Omega Teacher's Baby

Anna Wineheart

Omega Teacher's Baby Anna Wineheart

Divorced and shamed for his infertility, Professor Dale Kinney has spent the past ten years proving his worth: by building a solid research lab in his field. With his tenure two years away, everything's finally going right... except he also has a secret.

Dale has a crush on his student—Greg Hastings. Sweet, straight-A alpha, and also the college president's son. Greg has been asking Dale out for coffee since semester began. And it's been taking all of Dale's self-control to turn him down.

Four years ago, Greg lost his best friend in a fire. At eighteen, he'd had ambitious plans: build a home, drive fast cars, live his life. At twenty-two, he's lost his courage to believe. How can he be there for an omega when he couldn't save his best friend? How can he promise anyone a future? The only things keeping him afloat—college basketball, and the cute, awkward professor in his classes, who sneaks glances at Greg when he thinks Greg isn't looking.

When Greg stumbles on Professor Kinney in heat, the spark between them explodes into an inferno. And despite countless failed attempts at pregnancy... Dale conceives. Dale refuses to abort the child. Greg refuses to abandon this omega. With the pregnancy an increasingly difficult secret to keep, will their slow-burning love cauterize their wounds, or burn them down?

Miriam says

I received an ARC edition of this book from the author.

May/December romances can be a bit of a hit or miss for me (most are a miss), but I'm really glad I gave this one a chance. I loved the chemistry between Dale and Greg. Both of them are more than just a little bit broken emotionally due to their past, and those issues don't just magically disappear because they find each other. The pregnancy may have given them an excuse to get together, but I really liked that they don't jump quite instantly into 'I love you' (it's still rather quick if you look at the timeline, but it didn't feel instant while reading the story).

I hate Greg's parents, not just his father who really is an overbearing jerk, but his mother seems to just make excuses for how Bernard treated Greg and Dale. I also wasn't a huge fan of the conflict/resolution between Greg and Dale (it works, but I just didn't think it was as good as the rest of the book). (view spoiler)

Although the characters from the first book in the series make an appearance in this book, you don't have to read it to enjoy this book.

Ricardo says

2 1/2 stars

The writing is not bad but I do have issues with the content. This is a subgenre that has so many possibilities (M/M Romance with the added MPreg Alpha/Omega variables) but so many authors continue to treat it the same as the old M/F trashy romance novels, with the supermasculine alpha hero and the dainty feminine omega heroine (in this case only changing the sex). It has gotten to the point where some of the sexual responses of females have been transposed to Omega males. When I think back, my main question is: why bother writing a M/M romance if you will treat the characters and make them act as a M/F couple? Wouldn't it be easier to just write a M/F romance?

Lissa says

I really enjoyed the first book in the series, so of course I had to download the second book in the series as soon as it was available. And...I didn't really like it.

I guess part of the problem is that this story has some tropes that I'm just not a fan of generally. The whole mpreg thing is kind of odd to me; I mean, no shame in anyone's game, but that just isn't something that I see in a book's description and think "OMG MUST READ GIMME GIMME GIMME." But, like I said, I did enjoy the first book in the series, and that had mpreg in it, so I was definitely willing to give the trope another go.

I'm also not a fan of age gap romances most of the time. There have been some that have really captivated

me, but those stories had other reasons (fantastic writing, engaging plot, amazing characters, etc), and the age gap thing just kind of faded into the background for me. Once again, I am not trying to say that this trope sucks or anyone who enjoys it should be ashamed or whatever - it just isn't something that I particularly enjoy.

There's a definite age gap here - Dale is 20 years older than Greg. Theoretically. Except he doesn't really come across that way as a character. Dale has been hurt, so I get that he's kind of sheltered himself away from the world and this might have stunted his emotional maturity a bit. I also understand that he's an omega, which affects things (more on that later). But, honestly, for being Greg's college professor (and, believe me, there is no way that you won't remember that, because Dale brings it up at least a zillion times in the story), he doesn't seem that much more mature than Greg. Twenty years is a big gap, and there's a lot of life experience in there, but it just didn't come across that way.

