## Walking the Plank Hunter Ames

Just One More Step and . . . Splash, You're in Love... For hapless writer Michael Thorn, falling in love is like walking the plank-where passion moves you to the edge or anxiety freezes you where you stand. He pens a best-selling romance novel intended to win back the love of his sweetheart. While at an uneventful book signing, he disrupts the attempted kidnapping of Lacy Wells, a feisty playwright whose family holds the missing portion of a treasure map drawn on the back of an ancient Chinese scroll. A rollicking race to claim the lost map finds Michael and Lacy teaming up with freedom fighter Xaing Sun, while matching wits with a blood relative of Blackbeard, the pirate, who is conspiring with the merciless Ministry of State Security. Wild events unfolding for Michael and Lacy are dismissed as publicity stunts by the local police; the national news and FBI have them tangled up with international theft; and the tabloid paparazzi can't get enough of the celebrity couple of the summer. A beautiful assassin, tough rodeo cowboys, and a posse of old ladies add to the fun and excitement that help push Michael and Lacy closer to the map...and closer to each other; despite images from his past that are preventing Michael from taking that fateful step off the plank. As the pieces of the map come together, Lacy has one chance to prove that she read the book, took notes along the way, and learned from the man who wrote the ultimate book on love. With romance, hilarious hijinks, and utter mayhem, Walking the Plank delivers an entertaining yet deeply satisfying journey through the mysteries and loyalties of the human heart.

## **Barb Eck says**

This is a hard book to put down and when you finish you want more. Michael Thorn is an author who equates falling in love to walking the plank. He teams up with Lacy Wells, a playwright, and Xaing Sun, a freedom fighter, to find a treasure map written on the back of a Chinese scroll. The book is romance, action, adventure and laughter filled. You don't know who will be after them next or what will happen. I would recommend this book to almost every one. I'm glad I won it on a contest from Goodreads.

It was fine, came across as a farce/parody more than an adventure romance to me.  
The plot idea was good, execution didn't work for me - perhaps a bit to telling than immersing in the story.
