‘The Ezekiel Experience’ is a New Adult Science Fiction novel following Ezekiel “Z” Keller, an eighteen year old Filipino American in Portland. On the cusp of adulthood and finding his way in life, everything is changed by a violent, cannibalistic outbreak. The V11 virus is unlike anything anyone has seen before, it changes the Infected into mutating flesh-crazed monsters nicknamed Flesheaters. After the loss of his family Ezekiel’s only hope for survival and the possibility of a real future lies in teaming up with an alcoholic sociopath, a machete-swinging teen mom, and a wide range of oddball characters. From beheading Flesheaters to overcoming PTSD and finding a cure, Z’s coming of age story is not what any parent would hope for.
