Stoned Layla Frost

Once upon a time, there lived a witch. A kickass, brilliant, dope as hell witch whose magicks inspired fear and envy. Like all classic fairy tales, her story had the usual goodies.

Destiny.

Adventure.

Missing souls.

Unfathomable evil, the precarious fate of the entire universe, blah, blah, blah.

But let's get back to that witch with the awesome hair...

Fine, it's me. I'm the all-powerful witch. And, okay, maybe my story isn't a classic fairy tale. Not unless I missed the part about Little Red delivering comic books and munchies in her basket and Beauty sleeping off two-for-one margarita night. But I do have a soul mate—my very own Charming.

Except he's no prince. He's a level-headed, by the book, insanely sexy detective.

And me?

Well, I'm Stoned.

Warning: Not recommended for readers under the age of 18 thanks to a dirty talking hero, a filthy-minded heroine, and the hot magicks they create. This story starts where Styx leaves off, so although it is a new couple, it is *HIGHLY*(pun totally intended) recommended they be read in order.

Good second book, but the story continues...

Good continuation to the series, though the first book has to be read first. This story is of Juno and Stellan who are each other's other half. The ARC isn't done, but at least Juno and Stellan have found each other.

Katerina says

5 Pixie stars!!!! I love that crazy witch Juno..and Stellar that Alpha Hot Cop with his dirty mouth!! This book starts when Styx ended i recommend you read Styx first. It has humor,it's HOT,it has mystery...all the feels!! Can't wait for the next book!! P.S Levi oh Levi you sexy Satan!!!

Jenn the Readaholic says

I seriously feel like Olaf with my “oh, I love it even MORE now” feelings about this series (blame motherhood for the Disney reference there). Juno and Stellan are absolutely fabulous and are the perfect mates for each other. The Four series continues with their story...and it's a doozy.

Juno and her brother, Nate, are now united and are trying to find the other two important members of The Four, but Juno needs to figure out her own fate and soulmate-predicament first. She can't help how she's drawn to Stellan, but she's pretty sure he doesn't feel the same way toward her for a while. Luckily, she's dead wrong in her interpretation of his feelings, and he proves his love in a few big ways throughout the story. Stellan proves to be far more accepting of their fate and the truth that brings him and Juno together, and is willing to go toe-to-toe with Heaven and Hell to prove it. Of course, we have some misunderstanding and humor and drama thrown in to keep this all interesting, which only meant that I absolutely couldn't put my iPad down. I just HAD to keep reading to see what (or who) came next. Trust me, you'll feel the same way.

This story does end in a cliffhanger, BUT you should already know that from Denny and Nate's story. And if you don't, make a leap of faith and go back to the beginning so everything is clear. Now, I must practice the art of patience while I wait to see who comes next and how their story unfolds.

SansaReads says

Everything she releases is GOLD! Solid GOLD!

Every single time I think Layla Frost can't do any better or surprise me as a reader..

It should be noted that Stoned is the second book of The Four Series and you should definitely read Styx to know what is going on.

From a super unique and original plot to the amazing characterization, Stoned surpassed whatever I had in mind. This couple just may be my favorite so far. Juno & Stellan are characters that will stay with you long after you read. They complete each other in every way possible. Two complete different personalities and characters come together and form a perfect whole. I absolutely loved this couple.

I EFFING ADORED JUNO!! She was simply everything! She had such a complex character I can't even begin to tell describe it. She was witty, brilliant, funny and crazy in the best way possible. I absolutely loved her sass! **As always Layla Frost's impressive heroines remain flawless.**

The hero just as equally awes the reader. Stellan and his possessiveness and dirty talk will have you simply hooked.

Despite the story ending in a cliffhanger , just as the Styx did, it didn't take anything away from the story for me. I was beyond satisfied and will definitely be reading the next ones! Layla Frost delivered a perfect blend of everything you could hope to find in a book.

Mindy Lou's Book Review says

This author's humor kills me every time. I find her books fun to read and I always end up adoring her heroines. Stoned is another one to add to my list. I would suggest reading book one first. While this is based off a different couple, the overall story is continued. Plus you get to meet Juno and all her awesomeness in the first book as well.

