## **Craving Redemption** Nicole Jacquelyn

Asa and Callie had nothing in common. He was an Ace, raised in the club and loyal to it above all else. She was a high school student with braces on her teeth and a narrow view of the world.

They should have never crossed paths.

But when Callie decides to defy her parents, and Asa goes on an errand for the club, their lives collide. He saves her, and she mesmerizes him.

They part believing they'll never see each other again.  
Neither could have predicted the chain of events they'd put in motion.

Now the two have to navigate the dark waters of a relationship built on tragedy and need without drowning in guilt for things outside their control.

How do you love someone when the worst decision of your life was the reason you met them?

## TEASER ALERT!:

*"I brought her out of the shower and dried her off while she stood there quietly, but thankfully she moved her arms and legs to help me get her dressed.*

*Taking a bra off was something I'd mastered at sixteen, but getting it on was a hell of a lot harder. I felt like I was squeezing the circulation out of her tits as I wrapped it around her chest, but she didn't make one noise in complaint so I soldiered on and finally got her shit together.*

*It only took about ten minutes from beginning to end, but by the time I was finished I could feel sweat soaking the armpits of my tshirt. Jesus Christ. I was not cut out to be nursemaid to some comatose girl—but I couldn't stop myself. I needed to take care of her.*

*She was mine—and goddamn if I could change that.*

*I needed to get my fucking head checked."*

*"So... Like I said before, Callie is 16 and Grease is 20. I've heard some concerns about the age difference, and I'm going to apologize in advance if that is a trigger for any of my readers. But... That's them. The story is pretty much writing itself at this point and I'm just along for the ride.*

*Their dynamic would be different if Callie was older. Their story would be different.*

*So, I'm not going to force a change.*

*Because that's not how I write- and you'd end up with a shit book."* - Nicole Jacquelyn FB

**4 Jailbait Stars**

**\*Spoilers\***

**“Holy fuck, Romeo. You decide to play fuckin’ knight in shining armor, and the bitch you bring home is jailbait.”**

**“I know that, too. But whatever the fuck this is, it’s strong. She’s mine. She’s been mine since she crawled across the floor and grabbed a hold of me at that party. It just is.” -Asa**

What do you get if you add pedobear, Chris Hansen, and the Maury show? Craving Redemption. Naw I'm just Kiddin'. Kinda.

**“Let me finish. I want you like hell on fire—I see you bending over to put shit in cupboards and my dick gets so hard I can’t fuckin’ think straight. But, baby, I don’t wanna fuck you up worse than you’ve already been fucked. Shit is crazy for you right now, and you’re sixteen years old. Sixteen. I’ve known sixteen-year-olds that live with their man and they’re happy as hell with that life—but those girls came from shit lives that they were trying to get away from and they were more grown up than most middle-aged men. That’s not you. Less than two weeks ago you were fuckin’ grounded for staying out past your curfew. You had parents that loved you and coddled you.”-Asa**

I didn't read any reviews before starting Craving Redemption. I loved the first book so much that I didn't even bother. So I didn't know what to expect, but it so wasn't a love story between a 16 year old and a 20 year old. As I was reading I kept thinking this should probably offend or upset me. Yes I should definitely be upset over a story about a 20 year old man dating a 16 year old girl with zits and braces, but I wasn't. As a matter of fact that damn song "Young Girl" by Gary Puckett kept playing over and over in my head the whole time I read the book.

**“I get that you’re scary, and you could probably snap me in half,” I told him seriously, “but she isn’t yours, she is mine. You gave up your rights. She wants you out of this room, and I don’t care how you feel about that. I also don’t care how I have to get you out of here—I may have to knee you in the balls and drag your crying ass into the hallway, but you will leave this room.”-Callie to Slider**

I loved Asa. If I was 16 and he came knocking on my door I would have been all over his bearded biker ass. He was such a hero, stepping up saving Callie, protecting her, and providing for her. Asa was sexy as hell. I melted at how respectful he was to Callie's Grams. I loved Callie. She was so brave. I love that she felt so real. Her fear, her anger at the club, the way she clung to Asa, are ways I think anyone would act after living through what she had. I loved that she was sassy, sarcastic, and had the backbone to tell big scary bikers just what she thought. I could relate to her and her choices.

**“I love you,” he murmured into my mouth. “Best thing I ever did—taking you outta that house. I’d change a lotta shit that came after if I could, but even if I did, we still woulda ended up right here where we are now.” He kissed me hard as he laid me down on the bed. “You’re so beautiful,” he whispered as he softly rubbed his thumb back and forth below my belly button. “What’d I do to deserve you?” “You saved me,” I whispered back.-Asa and Callie**

Oops damn song get outta my mind..... N E Ways I really enjoyed getting to see how they met and fell in love. I thought Callie and Asa were sexy as hell together. Their relationship for the most part was very sweet, and a little taboo. I adored Gram, and I really liked Cody. I have to say I really don't care for the President of the MC, Slider. I would love to punch him in the balls. Although I loved the walk down memory lane of Callie and Asa's love I was shocked that almost the whole book is said walk and not in the present. I felt the ending was super rushed. I felt cheated that I didn't get to see more of their present day story. Still a very good story just disappointed with the ending which is why I gave it a 4 star instead of a 5. Below I leave a few of my favorite quotes.