Anyway. Dale's been told that he's practically infertile. He was divorced because of his infertility, which is apparently a big shame in this society, and he's dedicated himself to chemistry and his professional work. But he has the hots for Greg, not only a student in his class but the college's president's son, and Greg is pursuing him something fierce. (view spoiler)

I think a lot of people who like the age gap dynamic might be a bit disappointed in this one, simply because there isn't really an emotional gap between the two characters. Also, the older character is usually portrayed as more worldly/experienced/dominant in these kinds of stories, and Dale is, well, not any of these things, really. I guess one could argue that it's trying to subvert the trope a bit or whatever, but I really don't see it that way, and that comes across more as a happy accident than anything else.

The dynamics in this world...I don't really like them. I know that at least part of the point of a/b/o fiction is that omegas are generally weaker and need protecting and all of this bullshit, but it just wasn't working for me here. Dale was treated like absolute garbage because of his infertility, and was essentially tossed aside as a productive member of society simply because he couldn't have children. Furthermore, omegas are at a distinct disadvantage when it comes to professional goals, as well. (view spoiler)

And that brings me to the second thing that really made this book unenjoyable for me. (view spoiler)

Apparently there was also a third thing that really bothered me, but I didn't bother to write it down in my notebook, and I can't remember what it is. LOL If I remember that, I'll come back to rant. ;)

I did enjoy that there were lesbian couples in this world - apparently no one really cares who is gay/straight/bi etc, you're just supposed to pair off according to your alpha/beta/omega status. But that did leave me with a question or two. (view spoiler)

Altogether, this really wasn't an enjoyable book for me.

Mimi says

3.5 lovely stars

An age-gap May/December romance (non shifter) between an Omega and Alpha. Anna Wineheart has weaved a gut wrenching, heartwarming story around two flawed characters that fit together like lost puzzle pieces.

Dale Kinney is a shamed, divorced Omega trying to live his life with the so called knowledge that he is infertile. And Greg Hastings who is a young Alpha who feels unworthy of his Alpha status because of the loss of his best friend.

The HEA that Dale and Greg get is well deserved for these two. The struggles that they had to endure were well worth the HEA. This book will have you going through so many emotions. Highly recommend. Can't wait for the next book in The Men of Meadowfall series.

I received an ARC for my honest opinion of Omega Teacher's Baby (Men of Meadowfall Book 2).

Megan says

This book was alright. I liked that Dale was a bit insecure and that Greg was too. They weren't really a typical alpha/omega pairing and I enjoyed the different dynamics that were brought out in this story. Greg has a lot of growing up to do, that's for sure, but he is only 22 so I'm okay with his immaturity. To a point. Him stepping up to be with Dale is the best part of him and I really love that he's willing despite being scared and unprepared for what life with a baby means.

Dale is vulnerable because of his age, his past, his insecurities, and because of how much of the consequences he will face because of his position and everything that he is. When things blow up in their faces I ache for Dale because of just how high the cost is on his end. I don't know that I enjoy where he's forced to go with his career. I also don't see his confidence fully restored by the end but there is definite progress so I'm glad that Greg could help to build him up after Charles brought him so low.

It seems like there is a whole world of information about alphas and omegas and their hierarchy that I'm just supposed to know about even though it's only vaguely explained. The story could also have been condensed quite a bit. It felt like the halfway mark would never arrive, it dragged really badly. Once things picked up it was one bad thing after another and a lot of heartache before the conclusion came. The car vs. truck thing felt really out of place and I felt like something else should have been used as a carrier for the announcement and reunion. Other than that, the story had some good points with the characters actually feeling like they should be together despite what was against them. 2.5 stars.

Lisa says

This is a new to me author and I read a short story of the Omega Teacher's Baby in the "Sweet and Spicy Stories Vol 2", which contained mostly sample chapters from a number of authors. I enjoyed what I'd read and was pleased to find it was a full story. This is Book 2 in the Men of Meadowfall series and it read well as a standalone.

This is a May-December omegaverse/non-shifter mpreg story. Dale is 42, a Professor teaching Chemistry and is an omega. Having been divorced by his former Alpha for being infertile, he seems set on the path of academia. Greg is 22, son of the Principle of the University, basketball captain and Alpha, with his sights on Dale. After an explosive bonding, Dale finds he is pregnant and Greg steps up to be his Omega's Alpha, but the journey is not a smooth one....

This was a page-turner. Both characters have baggage - Greg lost his BFF in a fire and this plays heavily on his avoidance of planning for the future, but his responsibility to protect Dale is front and centre as he battles with his feelings. This is much to the annoyance of his Father who wants him to settle with an appropriate omega of good breeding and age. Dale's sudden transition from a teacher to having an unreachable dream - a child, hit me with the feels. Seriously, the yo-yo thoughts and rollercoaster emotions, especially around the age gap between him and Greg was a constant thread until a near fatal event brings it all to a head.

