**Pucking Parker** Jillian Quinn

**I'm the coach's daughter.  
He's my dad's favorite player...  
And completely off-limits.**

The first time I met Preston Parker, I slammed face first into his wet, chiseled abs. In the men's locker room, of all places. I did the world's longest walk of shame in front of dozens of hockey players. As if that wasn't embarrassing enough, Mr. MVP gave me one of his killer smirks, right before dropping his towel in front of me. Just to prove a point. That no woman can resist him. Not even me.

Now, I can't stop thinking about Parker and his lickable abs. He keeps finding ways to see me, touch me. And I find myself wanting to break my dad's rules about his players. Rules I never break for a reason. Because falling for a player like Parker... was never part of the plan.

Pucking Parker is the first book in the Face-Off Legacy series, following the sons and their careers of the couples we fell in love with in the original series. Preston has only had one thing in mind since he was born - hockey and being drafted into the NHL. He has the skills and he avoids any distractions, such as a girlfriend, until Bex runs into him. Bex is Preston's coach's daughter, a basketball player who hero worships his mother, and Bex is the girl he's about to break all of their rules for. Forbidden list, growing love, and drama with her ex, are Preston and Bex doomed from the beginning, or can they learn to fight for each other?

I am the first to admit that college romances are not my favorite to read, but I loved the original Face-Off series and needed to read Pucking Parker. Man, oh man, Ms. Quinn did not disappoint! I loved Preston and Bex! I loved how their relationship evolved from intrigue to friends, from attraction to love, and I loved that while they didn't want anything to come from their time spent together, they gained so much more than imagined by being together! Preston was kind of a butthead at times, but he also had a really sweet side, I loved his leadership skills, and his brotherhood with his teammates. I think my favorite scene with Preston, though, was when he called his father to ask about love. Bex was really awesome to read, too, because she just blossomed so much. She went from being unapologetically herself with a major side of protecting her heart and emotions, to becoming a major support system and willing to risk everything at a chance of love with Preston. I loved the plot line of this book and once I started it, Pucking Parker was difficult to put down and things are set up nicely for the next book in the series. If you haven't read the original Face-Off series, that's totally okay and this is the perfect book to start enjoying Ms. Quinn's work! I loved reading this book and look forward to seeing where this series will lead to next!

Being a fan of Jillian Quinn's Face-Off Series, I was excited that she decided to come out with the stories of the next generation of hockey players in the Face-Off Legacy Series. In this series, the sons from the Face-Off series characters, play hockey together at Strickland University.

**PUCKING PARKER** is about the youngest son of Alex Parker and Charlotte Coachman (Coach) Parker, Preston, and Strickland's hockey coach's daughter, Bexley "Bex" Bryant. The plot is about the coach's daughter who is not supposed to date the star player. The story is cleverly written and entertaining. There are unexpected twists and interesting outcomes.

I like the similarities that Bex has with Preston's mother, like the fact that they both play(ed) college basketball. I like that Bex challenges Preston. She treats him like she would anyone else. I like her tomboy personality, and that she speaks her mind.

I love that the characters in the Face-Off Legacy series have grown up together. They have a unique bond that makes them a family. They are all wealthy and have different obstacles to face than the normal person, primarily the pressure of living up to their parents' success. This is especially true for Preston being the team captain.

**PUCKING PARKER** was an amazing start to the spin-off series. The book was hard to put down and had

relevant issues. I look forward to following this series. I voluntarily reviewed an advance reader copy of this book.

Wow! I can't even put this book into words! It was an amazing read and let me tell you super HOT! It had all the feels. The only thing I wish was that in the end Bex sucked it up and let her Secret be known to everyone besides just Preston. I feel it would of helped him out more. Also I'm confused why he was worried about getting into NHL of his family pretty much ran the team. But other than that this book was awesome!

Peter Parker Preston, a college hockey hot shot and playboy, is focused on hockey and an NHL draft, not finding romance. Bex Barker is the hockey coach's daughter and her dad he had strict rules about dating. When Bex and Parker unexpectedly collide (literally) in the locker room, the attraction is off the charts. Bex is a stickler for the rules and Parker doesn't want to take a chance on his hockey career, but will that be enough to keep them apart.

A cute college aged romance full of hot athletes, sexual tension, and a touch of drama.

Damn this book melted my heart, incinerated my knick-knacks, blew my eyebrows off my face and left my mouth unhinged. Preston was like the most delicious drop of water when your parched and burning up and Bex was a force to be reckoned with. All the other character's gelled together to make this a sensational story. I was so heartbroken by what Kellan did to Bex and I was cheering so hard when Preston gave him a beat down.

Omg I absolutely love Pucking Parker. I love Alex Parker and now it's his son Preston turn. Preston is a ladies man just like his dad, but when he finds the one, their is no other. Bex has rules, well her dad does, never date hockey players but once Preston & Bex sees each other it's game over. Once I started reading

Preston & Bex's story I didn't want to stop. I'm dying for more in this series especially what is happening with the twins. Definitely a must read if you love sexy hockey players that can be sweet & Dirty.

4 Stars!

Jillian Quinn is back with a brand new book and brand new series that is guaranteed to have you laughing, smiling, swooning, and falling head over heels in love by the time the pages stop turning. Pucking Parker is the first in a brand new series and I loved every single moment of it. Sexy. Sweet. Fun. Packed of a whole lot of heart and heat... Quinn wrote a great book with one irresistible hockey player, one crushworthy woman, and a whole cast that hooked me hard.

