Are Littles 'big enough' to use technology in the classroom? Yes!

Pre-K and elementary school-aged children are naturally curious about the world around them. They love to explore and play, in fact, that's how they learn. That innate drive to discover and willingness to try is also what makes Littles great at embracing new opportunities.

In Google Apps for Littles, author-educators Christine Pinto and Alice Keeler encourage teachers to tap into their young students' curiosity, particularly when it comes to technology. The authors share a wealth of innovative ways to integrate digital tools in the primary classroom to make learning engaging and relevant for even the youngest of today's twenty-first-century learners.

Google Apps for Littles equips you with . . .
Practical ways to approach technology with young learners
Activities for integrating Google Apps in the primary classroom
Easy-to-implement ideas for using G Suite as an educator
Exercises that build important skills, such as critical thinking and collaboration

Children already know that they don't need to wait for a grown-up to give them information, and many are already familiar with smartphones and tables. By helping them understand how to use these amazing digital tools to learn and create, rather than just consume information, you are equipping them for their future education.

Empower your Littles with experiences that place learning at their fingertips! It is time to shift your mindset and believe that the youngest kids on an elementary school campus can do more.

"Google Apps for Littles is jam packed with practical and innovative ideas and projects you can use with you littles tomorrow!" —Eric Curts, ControlAltAchieve.com

"Inside this book, created by the dynamic duo of Alice Keeler and Christine Pinto, you will find nothing short of transformation. No matter what grade you teach, you will gain new ideas and insight by reading this book. Add this book to your reading list now!" —Kasey Bell, ShakeUpLearning.com

"I love this all-encompassing guide to support teachers and students. Awesome!" —Lavonna Roth, creator and founder of Ignite Your S.H.I.N.E.®

Emily Northcutt says

Excellent and practical suggestions on how to use G Suite applications with young learners. I plan to share this with my colleagues teaching in primary grades and adapt many of these approaches to my own practice. If you work with littles, you need this book!

Chris says

Great resource for teachers wanting to integrate Google into younger grades. Even older grades can adapt many of these activities for older students.