The reason I think Juno is so awesome is because she's funny and quirky but also very fierce. Don't mess with anyone she cares about or she'll go all mama bear on your hinny. And how cute is it that Stellan called her his pixie?

Oh Stellan, how I wish I could call you mine. Picture a hot, slightly older man (in Juno's eyes) who goes all intense and growly. Uh, yes please. One order of hot cop coming right up! He fought it a teeny, tiny bit but it didn't take long for Stellan to realize he had no chance where Juno was concerned. That man was so gone for her it'll make you jealous.

I've mentioned this is fun, but I'll also say it's a pretty safe read. There is some violence due to the nature of

the overall plot, but no outside interference to our couple's relationship. This is a paranormal series. I won't speak too much of that in case you haven't read book one where you learn all the deets. Bring on book 3!

V. Theia says

Excuse you, Layla Frost, you absolute word wizard!! I was sucked in from word one and I don't think my feet touched the floor until I was finished. I don't want to give away the plot, it's better to go in blind. Suffice to say it's a fantastic story and continues on from book one.

I loved the humor of this book and it has epic one-liners. Plus, I got to see my book-one bae again! And Levi.. oh, Levi! When you're drawn to a secondary character you know that's some good stuff.

I want to be Juno when I grow up. I think she's one of my favorite heroines. Quirky, fun, funny and a fantastic leading lady.

Stellan was everything I wanted in a possessive, protective, growly hero. I'll be his pixie!

"It's okay, pixie, shoot me dirty looks all you want. I like it."

This is a series you're going to want to jump on board with. Trust me, it's Aaaamazing.

Gi's Spot Reviews says

5 'Their Reward' Stars

O.M.F.G!!! Just when I thought the first book, Styx, couldn't be matched in its awesomeness, here comes Ms. Frost raising up the stakes with Stoned! This dirty minded pixie and her filthy mouthed detective will ROCK YOUR WORLD!

Again I'll keep this review as non spoilerish as possible, because this series is all about the RIDE.

We met Juno, our now leading lady – she would so snort at being called that, btw – in the previous book, and could already anticipate just how rich and colorful her character was going to be. Well, she was all I was expecting and MORE!

Unless she'd broken her halo to form her horns, Juno was no angel. She was a temptress. A siren, luring me in.

And it was working. I'd take a naughty pixie over an angel any day.

Stellan, handsome and broody Alpha was the detective in charge of Juno's case, but even if he wasn't, there was no way he could stay away, when something beyond them was pushing him in the direction of the crazy, wild, comic book store owner.

I'd joke that it was a gift from the gods, but that wasn't a joke. He was literally my gift from the gods.

This story truly was outstanding, from the hilarious, LMAO moments, to the suspense and insane chemistry and connection between the main couples, I was glued, and begging for more, actually, still craving, even more and more stories from this crazy addictive universe.

One date, and I was obsessed.

I'd chase. I'd beg. She just had to tell me the rules, and I'd play her game as long as winning meant I got her.

Juno and Stellan even though apparently completely opposites to one another, couldn't have been better paired up, Fate really has a way. There was no doubt in my mind they could be anything other than true soulmates. He was the calm to her storm, and the rational and pragmatic to her crazy, two perfect halves of a whole, and I ADORED every single one of their interactions.

But they gave us beauty.

Our reward.

Layla Frost truly has an unmeasurable creative and writing talent. The way this universe was created, the complex and particular characters, the quirkiness and uncontrollable ROFL lines and scenes, and the organic feeling chemistry, transform this PNR romance in a love and suspense combo story, just as addictive as Juno's special gummy bears and cotton candy – that I was craving while reading, btw. Seriously, besides begging for Levi's story, I'll be here stalking and counting down the days for the rest of The Four! <3 <3 <3 <3 <3

“I love you, Juno,” he grunted, his thrusts growing more frenzied. “Not because you’re my mate or any of that shit. But because you’re my filthy-minded and dirty-mouthed pixie.”

