Morris says

This is a book full of great ideas for all cat lovers out there who want to take their cat loving homes to the next level. There are a great many solutions to common problems that with a little work should make everyone, animal and human alike, happy. I've found many projects I want to do, but even if no projects get done the pictures alone make the book worth it.

This review is unbiased and based upon a copy won through the Goodreads First Reads program.

Julie says

Jackson Galaxy is the man when it comes to cats. In this book he addresses some of the issues that mainly indoor cats have to deal with, indoor scratching posts, litter boxes, and other areas that would enrich a cat's life. Some of the people in the book have done amazing jobs modifying their homes to accommodate their furry friends, from miles of walkways and hidden tunnels to huge outdoor catios for the cats to enjoy. Would make an ideal present for any keen cat owners you know - except for us, as my cat gets lots of indoors/outdoors action.

Toi Franks says

Great ideas for cat owners, not quite what I was hoping for. If you have the space and are willing to put shelves on the wall this is the how to book for you. Not a lot on dealings with multiple cats and their personalities. Wasn't a read to match the show.

Lacy says

If you want to understand why your cat is behaving a certain way, if you want to work with your cat to change his behavior without punishing him for acting on his instincts, this book will save your sanity!

Jenn "JR" says

Gorgeous little book with incredibly inspiring case studies of folks who have created diverse and attractive cat habitats in their own homes. I liked Jackson's recommendations about feline traffic management -- both on the walls and on the floors. He discusses "signposts" at length - these include litter boxes, blankets, condos and the like. While I only have 2 litter boxes for 5 cats (I should have 6, apparently!) -- I have the biggest size I could get and put them at opposite ends of the house. And - there are cat condos in EVERY single room (no joke) and an assortment of beds on the floor in different areas (even a couple beds under the sofa nearest the door - one full of socks!).

I was interested in this book because I have been thinking about how to further catify my home and wanted some ideas for elevated cat superhighways to take advantage of the tops of bookcases and armoires. Great quick read -- highly recommend borrowing it from the library or a friend.

Karen says

So many great ideas here for catifying any space. Reading Jackson's books has me paying more attention to my own to kitties to see where they're wanting to go next and thinking about what additions I can make to give them more access and entertainment. I recommend his books all the time while volunteering at my local shelter.

Jillian Ochoa says

I enjoy Jackson's Series on Animal Planet " My Cat from Hell" because he is full of useful information for new, soon to be or current owners of cats. So, I picked this up at a local Half Price Books. WOW. There is so much information that you have to keep going back to read it again or scan through another area. I had never thought about how a cat sees a room or an event until now. I think "Catify to Satisfy" has helped to ensure my future Therapy Cat will have the best chance at a successful introduction to my home. Definitely a book to keep. Full of great images as well.

Melinda says

A sequel to the excellent *Catification*, this book offers more tips and examples of how to improve your cats' lives through cat-centric and human-friendly interior design. The book would probably make sense to a reader who hasn't read *Catification* (helpful sidebars summarize the key points from that book), and it also provides additional resources for readers who turn to this book as a sequel. There's a closer look at litter boxes, for example, and a section on how to deal with shy cats who hide away. The book expands on previous themes and features new DIY projects that don't require advanced woodwork skills. Highly recommended to any cat owner and/or cat lover!

Rebecca says

This is a fun book, full of ideas and photos, for making any home a cat's paradise, while keeping it lovely for us humans, as well!

Ginny says

I got a cat and started watching "My Cat from Hell" on Animal Planet. My cat, Baby Max, and I really bonded over the years. He's sitting next to my key board as we speak. With Catify to Satisfy I learned of many ways to make life more exciting and interesting for my cat. I hope to encompass some of these

concepts in my home.

Katie says

I love Jackson's ideas. I'm excited to try them.

This book expands more on Catification and gives some more ideas and examples of how to achieve the four major catification principles.

Jena says

More great advice, covering such topics as litter boxes, scratching posts, and cat superhighways to give your feline friends more vertical territory in your home.

Bree says

Talk about some practical ideas to do in your own home to keep your cat(s) happy and healthy! After reading Kate and Jackson's book "Catification" I pre-ordered "Catify to Satisfy" not only for myself but as gifts for friends. It has a fantastic section on litter box solutions, which was the entire reason I bought the book for a particular friend. But what I love most about this book is that it walks you through adding easy things to your home to enrich your cat's life, who in turn, enriches your own. Our pets are worth it.

Veronika Elde says

I much preferred the expanded section on litter box solutions. some very good and attractive ideas there!

Heidi says

Lots of ideas to make your home more habitable for your cat. The last half of the book contained photos of homes with fantastic cat features. Way above what I could/would do, but very awesome stuff!