There was plenty of sweetness and fluff - the baby romper suits and especially the box of paper cranes just made me a pile of *goo*. I loved the age difference and the characters were well defined with their responsibilities, attitudes and outlook on life. There was plenty of knotting, marking and a couple of OMFG moments! The story ends on a strong HFN and left me with a contented *sigh* Enjoyable read.

Amber says

Omega Teacher's Baby is the second book in the Men of Meadowfall series by Anna Wineheart. I first read about Professor Dale Kinney and Greg Hastings in a short story called Teacher in Heat during a professor/student short story promotion event through instafreebie. I fell in love with both characters and wanted to know what happened to them after their first taboo encounter. And it was like the author heard my cry for more because she took the story I loved and made it into a full-length novel and answered all of my questions about what happened and if they got their happy ending. And all I have to say is the book was hot, hot, hot. It pushed all of my happy buttons with some of my favorite tropes. I have always loved the taboo teacher/student books and then to throw in an older/younger theme as well. And not the typical older/younger theme where the alpha is the older and the omega is the younger but the other way around which was a great treat and made it even more taboo and gave it a cougar vibe. I loved the book, and I can't wait to read more books by Anna Wineheart. I voluntarily reviewed an advanced reader copy of this book. I bought a copy because I loved it that much.

Kathleen Nichols says

I voluntarily reviewed an Advanced Readers Copy of this book

This is the first book that I've read in this series and I have to say it was different. The storyline is one that I

haven't read before where the older man in the relationship is an omega not the alpha. The dynamics of the relationship really do change when the younger man is the alpha and also a college student and the "other" man is his professor.

Greg wants his chemistry professor while his professor wants Greg as well which is taboo. Dale Kinney is a lonely unbonded omega being pursued by Greg. He knows he shouldn't want a student like he does since he's a 42 yr old, infertile, and broken omega and his feelings terrify him. His past failures have convinced him that even if he were younger he is still unworthy. Greg is also haunted by a past failure that he can't move on from when his best friend dies tragically in a fire. Greg is the college president's son so that makes him doubly off limits but he keeps pushing Dale until he finally caves. Their first heated coupling has serious consequences for the two men. Greg wants to rush his fences where Dale wants to be invisible to everyone except his alpha. Everyday they're together they each fall more in love all though Dale still suffers the insecurities from his past. When Gregs father stumbles upon the two and their secret Dale loses his job as a professor and the two are torn apart.

The two men have any number of questions they each need to find the answers to. Is the 20 year difference in their ages really a factor to their relationship? Can Dale get past what he feels are his many failings? Can Greg let go of the past and look to a future Dale? Can these two men go out into the world as a couple regardless of the judgmental attitudes of others that they might have to face? Can the three become a true family with a bright and happy future? Read this poignant slightly unusual love story for yourself and enjoy.

Jess A Jaye says

I first read Omega Teacher's Baby back when it was a short story. At the time I was so annoyed it was only a short because I really wanted to know what happened with Greg and Dale. Was so happy to discover that Anna was turning it into a full novel.

This is a really enjoyable non-shifter Alpha/omega mpreg story. It was refreshing to see that the omega was the older of the two MCs and the alpha the younger - you don't see that very often in ABO stories.

There's plenty in this book to hit you in the feels. I really felt for Dale's history and his past as a young omega with his evil ex. Watching Greg step up and be the alpha that Dale needed was sweet especially in the face of the pressure he was under from his father to settle down with an appropriate omega.

If you read and loved Leta Blake's Slow Heat then I think you'll enjoy this book especially if you love your mpreg full of knotting, heats and fated mates.

And who knew origami cranes could be so romantic.

L. Layale says

I'll start off with the rating 2.5 stars.

This was overall a good story. It had a decent story line and the characters were somewhat developed. Dale and Greg are two worlds apart. Greg is an alpha who comes from money, but remains thumbed underneath his father's power. Dale is a shamed omega who was divorced because of his infertility. He is a professor at the university where Greg's father is president. Greg and Dale have been dancing around the attraction for as long as either of them can remember. As an unmated omega Dale has to hide his scent and pretend to be claimed by an alpha to keep Greg away from him. When the alpha Dale uses pulls a move to make her own

life happen, the one time Dale goes without a strong enough mark, the restraint between him and Greg crumbles.