“As long as I’m still breathing, and probably after, I’ll want you. Never doubt that.”

War comes in all shapes and sizes

It's kind of hard to take Death and War seriously when I'm completely distracted by cotton candy, porno comics and hot cops. I guess you could say that *Layla Frost* brings comedic elements to the end of the world. Not that Layla's not taking the end of the world seriously, it's just that it's hard to take it all as doom and gloom when you're chuckling or distracted by candy, porno and hot cops. *Stoned* takes us back to the candy store where one slightly stoned witch comes face to face with evil. This witch is NOT that upset with facing evil because low and behold, evil brings out her Prince Charming...who happen to know she's stoned AND happens to be the love of her life.

I like to go into my reads without preparation. You know, slide into the scene without knowing who, what, where and how. Well, this led to a few problems for me. Even with some slight prompting in the storyline at the beginning, I couldn't remember where we had left things. Then, I decided to re-read my review and see if that helped. Unfortunately, even with a supposedly spoilery review, it was a bloody USELESS spoiler and my review was no help to me at all. I literally had to read *Stoned* and get the *AHA, now I remember...* moments as they came. Woe is me.

So, within a few chapters, I'm back on track and know where things are heading. Juno is a witch with attitude, brightly coloured hair, and an addiction to coffee and candy. She comes across as a little wacky and totally lovable. The people closest to her, she will protect with her life. When her shop is vandalised and a drive-by-shooting puts her loved ones in danger and leaves everything in tatters, it makes her ANGRY. She may look like a cute little pixie but get on her wrong side and she'll blow your head up with a blink of her eyes. With her abilities, she is a protector. When Stellan, the sexy detective, comes into her life, it's going to be a battle as to who will step in front of the bullet first.

Stellan can't believe the mad little Pixie keeps jumping in front of stray bullets. The fact that he thinks the bullets are aimed at him because of his career, makes it even harder to watch her jump in front of him. But, there's something different about this woman who is in his thoughts 24/7. There is an EXTREME attraction. So extreme, one thought of her will make him instantly hard and desperate for her touch. No other woman has affected him this way. Nothing will stop him from being with her...and trying to protect her.

Four instead of five stars because the front-end of the story left me a little frustrated. It took me too long to get up to speed with what happened in the previous instalment. When I read these kinds on series, I'm always disappointed that we're not treated to a –

In the previous instalment...

I don't want everything retold, just enough to trigger my memories so I'm not distracted from what is going on now. I need to be fully immersed in who, where and what's new. I also struggle a little with how long it takes for the hero and heroine to be on the same page. When they do get there, they are so there, it's almost too much. I felt like I was scrambling to catch up from lusty lust thoughts to I LOVE YOU!! It was HOT mind you, just seemed to hit mushy gushy feeling a bit quickly.

Stoned was funny, quirky and HOT!! Seriously, seriously HOT HOT HOT!!! If you want to make it an even hotter experience, google the Japanese word Juno uses when the young guy comes into the store. Then, after checking it out [BLUSHING!!], head back to the story and keep reading. Oh My Lordy...I'm blushing again just thinking about it. Feeling...HOT HOT HOT!!!

Holy Shamoly, *Layla Frost* really knows how to torture her readers. I have SOOOO many unanswered

questions. Sure, she gives us a happy for now, but she also leaves us desperate for more.

I really like this series and I highly recommend giving it a go.

Carol [Goodreads Addict] says

Stoned is book two in The Four series by Layla Frost. I fell in love with the first book in this series, Styx, which was Denny and Nate's story. In it we met Juno, the crazy witch who became Denny's friend and tried to help her. I have been so looking forward to her story and it did not disappoint. This book was fun, sexy, and yes, suspenseful.

Juno Keres owns several stores merged together that she calls Novel Idea. But she is no ordinary store owner. She is a powerful witch. She is also one of "The Four," Nate's sister in a sense. The evil group, Absolve, is getting stronger, their quest for power growing. It is the job of "The Four" to defeat them. Except two of their brothers are still missing.

