### **Vicki says**

Tense and exciting, with wonderful characters. I'm surprised that this series featuring FDNY Fire Marshal Georgia Skeeahan isn't better known.

### **Gabrielle says**

This book is about two doctors that are killed in a fire. The fire shows signs of a "Flashover" which is a term used when the combustion of a room and everything in it go up in flames at one time. While investigating Marshal Georgia Skeeahan finds out that both of the doctors/victims made a habit of not letting disabled firefighters have compensation. That when Georgia realizes she might be dealing with an arsonist and a murderer. Georgia must find the man or woman that did this horrible crime before every firefighter meets the same fate. This book was extremely fast paced and very well written. I enjoyed every minute of it. A must read for any fan of the series or anyone looking for a good mystery/crime book.

### **Cynthia Scott says**

I enjoyed every minute of this book. It read very much like a Michael Crichton thriller/mystery, full of science and interesting facts, as well as the very human stories of the people involved. In this case, the book is about the nature of structural fires, forensic fire research, history of two generations of firefighters in New York.

Great read, but hard to put down!

### **Ruth says**

NYFD fire inspector Georgia investigates mysterious deaths that might involve disputes over line of duty compensation for disabled firefighters. Her lover is a suspect in murder of best friend. It is in fact best friend who is the murderer seeking revenge for death of family

### **Kari Gulbrandsen says**

Good book, but why didn't she make copies of everything?!

---

### **Tania says**

This copy is an ex library one... But not the library that I work in. It comes from down the road in Wellington.

---

### **Bret Kinghorn says**

This second book of the series was just as good as the first.

---

### **Brucie says**

Apparently "flashover" is a description of many significant events in this story, almost a metaphor. Lots of "almost" in this book: almost interesting, almost insightful, almost good writing. I was disappointed by depicted relationships with shallow brutal men and treacherous friends and family. Very simple writing, more telling than showing, and some stupid editing.

### **Scott A. Miller says**

Chazin came up with an even better story in the second Skeehan novel. More twists and a villain I caught on to just a little too quickly....but all in all a great read. There is only one book left so I hope that Ms. Chazin is working on the fourth book in the series.

### **Carole Anderson says**

Wow - I love this author. This was an amazing, fascinating, fulling engaging book! So well written, highlighting the sacrifices firefighters make while telling a story that is both horrific and spell binding! Fantastic!

### **Connie says**

I had a hard time getting into this book, but once that I did, it was good. This is #2 in Georgia Skeehan series. I have now read the first two and there is one more, so when I find the last one I will probably read it too. I thought at first it was a bit hard to follow. I was a little surprised by who the bad buy was, but it did make sense at the end.

### **Kyra says**

More 'airport' reading. This is pretty darn good too, except the final plot twist was really unnecessary and

pretty dumb. Good characterization, well written, interesting factual material presented in a non-boring way. Definitely interesting enough that I will look out her other books.

#2 in the Georgia Skehan, NYFD Marshal series.

Georgia Skeehan and partner Randy Carter investigate a fire that took the life of a doctor with a history of denying pensions to disabled firefighters. Georgia's best friend, NYPD detective Connie Ruiz, confirms there is a bomb threat and that whoever is behind it knew the retired doctor. They are too late to save a second M.D. from a similar fate. Connie mysteriously disappears and Georgia's lover, Mac, is found in a blood-splattered apartment, with no memory of what happened. Georgia follows clues unearthing a connection between a toxic fire in 1978 and plans to erect a football stadium on the site.

## **Barbara Kugler says**

I really enjoyed this book. The characters were well developed, there was engaging mystery and suspense. I have read a lot of police procedural and mystery books and the fact that this was about fire marshals was intriguing.
