Shacoria says

I had to give this one a 2. I can't really give any of these comics a rating above a 2 or 3 because they are just so short. Once you start to get into the story, the comic ends. In this edition, Dexter thinks that he knows who is committing the murders in Miami, but Deb has a different suspect in mind and Dexter is second guessing himself a little bit. This one has an exciting end and I am eager to read the next installment.

Ray says

Things get slightly more interesting when an enemy from Dexter's past is related to a fresh corpse.

Jaclyn says

A good continuation to the series. Again, there isn't really any violence or gore, as with the movie or tv series. This issue didn't have much action, but it furthered the mystery plot line established in the first issue.

Steven Shinder says

For most of the issue, it seemed as if the fire on the cover was just for show, but it ended up being a reference to what happens at the end of the issue.