So, Greg and Dale sleep together and Dale unwittingly falls pregnant. This is not exactly a fated mates story, but it is very much an insta-love/attraction. I suppose what helps is that technically it's more attraction than love that gets them in each other's pants. Dale's issues with relationships from his past experience have him on the more cautious side of being in love.

The story itself is good, but the writing leaves something to be desired. Wineheart has a LOT of dialoug and is very much lacking in her complex writing of detail. We're told a good chunk of the story. The most consistently strong part is the smut. We're told a lot of how the emotion between the two characters develops. We don't see it. I said this was an insta-attraction, and it because the push to their relationship development is shallow and is supported only by the pregnancy and them sleeping together in random increments. The baby was a circumstance of the story. I didn't feel like it was as core of the story as it should have been because the affects on Dale were very limited. You could almost forget he was supposed to be pregnant about 75% of the time.

And speaking to the characters themselves. Dale's dad was a jerk. He was also another circumstance that should have had more emphasis than it did, although I will say it got better towards the end. But Dale, he's supposed to be 42 years old. First, on the cover he doesn't look at all 40 anything, barely 30. In the story he doesn't act like it either. There's no apparent correlation between his character's personality, age and experience as there should be. Greg played his part a little bit better as the young, impulsive, alpha. While he wasn't overly obnoxious he had his annoying aspects which I chalk up to his young age as an alpha with heavy responsibility.

I think the story needs to be revised and edited for me to give it a higher rating. This was a freely given, honest ARC review.

Ali says

I received this book in exchange for an honest review.

I loved these two in Anna's short and was excited to read a more in depth story about them. Dale is such a sweetheart except he tries to keep it hidden underneath his professional exterior. Greg knows he doesn't want the same thing as the other alpha's his age but his doubts make it hard for him to fully commit to a future of any kind.

I loved both of the characters, they were both broken in different ways and really needed each other to mend themselves. Their relationship gave them the opportunity to really see what is important in life and decide what they really want for the future. I love that this had a slight connection to the first book in the series but doesn't require it to enjoy this story.

Rachel Emily says

I think this may have just bumped Wizard by the Sea out of my favorite book by this author spot! I LOVED this story so, so, so much!

Of course, I am reminded of Leta Blake's Slow Heat when first starting to read this - teacher/student relationship, human ABO world, age gap of 20 years, you name it. But this stands as being unique on its own at the same time. I LOVED the scent markers and bonding elements (I wish more ABO 'verse stories had that incorporated actually) and I love how important that is in this series.

Dale is an omega teacher hoping to reach tenure at the college he works at. For the past couple months, one of his students, Greg, has been asking him for coffee - but surely he can't really be seriously interested in an old, infertile omega, right? Not when Greg is the star athlete, son of the dean of college, and has such a promising future ahead of him, right?

I loved Greg's steadfastness in his wanting and then love for Dale. He's not afraid or ashamed of it, and he just knows that Dale is IT for him, despite the age difference and knowing his past. I LOVED that. And I loved how he just knew he would take care of Dale and the baby. UGH I loved him. Dale had been treated horribly by his ex-husband and his family, so he is understandably weary when he comes to Greg, and he has that whole, "I'm going to make this decision for your own good, you're better off without me" mentality that just made my heart break around the 77-85% part of the story, But it's so beautiful, and it's so wonderful at the end, and I just LOVED IT.

CANNOT wait for the next book in the series! If you want some human, non-shifter ABO with KNOTTING and scent-marking and bonding, and mpreg, and wonderfulness, you must read this story! Very easy to stand alone since Felix and Kade just make a brief appearance.

I received an ARC in exchange for an honest review.

****Kaycee** says**

****3 stars****

I was looking for a fluffy, light-hearted read and I found it in *Omega Teacher's Baby*
I loved the age gap, I loved the fact that the Alpha (Greg) was the younger of the two. If the Alpha was older, then it would have been a bit uncomfortable, as the older man (Dale) is the Alpha's Professor.
The story was told so Greg was clearly the aggressor in the relationship. Dale has such poor self-esteem because of a past emotionally/verbally relationship. He repeatedly states he's not worthy of love. The problem with this story is he states this OVER and OVER again.
If I had a dollar for every time Dale stated he wasn't worthy, or "we shouldn't do this", or "you're my student/I'm your professor"....I could afford to buy all the books in my TBR list.
I can see Dale haven't self-esteem issues, but truly...he was soooo whiny I really couldn't see what Greg saw in him. It really wasn't expressed what the attraction was for Greg.

