn't fit the characters.

Also, their names! Their. Names. Should. Be. Changed. Into.

I do hope Valiant won't disappoint.

Slade at the beginning of the story:

Slade after the accident:

Slade when he lost it:

I had an amazing time with this hot, adventurous and decidedly entertaining story. Slade began as a cocky, sexy deviant but that changed after the accident mostly because he had to protect Trisha!

Trisha was a great heroine, very put-together and absolutely in love with Slade.

The story used the same narrative style as the first one: past-huge thing happening-slow built-up,-semi huge thing happening-great ending.

I was totally fine with it and it was very nicely handled. The writing seemed more tight and the on-going plot thickens significantly.

The main story helped the background plotline to flourish and become sturdier than in Fury, it was also pretty funny on so many occasions and with a few exciting twists and some new very likeable characters. Oh and i forgot the incredible surprise around the middle that really transform the future of the N.S.O. for good.

All in all, a great story, a unique series and a great example of the pretty incredible writing skills this author has. I recommend it of course!

## THOUGHTS ABOUT THE BOOK

- I liked Slade a lot more on the first half of the story towards the end he seemed a little distant.
- Moon, Harley and Brass were exquisite..i gave it 4 stars absolutely for their sake.. no i'm kidding, but they are a great reason to do so.
- I liked Trisha.
- I will read the next book.
- The last chapter is so funny with Valliant and the deer.. I can't even..
- We saw some glimpses of Fury and Ellie too.. AWW!
- The sex was out of this world.

Me having fun, while reading this book!!

As I mentioned in my review of the 1st book in the series <https://www.goodreads.com/book/show/1...> , I was a bit apprehensive continuing reading the next book. Fury reminded me a lot of Lora Leigh's Breed Series, but I decided to read the next story and I was, despite the similarities, quite impressed.

I did enjoy Slade's story more than Fury.

Slade is part human/canine...gorgeous, naturally..

He falls in love with Trisha Norbitt, the Homeland (home of the new species)doctor. Soon they embark on a steamy and sizzling relationship

- they do a lot of this....geez, these new species guys are totally sexed!!! And of course, totally protective and domineering...

We get to know more about the New Species and the atrocities committed to them, we meet new characters and we get to know more about the ones we met previously and I am kind of getting "lured" into their world.

Loved the banter between Slade & Trisha and between her and the guys guarding her...some hilarious moments and some of the things Smiley & the gang said and did....funny and cute...how they learn new sayings and more about us humans!!

I think I am going to like this series..onto book #3 next!!!
