## **Paper Wings** Serena Toxicat

An ethereal hybrid being pines for her fiery-spirited lover and strives to grasp the last threads of the relationship they managed to weave between the earth and astral planes. Paper Wings is an epic poem of love as seen through the frustrating lens of codependency, and of beauty as viewed through a kaleidoscope of emotions taken flight.

Thank you Serena. it was a short and nice journey into the poem. I was able to empathize when I was reading line by line. simple yet classic way of writing. And the pics in between were just making me feel nice about the book. Made me read it twice.
