### **Jaclyn H says**

This was one of the most unsettling and disturbing books I have ever read. The authors descriptions of the apocalypse were very graphic and dismal. She details diseases stemming from biological warfare, a world wide nuclear war, a long devastating winter, earthquakes, volcanoes, extreme wind storms,extensive flooding, and eventually a fire ball destroying the world. It conveys a lack of hope.

The portion of the book the author allots to her actual near death experience and the afterlife are very minimal compared to her horrific life story leading up to her suicide, her grizzly images of the end of the world, and her long hard road to recovery after coming back to her body, including what to do now with her newly acquired information.

I felt like I was reading a horror story, reminiscent but not nearly as well written as a Steven King novel, but since it is based on a "true" experience it was harder to brush off as fiction. She is good at conveying depression, fear and dread, about the world we live in and what "might" happen in the future but, the whole story seemed far fetched it was too much for one book. Her "real" life story's include her child being kidnapped, her own abduction and stabbing, preventing a strangers suicide etc. I really don't know if I can give it any credibility since her near death experience occurs because of a drug induced suicide attempt.

---

### **Natalie says**

This was an incredible book. I have never read such a detailed account of a visit to the spirit world. It rang true with me and beautifully concurred my own religious beliefs about the next life. It brought a measure of peace as well, since I could easily imagine my own deceased brother dwelling happily there.

---

### **Carolyn says**

This is the most comprehensive personal Near Death Experience (NDE) I read in the last few years. I have read many personal NDE stories but this one talks about the future timeline of the earth before the end. During our economic collapse this last year, I was reminded of what Sarah said about the collapse of American and world society. So I reread it again.

While love is the prevailing feeling of life after death, the view of levels of hell versus the levels in heaven was most thought provoking.

I don't know how to describe how I respond to this book without a religious discussion of my beliefs, so I'll leave it at that.

---

### **Haylee says**

I'm not sure what to think of this book. It made me want to go and do more service with my life which is good, but at the same time her future visions were a little far-fetched for me. I strangely found myself believing a lot what she had to say oddly, which I don't like to admit because the book really scared me. All the future destruction, talk about evil spirits hanging around, and the Salt Lake City destruction really left a bad (and scared) taste in my mouth. But again, I'm not sure what to think of that either. Either happy that I am more educated and can now be more prepared or stupid that I considered anything she had to say in the first place. It was confusing to me because while the book seemed far-fetched at some parts, her near death experience as a whole matched up strikingly well with my churches teachings. So I really am confused and have no idea what to think right now.

I wish I could somehow have heard her tell her story before the world trade center towers collapsed, as that would have given her a lot more credit since she predicted them. She says that she did in fact talk about it happening before it happened though so a part of me wants to do some digging to find some interviews circa-1990s.

I also would be interested to have heard her experience before she joined the church, because I'd like to know how much of her book was influenced by that and how much of it was influenced by her near death experience alone.

---

### **Ryan says**

I was VERY touched by Sarah's experience...it was easy for me to understand. and i felt her sincerity & the lessons she learned while passing over to the other side were powerful and in in align with what I believe to be the case. Thank you very much for sharing your story with everyone Sarah Lanelle!

---

### **Sandra Strange says**

This near death account is ok, but not as satisfying as many I have read. It is sincere, but has some perspectives that are less satisfying than other LDS oriented nde accounts I have read.

---

### **Steven A. says**

Excellent, opens the heart and mind to a wonderful perspective of the meaning of life, and life after death, Thank You

---

### **Trish says**

I felt like I was reading a tabloid. The way the book is structured, all chopped up with headers, makes this a very fast read. The writing is nothing special, very plain. Perhaps it was kept that way so as not to be misunderstood. I don't like the title of the book because if there is no death, then there can't be life. I

understand the reason why the wording was chosen, though. Titles need to grab your attention. That only increases the tabloid feeling to me.

What a magnet for disaster this woman's life was! She seems to be stronger for it. Anyone who survives physical abuse from a parent and chooses to be a better person has my compassion and respect. Still...

I don't know how I feel about near death experience books. I've read one other one before. I think I checked it out from the library after meeting the author. This one was loaned to me. I think what bothers me about them is that when I read them I know what I'm reading, so it changes the way I read it and I'm focusing on whether or not I think the author is nuts. I suppose this is where the tabloid feeling originates. I can say that both books have an end goal of motivating you to be good and do good and love everyone. That can't be a bad thing.

What I do like about this book is the description of spirits radiating different intensities of light that corresponds to their level of righteousness. There's a truth to that that just resonates with me.

---

### **Cindi says**

Loved her account and explanations on many things we wonder about. I've read this several times and refer to it occasionally to see how her vision of the future plays out with our times and beyond.

---

### **Skeller2483 says**

This book is about a near death experience of a lady. She is now LDS, although nothing in the book alludes to that. She has a very powerful testimony as I've heard her in person. Her main message in person is to follow the prophet: keep the Sabbath Day Holy; get food storage; and get out of debt. The book talks about her NDE and the effect on her as well as things she saw with regards to the last days. Again she says let the spirit itself testify to you of its truth.

---

### **Kathy says**

I actually skimmed this book about 3 or 4 years ago when it was given to me but I never read the entire thing. A conversation on Sunday lead to me pick this book up again and read the whole thing...

One of my friends said she was reading a book she thought I would really like... *Visions of Glory* by John Pontius. When I got home from church I spent sometime looking into that book. One of the reviews I read said:

"I must admit I have never read anyone else talking about floods in Salt Lake as one of the signs of the last days."

When I read that sentence I thought I've heard of floods in Salt Lake City before... in Sarah's book There Is

No Death. It perked my interest so I grabbed this book off the shelf and ended up reading it cover to cover in one sitting. It's not a long book, just over 100 pages so it is a quick read.

First let me say I'm fascinated with Near Death and Life Before Birth experiences. I've read several books on those subjects and find the accounts very interesting. I don't consider them to be scripture or prophesy but definitely food for thought.

This was not the most well written account I have read but it did make me think. There were many things in her retelling that made sense to me. Ultimately my take away from the book was to be very careful to not judge others and to be sure to right as many of the wrongs I have done as I possibly can while I have the chance to do so. For me it was a very worthwhile read.

---

### **Kris Irvin says**

Very interesting. I really liked the first half of the book, but after it got to the predictions part it felt a little... lame. It's a quick read though, so it was worth it.

---

### **Ashleigh Son says**

This was my first NDE book that I ever read. I do not believe that everything will happen as she said it, but rather that it is personal revelation for her somehow. Having said that, there are very valuable insights about life in there, and this book legitimately made me want to be a better person. Thank you for sharing Sarah!

---

### **Wendi says**

I was exposed to this woman's NDE just days after 9-11 via an old audio tape my mother-in-law gave me. I decided to get the book and read more about it for some reason this past week. You can read the book in a day, it is a quick read. I found the information quite fascinating and the lessons she gathered from her experience in line with many of my beliefs.

---

### **Mary Jane says**

There aren't many books that I feel are life changing--this one was for me. A friend of mine gave it to me to read years ago, but I was put off by it because it is a "near death" experience. She assured me it was worth the read, but I put it off. I FINALLY read it and was so sad that I waited so long. It is very inspiring and genuine. How she describes the life after this earth life, coincided with my religious beliefs--eventhough we don't share the same religion and she was an atheist before this experience. It is TOTALLY worth the read. I need to go out and buy this book! It is worth owning.