Despite all this, the story kept my attention to the end, I was rooting for them (for some reason). I think a lot of it was Greg, and how mature and sweet he was and how much he really supported Dale. The book fulfilled its purpose, which was to get my out of a funk.

Darlene says

Anna Wineheart grabbed my heart again with her fabulous new book, “Omega Teacher’s Baby”, the second book in the “Men of Meadowfall” series. I love all her books; she’s a great writer. What I like was that Anna starts us out with the thrill of the forbidden romance early.

Professor Dale Kinney taught chemistry at Meadowfall College and has a huge crush on Meadowfall Lion’s star basketball player, Greg Hastings. The twenty-two year old Alpha student had his own crush on Dale. He’d asked the professor out for coffee many times with Dale always refusing.

First of all a teacher doesn’t date their students, it’s a perfect way to be fired. Plus, Greg was the first born son of his employer, the president of the college, Bernard Hastings. Greg’s father would be furious if he knew of their affair.

Dale’s forty-two so the twenty years difference in age was like a thorn in Dale’s side. Dale was the pessimist, not just about his age but other things as well where Greg was the optimist in the relationship. Be prepared for a lot of hot sex between these two men, they can get your heart rate up; plus Dale gets knocked up.

What I liked most about the storyline is it started out with Dale pregnant near the beginning, so you could get to know what a wonderful Alpha Greg is to Dale. Dale’s problem was he fought against the relationship right from the start. I love Greg’s character. Greg was the total opposite from Dale’s first Alpha he was married to. I’m not going into the whys about Dale’s divorce, it’s better to read it. But Dale never felt he deserved happiness.

Greg adored Dale, but even Greg had his own ghost that haunted his thoughts. It’s the guilt when he couldn’t save his best friend from a cabin fire while camping. The two boys were still teenagers, but the connection was deep between them. Greg’s father just brushed it off and told his son to move on. So, it’s been something Greg found hard to talk about.

Greg also had to deal with his pretentious father’s demands for Greg to find an omega to bond with; but Greg already had his bondmate picked out and now his omega was pregnant; all the more Dale was his. Dale gives in after Greg’s constant upbeat feelings about them as a couple, so Greg moved in for a trial. It was the happiness time in Dale and Greg’s lives.

Both men go through heartache after Greg’s father discovers their relationship. Dale fired on the spot and Dale to Greg it was over for good even though he was pregnant he’d find another job. The separation was hurtful and full of heartache.

The writing is emotional that at some points I cried I was so caught up in the story. The hurt wasn’t one sided, both the men suffered, with Dale saying it was over Greg still couldn’t let go of his omega. Boy did my heart ached for these two men and I wondered if either one of them could ever escape their ghosts from their past relationships. It was pretty intense.

Ms.. Wineheart’s writing was beautifully romantic, even with the intense emotions. All of the characters I got to know in the book, I could picture them and I felt their anger, shock, or whatever other emotions were involved.

You won’t go wrong in reading this wonderful book by Anna Wineheart. I give her five huge stars! And I’ll

tell you, I'm looking forward to any of her next books coming out. Great read and I highly recommend it.

I read a complimentary Advanced Reader Copy of this book & am voluntarily leaving an honest and unbiased review.

Linda says

This series is set in another universe where there is no discrimination due to sexuality, men/men, women/women, men/ omen whatever configuration is accepted and both men and women can have babies. But there is another level of discrimination going on here only omegas can have babies and only alphas can give them babies. Also alphas are top of the social ladder and omegas are lower. Betas are somewhere in between and can only mate with other betas and must adopt if they want children. Anyone can aspire to any job but it takes omegas longer to get tenure or permanent status in jobs. Unmated omegas are seen as less valuable, and infertility a stigma to some and divorce is a real faux pas.

In this story the fact that our professor is an omega finds him waiting an extra 2 years to earn his tenure, he's also divorced because he did not conceive in three years and his alpha got their marriage annulled. Then along comes his new alpha not only is he twenty years younger, reckless, but he is the college president's son. The college president is wrapped in status and his colleges success that he finds his sons choice of omega unacceptable and of course it breaks a major rule at the college Professors cannot sleep with students. It's a long hard road for our mates to make it to the altar. But never fear there is a happy ending.