Each of The Four were promised that when the time was right, they would be rewarded with their mate, the person that holds the other half of their soul. Nate had found his in the first book. When Juno's stores are brutally vandalized and the police are called, she meets Detective Stellan Reddick and one touch and she knows, he's the one, her other half. Except it seems that perhaps he doesn't feel the same way! And he is her opposite. Where she is a fun loving witch, he seems like he is a by the book, buttoned up, officer of the law. Yet he wakes her lady parts up in a way she has never experienced before.

Stellan was pretty much married to his job. His last relationship had been three years ago and she gave up on him. So why was it that after one look at the pixie like store owner, he couldn't think straight. He couldn't get her off his mind. Her case was baffling, and things just weren't adding up. But it wasn't the case he was thinking about, it was her!

Things continue to go wrong for Juno, her powers are going all wonky. And it seems like someone is out to get her, or Stellan, since it always seems to happen when they are together. She is convinced she is putting Stellan in danger but he is convinced that it is his fault. They both feel like it would probably be the right thing to do to walk away. Yet neither are able to let go of what is building between them.

Once Stellan finally gives in to what he is feeling towards Juno, wow does he let go! He is all possessive and growly and jealous and oh so hot! He is one dirty talking, bad boy, police detective!

“I’d take a naughty pixie over an angel any day.”

Juno knows exactly who Stellan is to her. But as far as he knows, she’s just as human as he is. She has to tell him the truth about who and what she is. And about their mate bond. Will he still want her when he knows the truth? Or will he run for the hills?

This really was fun, sexy, and kept me on the edge of my seat. I struggled a bit picking up the thread of the previous book. I do recommend reading them in order. Even though each book is about a different couple, the story line is ongoing and just a warning, we are left hanging just a bit! So I hope Layla Frost is fast at work on the next book because I need to know what comes next.

Carvanz says

I loved everything about this story! Filled with humor, some mystery, plenty of uncertainty regarding Juno's magicks abilities, and enough steam to burn your fingerprints off where you're holding your ereader, it was one of the most enjoyable books I've read in a long while.

The meeting between Juno and Stellan was perfectly imperfect and led to so many mixed feelings within both of them. It set me up for a fun read as I watched them both struggle with what they were feeling and then yielding to it.

Juno was so sassy and feisty. With her dirty thoughts and endless humor, she pulled me in from the very beginning. I loved getting a peek at her in the before time as well as the other Four. I usually get bored with a characters inner musings but that was never the case here. I loved how she thought, planned and reacted. I especially loved how she was perfect for Stellan.

Stellan is the type of hero I absolutely adore! He wants her from the very beginning but puts up a bit of a fight that doesn't last long. And then he's ready to do whatever it takes to make her his. With his jealous, possessive tendencies rising at a single thought of another man with her and his protective instincts thrown into overdrive, he won a spot on “my favorite kind of hero” shelf.

There was never a doubt that these two were designed to be together but getting Juno to the place of trusting herself to open that door was a wonderful thing to experience. In addition to all this couple's goodness, we have past characters that helped to move the story forward as well as a few twists that I never saw coming. Oh, and let's not forget the sadistic tendencies this author has...she left this on a freaking cliffhanger! You're definitely going to need to read book 1 of the series before this, but it's just as wonderful so it won't be a hardship. And now to wait on the next installment...sigh.

So I had this entire in depth review written and then when I went to save it....*poof* Gone. Frustrating, but here is all you need to know about my feelings about this book. I. LOVED. IT. As other reviewers have mentioned, STYX really needs to be read first to fully appreciate STONED.

Layla Frost has yet to write a book that I don't adore and re-read multiple times because she has an absolute gift for writing great heroines and heroes that you just wished with every fiber of your being were real. Honestly, though, her heroines are my favorite. Juno, the heroine in STONED, is classic Layla Frost - smart, quirky, funny (so so SO funny!), I-wanna-be-her-BFF, fierce - while in addition to being a badass powerhouse witch. All while keeping her from being annoying or a caricature. Stellan, the hero, is everything I want in a hero - protective, sexy AF (do the kids still use that?) possessive, completely and blindingly enamored with his heroine. Considering all the differences between the two of them (human/non human, black&white/every rainbow shade, etc.), Stellan's stoicism and groundedness is a perfect balance for Juno's controlled chaos.

