## On Haunted Ground: The Green Ghost and Other Spirits of Cemetery Road Lisa Rogers , Keshia Swaim (Contributor)

Lisa Rogers sensed that the house she bought with her husband Wes came with a ghost. But nothing prepared them for doors slamming on their own, objects flying, and the nightly appearance of a freaky green orb in their bedroom. Their two children had opposing views on the paranormal activity. While Keshia grew attached to the grandmotherly ghost who taught her not to be afraid of thunderstorms and the Native American spirit that tucked her into bed, her brother Troy wasn't quick to believe in their unearthly guests.

This amazing true story details two decades of terrifying, funny, and heartwarming paranormal encounters--the mischievous entity that imitated the voice of each family member, the spool that "came to life" to chase the kids, the shocking events that shake Wes and Troy's skepticism--and the enduring love that keeps the family together through it all.

Nothing particularly sensational or scary, but an interesting account of one family's experiences living with ghosts through many years. Reported as a true story. Have no particular reason to doubt the author's sincerity there - beyond my normal healthy skepticism, but I admit I do find it possibly pertinent the author has also written some fiction. For those interested in this sort of thing it's worth picking up while free for Kindle, those wanting something spin-tingling would be disappointed.

On Haunted Ground tells the experiences of author Lisa Rogers while she lives in a house, haunted not by one, but by several different ghosts, some more powerful than others. While some of these experiences are creepy enough to make shivers run down your spine, they're not all malicious in nature. Lisa Rogers has an intriguing narrator's voice, and she builds up the tension perfectly throughout her book. Even if a book is non-fiction, it's still important to keep a reader hooked, and Lisa definitely succeeds in that.

I have mixed opinions about all the specters haunting Lisa's house though, but that's probably the skeptic in me again. I have no trouble believing a house is haunted. Even if there are more than two ghosts involved, I can live with that. But the phantoms in Lisa's house seem to vary as time progresses, and there are about five of them, if not more. There's a ghost who can strangely imitate people's voice and who occasionally picks up the phone, for instance. I've never heard of any ghosts behaving this way. Sure, they can perhaps imitate a voice ones, but this frequently? And even when picking up the phone. It's both disturbing and unreal, and I'm not sure if I completely believe it. It could be that this particular experience is a bit exaggerated. Or it

could be completely truthful, who am I to judge?

It just confuses me that not all ghosts would be present at the same time, and that the amount of specters living in a house varies over time. It's like the house Lisa Rogers lives in is more like a hotel for people stuck in the afterlife than anything else. I would've preferred if the author delved more into the why. Why is that particular house so terribly haunted? I feel like I have more questions than answers at the end of this book.

The book also felt a little superficial to me, probably because the author tried to talk about 20 years of paranormal activity in the course of one book. But I could live with that. It gave the book a more 'scientific' feel, which I thought helped add to the book's credibility.

Of all the true haunting novels I've read so far, *On Haunted Ground* is perhaps my favorite. It holds the middle between being too exaggerated to be believable and being so dry and uneventful it can't be anything but true. The writing style is fluent, and I enjoyed Lisa's turmoils, not only with the ghosts but also with her family. It's very clear that she has a loving and caring family, with or without the ghosts included. I will definitely read more books by this author if given the chance.

*On Haunted Ground* is a book wrote by Lisa Rogers who tells of her experiences of living in a house that is haunted with ghosts, and not just one or two, but a large variety of them that all manifest in different ways and different times.

Lisa explains how she first learnt about her resident ghost and how she reacted to it, and as her children grew how they both had differing opinion about them. Lisa and her daughter believing whilst her husband and son didn't believe. We follow Lisa as each chapter explains about the different parts in her life and the ghosts that manifested them.

I especially loved how Lisa explains about visiting a haunted hotel where they take part in a behind the scenes tour and how what happened there enabled her husband to believe.

I love reading books about real ghost sightings and actually had goosebumps reading this book. I plan to buy an actual copy of this book when it is released to add it to my ever growing collection of paranormal books.

I downloaded this "paranormal" story for free. I would actually like to give it 3.5 stars because it was a fun

read for the Halloween season.

This book is supposed to be a true account of a family experiencing several poltergeists. The author's writing style and "plain" language made it very real to me and I read it in one sitting - like a friend telling you what happened to them. I enjoyed it and sincerely hope I can fall asleep tonight!

Do you believe in ghosts? Well, if you do, then you'll totally enjoy this story about the author, Lisa Rogers, experiences with the unknown. When I first saw this book, I wasn't sure what to expect, but being a believer in the super natural, I was curious. Needless to say, it was an easy read and once I started, I couldn't stop until I was finished. Having had my own experiences, I could easily relate to some of the events that took place. I found the story interesting and fascinating and it even cleared up some of my own questions I had.

The story starts out back in 1984 when the first green 'orb' is seen. She then tells us of events and experiences her and her family witness with different 'ghosts' and activities that take place through the years to the present time. Many people have a hard time believing in such things as items falling, doors opening, items disappearing and re-appearing in different places, but these are some of the things that went on, and even her husband wouldn't admit it was a spirit causing these things. The story is well written and is told not to make a non-believer a believer, but to share her experiences and research findings.

I have been waiting to read this book for a very long time and when I finally got the chance I was more than excited!!

As I said before, the topic of ghosts has always fascinated me, and being a firmly believer, I read this book

with pleasure. Even if I've never had an experience myself, my interest goes way beyond my teenage years. At that time, I thought that Ouija boards were the coolest thing, but one horror movie had the power to change my mind completely. Obviously I still believe in ghosts, but I have a more "wary" approach towards the subject.

Reading Lisa's experience intrigued me so much, making me feel amazed and a bit scared at the same time. I loved how she narrated her story from the very beginning and she introduced me to a wide kind of different spirits. Although I've watched some ghost hunting shows and there are things that scare me and things that amaze me, I guess that I'm wary because nothing has ever happened to me yet and I know I would be scared even if I don't want to be.

I loved the way they became part of the family and the everyday life. I especially adored the last part of the book, narrated by Lisa's daughter Keshia. It felt like "a new beginning", and the perfect set of a completely new story and experience.

If I only could, I'd talk everyone in London into reading this book when it comes out but since I can't, I hope I've hooked you enough to do it. Believe me, it's totally worth it!

This was an awesome book to read! Not only is it based on the author (and her family's) own experiences, but it is written in such a way that it kept me wanting to read more! I had a very hard time putting it down! :) I love to read books like this that are based on true experiences! If you believe in ghosts, like I do, or even if you don't, I recommend reading this book and then re-evaluating the way that you may perceive supernatural happenings.

This is also one of those books I couldn't get through, but not because it was boring or un-entertaining, I just started to get totally creeped out and was having trouble sleeping. I guess I just can't read ghost stories anymore. oh well.

It is not super scary, but I am a bit of a wuss and can't even watch scary movies, so I guess this wan't the best pick for me.

This book is a collection of "true" stories about things the author experienced in her home. What I read did keep my attention and was entertaining, if you like true ghost stories, give this one a try. Just sleep with the lights on!
