## **Her Special Alpha** Paige Tyler

Former Army Special Forces soldier Travis Dalton finds himself thrust into the mysterious world of the Department of Covert Operations, one where sometimes bad guys do more than shoot you—sometimes they tear you to shreds.

Feline shifter and covert agent Eden Bristow can't help noticing how good Travis is at guarding her back—and turning her on. She hasn't had much luck with guys, not once they get a look at her fangs and claws.

Travis doesn't seem to have a problem with her being a shifter, and Eden is ready to make up for lost time. But one little thing is getting in the way of their romance—a gang of bad guys, and the vicious wolf shifter leading them.

### **Jasmyn says**

This was a cute and exciting story, but I really disliked getting pulled out of the main storyline. I missed the old friends I've met along the way, and I really really wanted to know more about the whole hybrid mystery - and I didn't get that.

What I did get was a great stand-alone novel with some really fun characters. Eden was great - if a little too invincible at times. And Travis took finding out about shifters a little too well - but hey, it's a novella so we don't have a lot of time for people to really soak in new things.

While we get to see a few of our friends from previous books, they make very brief appearances - so no need to know what has happened up until now to really get into this one. This is more of a mobster vs cops type of story as well. A nice change from the super-secret-government-agency out to save the world type of story to mix things up a bit.

---

### **Laura the Highland Hussy says**

This is a Kindle Worlds book? How do I knwo which "world" it's in? Her X-Ops series is good enough, I wouldn't think it would need another fandom's world

---

### **Louisa says**

Oh, yeah, loved this novella! Such an awesome read, and yeah, I enjoyed these characters! Such a great story!

---

### **Merle says**

Kindle Worlds HOT SEAL's meet again, this time with the X-Ops Team of the Department of Covert Affairs. Travis is in Virginia to meet with Jon Rudnick about accepting a job with the Guardian Angels Protection Service. After speaking with Jon, he is unsure about the job and goes for a walk to think. He realizes that he has walked way too far and ends up in a deserted area just in time to see some large men attack two smaller men in suits. He rushes in to try to help when a gorgeous woman runs out the back door of the restaurant and proceeds to take out bad guys left and right.

Travis is enthralled and aroused - she's incredibly hot while kicking these guys' butts. He also sees something very strange, but it doesn't scare or disgust him. Needless to say, when she realizes that he has happened on her "little secret", and is not turned off, she is pleasantly surprised and feels an overwhelming attraction. Meanwhile, the two guys who were getting beaten up were her sister's fiance and his best man. Neither Travis nor Eden think that it was a simple mugging and there goes the story.

This is a good one. Those DCO folks make an appearance and, of course, Travis has run across Landon in the past in their Special Forces days.

### **Dina Bushrod says**

Another great story by this author. In this story we have a woman whose never been accepted for what she is - a beautiful, intelligent, strong kick a.. woman who also happens to be a shifter. She's on leave to attend her sisters wedding when the best man is viciously attacked by several men, one who turns out to be an unknown shifter. She's prepared to get into the fight to save him not knowing that an ex- military gorgeous hunk has also seen what's happening and jumps in to help. He sees her shift, but instead of fear or horror he jumps in and helps. I've given enough spoilers already so let me just say that the journey to them learning why the best man is being targeted also leads them to discover each other. The story has plenty of action, secrets, finding acceptance and love no matter who or what you are. If you enjoy reading paranormal action and romance, this is definitely for you.

guys are and how to stop them

Bygpearsonon January 7, 2018

Travis just got out of the service. He is interviewing with Jon about joining GAPS. While walking around thinking about his options, he hears a rukus. While trying to help, a woman comes flying out of the door. She kicks some butt. They draw the men away from the guys that were being attacked. He eventually asks her out. Now they just need to figure out who the bad guys are and how to stop them.

### **Ronda says**

Love Love Love this series!!!!

---

### **Tina Bisceglia says**

Another great read by Paige Tyler.

---

### **Rinou says**

Short cute story, as always in novellas everything happens too fast but I thought the characters and the plot were good all the same.

---

## **Felice Foster says**

### **Short**

A short story with some new characters and a brief appearance by Landon and Ivy. A quick read until the next full length book.

---

## **Anita says**

This novella was entertaining, exciting, and enjoyable--everything I've come to expect from Paige Tyler. It gets a little wordy and schmaltzy at times, and I have a hard time believing some of the "meant to be together" dialogue, as it comes off kind of juvenile. But the action in these books is always done well enough to keep your attention.

The characters are good, and I liked how well Travis and Eden partner together. You don't get to see much of anyone else, which is a little disappointing, because I would have liked to watch more interaction between Eden and her family, and maybe with some dropped hints that they know she's a feline shifter and still love her... or something.

The romance is steamy, but I liked their investigating partnership a little bit more. However, I DO appreciate that these two don't beat around the bush about their attraction or their emotions and jump right to it.

The only other complaint is that this e-book was riddled with typos and grammatical errors, like missing pronouns, almost every other paragraph.

Otherwise, not a bad read for a boring evening.

## **Glenda Bettin says**

Liked this book, cute couple, she is sooo cool

---

## **Darcy says**

This is my first Kindle Worlds book. I was a bit worried, wondered if I would be missing something, but that wasn't the case. I was able to figure out that Jon was from the "world". The way the story was set up was a good way to link the two unrelated series.

I really loved how Eden and Travis met and immediately clicked. Even better was that Travis wasn't turned off by how special Eden was, instead realized what a benefit it was to her. I was glad when Jon helped Travis

figure out the direction his life should take. The wedding turned out to be crazy! But it all ended well for everyone, but especially Eden and Travis.

---

### **Tracy says**

I really enjoyed Her Special Alpha. Travis and Eden were fun and interesting characters and had great chemistry. There was a bit of action, a little suspense, and some steamy passion. It all came together to make a very good story. On to book four.

---

### **Cindy ~ says**

I love everything about this series. Whether the books are full length or novella size they are always packed full of action and humor and great characters. The women are kick ass and the men have no problem being with a shifter/woman that's more powerful than they are.

Eden Bristow and Travis Dalton are both in Virginia Beach for different reasons. She is there for her sisters wedding and he is there to meet with a man about a potential job. The two end up in an alley fighting off an attack against the groom to be and his best man. Eden is a feline shifter with the DCO and Travis is retired Special Forces so they do some major butt kicking even with one of the thugs being a wolf shifter.

One of the things I love about this series is whenever we are introduced to a new character there isn't the awkward getting to know them stage. Right off the bat you just feel like you've known them forever. That was the case here with Eden and Travis. They recognized right off the bat they had chemistry both sexual and as partners in trying to figure out what the goons and wolf shifter really wanted.

As always my only complaint is I want more of these X-Ops guys!!