But first up is Bex and Parker with their complicated but so worth every moment love story. Bex and Parker lit up my kindle from the moment they stepped onto the pages...which was right at the very start. From the awkward, hilarious introduction to the moments that followed for them, they really got under my skin in such a good way and I just couldn't get enough.

And hello! I'm super freaking excited for the next because that little snippet we got at the end... I'm dying here! Is it December yet?! Run to get this standalone before Keeping Kane, book two releases.

I definitely recommend this book.

Two of my favourite types of romance are collage and sport romance; making this story entwining two of my favourite romance themes. Jillian Quinn has managed to do this very well aswell as writing an excellent storyline. I loved the idea of the coach's daughter being off limits to the sport players and the instant connection between the two main characters despite being warned away from each other. Bex and Parker both had an immediate connection to each other and had a lot of chemistry creating a love between them that had me cheering for them from the first time they met. The story had the perfect amount of comedy, drama, angst, romance and steamy moments throughout it.

Bex was the strong female character that did not care what others thought about her. It was obvious how

much she loved and cared for her dad and I absolutely loved the relationship they had with each other. I enjoyed the way that Bex loved basketball and the reaction she has when she is given the opportunity to meet her idol. She was perfect for Parker because she understood him in a way that not many others did.

Parker, I loved loved reading about because he was a strong loving and hot male characters that was absolutely perfect for Bex. He was so caring and loving to her that it was obvious from the first meeting between hem that he cared for her in a way he has not cared about any other female before. I loved the relationship he had with his family and the relationship he had with his family friends.

Pucking Parker is a spin off to the Face-Off series which centres around the children of the original series characters. This story revolves around Peter Preston Parker and Bexley and is the first book in a new series.

Fans of the Face-Off series will love this series as you get to see what the characters form the series and their children are up to now. It had really enjoyable characters throughout the story and it finished in a way that leave you wanting more of the characters. I cannot wait to read the next book in the series.

What a hot sports romance?!? Do you like hockey? Do you like hunks? Then I have the perfect book for you. Pucking Parker is such a wonderful sports romance. This book has everything I love. There is a bit of romance, heat, and a lot of humor. I really liked that this book had some serious notes but could also make me laugh.

The plot of this book was so interesting. I really liked the forbidden fruit feel to this story. What would you do if you suddenly found yourself attracted to the one person who is off limits? Each character had to struggle with this as they were forbidden to see each other. It added this taboo feel to the story that kept it interesting.

I really liked Bex. She has no problem being who she is. She is feisty and strong and she makes no apologies for it. She is a great female character and I applaud the author for writing a female character I can be proud of. Then you have Preston. He has such a commanding presence to him. I really liked how he had alpha tendencies but was also kind and caring. I liked his character.

I really liked the heat in this book. The immediate attraction between characters sparked a flame. Each character attempting to deny their feelings? That just added gasoline to the fire. I really liked reading the banter between these two. That just added to the tension in the story that made the heat perfect.

The writing style of this story was good. The pace of the story is steady. The story is told from a dual point of view. I liked getting to read from each characters. I also really loved the minor characters. They added comic relief. They also added a layer to the story that would have been missing otherwise.

Overall, I really enjoyed this story. I love hockey, so that aspect really spoke to me. Adding the basketball in there was a nice touch. I really liked that Bex was a tomboy who had her own athletic abilities. That is something you don't normally see in books. I will be reading this author again.

Ratings:

Plot: 5/5

Characters: 5/5

Heat: 5/5

Writing Style: 5/5

Overall: 5/5

4 Stars!

I loved a good NA sports romance! Plus, the title makes me giggle every time!

This was really great! Preston is a hot hockey star for his college team. Bex's father coaches Preston's hockey team. There is one rule, stay away from Coach's daughter. You're about to see how well that works! They literally run into each other in the locker room and sparks fly from the get go!

Parker and Bex are great characters. Both are strong, but a little insecure. They can't deny their attraction to each other, but they both know the other is probably not the best choice. Despite that, the chemistry is too much to deny. They break the rules and stop fighting things. It's great! Of course, things happen to throw a wrench in the system, but with some creative machinations, Parker manages to win his girl back!

This hockey romance will sweep you away!

It was pretty good. I got pretty emotional towards the end so it's got an interesting story. It's got the adults from prior books of which their exploits are still being mentioned. I liked the characters!!

**BookAddict says**

Bex's father is the head coach for the men's hockey team at Strickland University and he has three rules: No talking to his players. No hanging out with his players. No dating his players. Part of his reasoning comes from a bad experience Bex had with a hockey player in high school, so she has no problem abiding by those rules, until she meets Preston Parker, the captain of the team. She knows he's a player off the ice as well, but something about him has her wanting to bend the rules, if not break them.

After reading "Parker," the story of Preston's parents, I was interested in reading an early copy of this book. It was great to get reacquainted with familiar characters and learn more about the next generation. In true Quinn style we have an entertaining story with a little humor, a little heat and a lot of heart. I loved these young adult characters and was impressed with their strength and maturity, in spite of the anticipated "pushing away the one you love to the detriment of both so there can be a make-up scene." I was a little

surprised the long-standing issue Bex had wasn't resolved, but it's entirely possible the issue will crop up again in another character's book, because it's only a matter of time before it comes back to haunt her. So I'll be eager to read future books due to this as well as spending more time with the other guys as they embark on their hockey careers. If you like heartfelt, witty, sports romances with steamy chemistry, you'll love Preston and Bex's story.
