## **The Ecologic Secession** L.E. Modesitt Jr.

Spanning the human galaxy, the Empire is all-powerful, its agents everywhere, its military forces huge and technologically advanced. No human or alien forces have ever been able to stand against its power.

But now, on the planet of Accord, at the Ecolitan Institute, the seeds of change have been sown.

Jimjoy Earle Wright was the best, the smartest and the toughest secret agent in the Empire forces - until his employers decided to kill him for political reasons. But Jimjoy survived the assassination attempts and fought his way to safety on accord. And there the Ecolitan Institute won his loyalty and changed his identity. Now he is James Joyson Whaler, Ecolitan, in the middle of a war of independence against inconceivable superior forces.

Jimjoy will win or die, as his friends perish and the odds increase against him. What is the cost of victory to a hero?

This book picks up more or less exactly where the other one left off, continuing the story of Accord and the Empire. I enjoyed the book and expect that I'll pick up the sequel at some point, but it had a couple of issues that I found difficult to overcome. First, unlike some of his other works, I never felt like I understood the structures of the Empire, or Accord for that matter. As I said in my review of the previous book, it's interesting to see Modesitt's earlier takes on his typical themes, and while I don't think it was as successful as his later works, I still enjoyed it.

Recommended provisionally; don't make this your first Modesitt, but if you're exploring the back catalog, enjoy

Excellent! I love the futurist hero Jimjoy. He is an idealist to the extreme but humble and much loved. Can't wait to read the next in the series.
