**For a Few Credits More: More Stories from the Four Horsemen Universe** Chris Kennedy (Editor) , Mark Wandrey (Editor) , Tim C. Taylor , Peter Cawdron , Terry Mixon , Scott Moon , Josh Hayes , Rob Howell , more... J.R. Handley , Corey Truax ...less  
More authors. More stories. The same bestselling universe.

It's the Twenty-Second Century. Humanity has taken its first steps into the galaxy, and we've found ourselves in a vast playground of alien races, environments, and cultures. As the newest players on the universal stage, though, our position is readily apparent—we're at the bottom of the food chain.

Welcome back to the Four Horsemen universe, where only a willingness to fight and die for money separates Humans from the majority of the other races. While some of the stories inside deal with mercenaries, others introduce readers to the other guilds, organizations, and races that make up the landscape of the Four Horsemen universe, and many of them provide background information to the mainline novels. There's even a new form of life to get acquainted with and a look at alien interaction at its youngest level!

Edited by bestselling authors and universe creators Mark Wandrey and Chris Kennedy, “For a Few Credits More” includes sixteen all-new stories in the Four Horsemen universe by a variety of bestselling authors—and some you may not have heard of...yet. It’s a world where you can get anything you want. Some things, though, are only available for a few credits more!

Inside you'll find:

Foreword by David Weber  
“Butch and Sundance” by Peter Cawdron  
“Where Enemies Sit” by Rob Howell  
“Boss” by Scott Moon  
“Leverage” by Josh Hayes  
“Luck of the Draw” by JR Handley & Corey D. Truax  
“Contract Fulfilled” by Tim C. Taylor  
“Emancipation” by Mark Wandrey  
“Forbidden Science” by Terry Mixon  
“Change of Command” by Thomas A. Mays  
“A Family Tradition” by Ian J. Malone  
“Go for Bait” by T.C. Bucher  
“The Kra’daar” by Chris Winder  
“Blood of Innocents” by James Young  
“Messenger” by Nick Cole  
“Faith” by Chris Kennedy  
“Tinkerman” by Jake Bible  
“The Start of Something Beautiful” by Kacey Ezell

## **From Reader Review For a Few Credits More: More Stories from the Four Horsemen Universe for online ebook**

### **Larissa says**

What a ride! One of my favorite stories was the (sorry, Mr. Wandrey) mad-scientist antimatter story.

I love these Four Horsemen anthologies because you get a glimpse of the "regular" mercs and the kind of world that these humans are all mixed up in. I've read the first of the mainline series and these two anthologies so far. I suppose I'll bring an extra box for books to LibertyCon this year.

The major fault: No table of contents. I want a table of contents in my print book.

---

### **Brian Fromal says**

#### **Keeps you sucked in**

I haven't been exposed to the universe of the Four Horsemen before reading this book, but now I need to get cracking. It keeps you sucked in to the end and is a read you just want finish in one go. I especially liked the story of Ivan and Boudicca capturing the Minotaur Lucky.

---

### **James P. Melton says**

#### **Short Stories**

For a collection of Short Stories this was very good. It surprised me. Good writers and I enjoyed them. Good

---

### **M.L.S. Weech says**

#### **A fun collection of action packed stories**

I like that this book had something for everyone. While most of the stories center around action, there are still stories that either focus on or include solid character development.

A full, review for each story will appear on my blog in time.

---

### **Pat Patterson says**

I struggled a LOT with this book. I have loved the preceding installments in the universe, and I'm looking forward to more stories. However, my reaction to this was so off-putting that i had to ask for help to evaluate my review, just in case I was allowing some personal stuff to infect my perceptions.

I give the full review, and the back story, here:  
<http://habakkuk21.blogspot.com/2017/1...>

### **John says**

#### **Great read! Answers a lot of questions**

When you read the Four Horsemen series, you begin to wonder and think about how things in the Guild Universe fit together and why. This book does just that along with the twin book it belongs to.

---

### **Bill says**

I enjoyed all the stories; it's fun to get different POVs in the *4HU*. My favorites were *Butch and Sundance* (Cawdron), *Contract Fulfilled* (Taylor), *Emancipation* (Wandrey), *Forbidden Science* (Mixon), *Change of Command* (Mays), *A Family Tradition* (Malone), *Blood of Innocents* (Young), *Messenger* (Cole), *Faith* (Kennedy), *Tinkerman* (Bible), and *The Start of Something Beautiful* (Ezell).

### **sean luehmann says**

#### **Have fun exploring the 4 horsemen universe**

Having two books that are full of short stories , is truly a brilliant idea. It allows the authors to really flesh out the universe and introduce, new characters and ideas. Enjoy the read. It's a fun time

---

### **Tim Taylor says**

Audio is great too. For the record, I wrote one of these myself; I'm commenting on the others.

---

### **Vernon Burt says**

The Revelation Series has been slowing improving in quality as the series progresses and this collection is no exception. It still doesn't advance the greater plot seen from the complete novels, but provides an interesting snapshot of life for those not at the top of merc food chain. The best story is the last one, which put it right over on 5 stars for me.

---

### **Andy Riedel says**

**Bitesize but filling!**

Ok this is the 2nd collection of the Horsemen Universe that i have read and found it better than first. Some great stories that expand the narrative series and leave you wanting more!

Will be starting a Fistfull of Credits shortly

---

### **J.R. Handley says**

A fun collection of short stories set in the Four Horsemen Universe! In full disclosure, I wrote one of the stories in this collection but I'm rating this on the merits of the other works contained within the pages of this anthology! If you like science fiction, give this collection of unique stories that span the SF spectrum a chance!!
