Miyu says

1. Oxford, Level 3
2. 4/25 14 minutes
4/30 33 minutes
5/1 93 minutes =140 minutes
3. computer, robot, Internet, mobile phone, game, virus, crime
4. Is it good that computer grow up more and more?
-Yes, computer will be more help for us in the future.
5. This book introduces the history of computer, various things using computer, incidents about computer, future and things like that. this is written with clear sentence, so I can read easily. I know computer deeply because history and incidents are concretely introduces with mentioning many persons, for example Bill Gates. It is really interesting book. By reading this book, I found that we were fortunate in using many technology. Especially, the page about future of computer is the funniest for me. when I read this page, I can imagine interesting future.

Bhakta Kishor says

In an academic context, the Association for Computing Machinery defines **IT** as "undergraduate degree programs that prepare students to meet the computer technology needs of business, government, healthcare, schools, and other kinds of organizations.© **IT** specialists assume responsibility for selecting hardware and software products appropriate for an organization, integrating those products with organizational needs and infrastructure, and installing, customizing, and maintaining those applications for the organization's computer users."

Ngân Kim says

Just a thin book but it gets through almost all the main developments in computing, from the ancient abacus to the small and powerful computer which you can put it in your pocket or wear it like a wrist watch. It also contains the stories of those who were successful or even jailed due to the dissemination of the Internet.

My favorite quote: *"It is really difficult to make predictions about the future of computing: the future is often closer than you think it is.* It is true! 50 years ago (before the Internet was born) even the most optimistic person could not affirm that just half a century later, computers would be so popular and totally change the world. Now, I can say computer is an indispensable part of human's life, at least to me. Hardly a day go by without me using my computer, haha ^^

Shiho Kawai says

-Oxford, level 3
-Time 90min.
-7 word summary: computer-phone-email-internet-viruses-smaller-information
-Discussion Questions:
1. Have you ever caused probrems like viruses in your computer?
No, I haven't. I should be careful.
2. How many times do you use your computer?
Recently, I hane used it three times a week to do my homework and check information I want.

Flavia says

According to me, at this critical time, inquire about the technologies that continue to grow, it is critical! In my opinion, the theme of technology for my interests is essential! Therefore I believe that this book is very interesting because, is important to inquire about what the technology can offer us!