The story was well paced, interesting and had the right balance between relationship building and plot development which is impressive as this is book 2 of a series with an over-arching story. I find that a lot of interconnected series, one is sacrificed at the expense of the other. The growth of the relationship between Juno and Stellan also felt organic, which is amazing since poor Stellan had to contend with the existence of an entire paranormal world. Did I mention that this is only her second foray into PNR? As in the prior book, the handling of the PNR aspects of the book had a really unique spin on archetypes that most of us are familiar with and that I especially loved.

In short; read this book. Hell, read all her books. I did receive a complimentary copy of this book in exchange for an honest review, but I plan on buying a copy also because I need Layla Frost to keep writing. In particular, I need her to write the next freakin book in the series...like NOW.

MUST READ ALERT ???

Just finished at 1am and it was FANFUCKINGTASTIC!!! The kind of book that leaves you smiling like a loon and grateful you found her words.

This series of stories are some of the most original I have EVER read. Magicks, Mayhem and Men that make your panties go poof! Gone!

Cannot recommend them enough.

Juno & Stellan are what I love about smart romance writing. Kick ass heroine, hilarious dialogue, chemistry

to melt your kindle and just the right dash of sweet!

Trust me when I say you NEED this book!!

I received an arc of this book.

Laurie says

Once again Ms. Frost has blown my mind. Not only am I loving this overarching plot she's weaving together with angels, demons, and magicks galore, I bounced through a range of emotions including lots of hilarity and a heavy dose of sadness. Oh, and it was sexy as hell.

Juno was freaking hilarious. I never knew what was going to come out of her mouth just that it was more than likely going to be funny. And she was kickass to boot, even if she did go a little wonky there for a bit.

As for Stellan, if I wasn't happily married I'd want to pull him out of the pages and take him for a ride. He could be a complete ass but he could also be so sweet it would almost guarantee a visit from the tooth fairy. His sheer selflessness was awe inspiring. Best of all, that man was an expert at dirty talk and he proved without a doubt he could back it up. I'm still fanning myself from some of his lines.

Speaking of selflessness, there was one part that put a crack in my hard little heart. I'm not saying anything else about that other than authors can be mean bitches sometimes. And yes, I'm looking at you, Ms. Frost.

Stoned was hilarious all kinds of interesting, sexy as hell, had all the feels and kept me mesmerized from beginning to end. I just wish the ending hadn't felt so abrupt. It's good Stellan and his Pixie were in a happy place relationship wise or I'd have been one mad reader. I don't have a patient bone in my body, so I hope the next book comes quick.

Rating: 4.5 I think I Hurt Myself Laughing So Hard Stars

I enjoyed this one WAY more than I did book one. It was better paced, and I enjoyed the romance and the storyline more. I SO want Levi (Satan) to get a book of his own!

Kimberly / Love Notes Book Blog says

4-4.25 stars. This book was really good! Stoned is book two in the paranormal romance series, The Four. Stoned is Juno's story. We met Juno in Styx, as she is a witch who helped Denny and Nate and befriended

them. When bad things keep happening to Juno, including her store being blown up, she meets hot cop Stellan. They are drawn to each other and have immediate chemistry. He wants to protect her and together they work to figure out what magic is at play that wants to harm Juno.

I really enjoyed Stoned! This book started with a bang. I liked that it was paced and exciting. I adored both Juno and Stellan. Juno was bada\$\$ as she was one of the strongest witches in the world, but she was also fun and sweet. I loved Stellan too. He was strong, protective and he was smitten with Juno. Stellan was perfect and alpha in the best way. They were a really great, powerful couple with amazing chemistry and connection. I like the way the world building has developed and I wasn't confused on what was going on at all. I also enjoyed the side characters and catching back up with Denny and Nate. This book had humor, heat, excitement and magic!

Overall, this was a great read! I am enjoying this series so much and I can't wait for more from Ms. Frost!
