Abbie says

Great for toddlers. Pages are textile.

Martha Monroe says

Making our way through the llama llama books and this is the PERFECT one for summer!

A Allen says

Would be a great addition to any child's beach bag! And it makes me miss summer

Kellee says

Trent really loves the touch and feel books right now. And we always love a llama book.

Reread often

Cara Byrne says

As one of the shorter Llama Llama books in board & touch&feel form, the story is sweet and fun. Dewdney does not emphasize water safety like other early readers set at the beach, but it's still a good book for young readers.

Asho says

This is a tactile board book with a squishy ball and other textured areas to touch as you read. My 2 1/2 year old is already a bit too old for this, and my 5-year-old definitely is, but Dewdney's Llama Llama books have enduring appeal because L insisted on taking this home when she saw it at the library, and then S wanted to hear me read it at story time, too.

Baby Eleanor says

"Sea" and "See" do not rhyme! That kills the book for me and, other than the sand castle, the touch and feel aspects leave a little to be desired.

kim says

boring, and the llama is ugly

AveryNJakeO says

Big hit with the 18 month old. Our library carries the touch-and-feel version of this book, which has some features (like mirror paper for sunglasses) that we haven't seen in other touch-and-feel books. It's a cute summer time read.

Melissa says

Nice variety of textures for El to explore, and great pictures to remind her of our summer beach trip. The mirrored sunglasses were especially cool (and extremely reflective, more than similar pages in other touch and feel books).

Christine says

I wanted to try some more Llama, Llama books with my son and the first one I came across after the Halloween one we read recently was this summer board book. I love the beach, so I'd read a beach book any time of year. Anyway, it's one of those "touch & feel" books that has different textures built into the page for babies and toddlers to explore. Well, this copy had a puffy "ball" on the front cover that my son got really mad he couldn't remove. So this one is getting snuck back to the library after only being read once because it is a futile pursuit to try and explain to a 1.5 year old why he can't play with the ball!

Rita says

Dewdney - never a disappointment!

Karin says

Cute and short touch and feel story about little llama going to the beach.

Sara (SJWonderlandz) says

This is a touch feel book, and while that is a nice edition to the Llama Llama series, something about this book doesn't read as fun as the others that we own.

I think this is the only board book that I read this whole month. Written with Dewdney's charm and rhyme and meter, Llama Llama goes to enjoy the beach in this touch-and-feel book. The touch-and-feel elements are not guided, but still make the book more interactive than an ordinary picture book. The text of the story was really quite enjoyable, simple but, well, charming.