**“Westerns?” “Really? That’s all you got?” “Are you sixty-five?” “Shut the fuck up.” “Do we need to get one of those denture containers for you to put your teeth in at night?” “Callie...” “I think we need to go a few aisles back for something like that...wait, do we need to call AARP and make sure they’ve got your change of address?” -Callie and Asa**

**“I don’t think you’re hearing what I’m saying to you. You’re the only one who calls me by the name my mother gave me, Callie. The only one. You say it when you’re frustrated, and when you think something’s funny, and when you’re coming all over my hands.” My breath caught at the fire in his eyes, and as he shifted against me, my heart started to race. “You can be pissed as hell at me, call me a dick or an asshole. You can scream at me, throw shit, and stomp around the house.” He nuzzled my neck as he spoke, and my hands lifted involuntarily to his hair to anchor him to me. “But if I hear you call me Grease again, I’m going to spank your ass,” -Asa**

**“Tell me how much you love me.” “More than my bike, less than my dick,” -Callie and Asa**

**4,5 STARS**

**"It's all going to be okay, darlin'. Everything's gonna be just fine now. I've got you, sweet girl. I've got you,"**

Such an amazing story!! So far this is the best book in the series!! I think this book is more than just a MC book. I loved the way the characters match together till the end!! This story will leave you feeling happy, hot, angry, frustrated, excited and shocked. I give it 4,5 stars because I have a problem with the ages if you consider that Callie is 16 and Asa 20 years old. But apart from this everything else were fantastic!! The story starts with Callie partying at the wrong place the wrong time.. Lucky for her Asa will be there and he will help her. This story focuses on the relationship between Asa and Callie and the circumstances following an unfortunate event.

I liked Callie, for her age she is a great heroine!! I don't know what I have done if I were her! The things she is going through..OMG poor Callie.. I'm in love with Asa..This man...He isn't perfect but with his behavior and the fact that he loved Callie so quickly he make me feel more and more in love with him. Their relationship is different from others...as they have to live for a long time distant from each other.I liked so much their relationship which is hot,heartbreaking and so sweet!!!Definitely one of my favorite couples!!

If you haven't read this series yet and you are looking for a new series with MC please check this!!!

Okay, so this one gets a solid four stars from me. I wasn't sure how I was going to feel about it going back into the past and then working its way back up to the present. Sometimes you read books where that is done well and other times not so much.

I really liked Callie overall, but dear Lord that woman made me want to punch her in the face more than once! I was happy to see her get help at one point in the book for the things that she experienced and I'm glad that it was in fact helpful for her. I thought that she and Asa wasted so much time it was really sad to an extent. But as for the story in and of itself. It had it's smoking hot moments, it had it's crazy only in the world of bikers moments, and it had a bunch of stuff in between and through out that made me laugh, shed a tear, or sit up straight and say WTF?!? I'm more than excited to get Caspers story next!!! :D

## **2.5 Disappointing Stars**

Let me start by saying that the first book in this series, *Craving Constellations*, was my favorite book of the year last year. It completely blew me away and left me dying for more. I couldn't wait to get this sequel. There is a sad thing that happens when you love a book so much and then the sequel comes out and you feel like someone has deflated your balloon. It's just a bad feeling and I hate it. If I think that another book in a series will ruin that series for me I normally will procrastinate. Unfortunately I didn't do that with this book and right now I have that deflated sad feeling.

This book was written so weird for me. It starts out with Callie coming to the Aces clubhouse to find her brother Cody after she receives word that he is injured but then runs into Aca instead. There is definitely some weird vibe going on between Callie and Aca at this point in the book but then the book starts to flash back. The entire book is past tense except the very beginning and the very end, like literally is the last couple of pages, yes the END! During these flashbacks (I'm not even sure that's what you call it since it's the entire book aside from the first and last chapter) we find out how Callie and Aca met, how they found love, and how they lost that love. This part of the book seemed extremely dragged out and long winded. There were some details that I could have lived without such as how small Callie's bras were getting. The whole bra thing got on my last nerve. Who CARES???? Mention it once and drop it. We all get that Callie was too fucking stupid to go out and buy a new bra!

Without giving too much of the story away, the ending was just totally abrupt. I really didn't think the story was going to be resolved at all. Since the characters had spent years, upon years, apart I expected a little happiness at the end. Like maybe a chapter or two but no we got a couple of pages. IF THAT! Can you tell that I'm totally pissed? If not read on.....

As for other characters and the upcoming installment of this series I regretfully have concluded that I just don't care.....like at all. I assume the next story is about Cody and Farrah but guess what.....I don't care.

Farrah is Callie's best friend and she's a totally fuck up. We saw so much of her past that I just don't see her story being able to tell me much more that I want to know. I know she will end up with (view spoiler) and for what it's worth.....I don't really care. I didn't care for him either. He was the most boring creature in this entire story. I couldn't find the love for him anywhere. Basically he came, he went, he called, he ended up with Asa doing something totally out of character. From college to crime I guess.....smh. I have to give this author credit, that wasn't predictable at all.

Ok so I'm being a crab-ass about this review. I just feel like this book sucked the life right out of me. I hate giving bad reviews. I know these people pour their heart and soul out into these books for us and I guess the first one was so fantastic that this story had no where to go but down. It just doesn't compare to the first book. I can't say that I won't read the next book in this series ever but I will say at this point if it came out today I wouldn't be able to get my clicky finger excited enough to do the deed. Maybe I will wait until the reviews are in on the new installment before buying.

Personally, I enjoyed this one much more than the first book. Asa 'Grease' and Callie's story started out really strong. A sheltered 16 year old with braces and loving parents, and a 20 year old biker. They have nothing in common, but one night, they cross paths and both of their lives are forever changed.

The first half of this book was perfect, a unique love story formed from chaos, I was deeply invested in these two. And while the second half was good, it lagged at bit at times, and things wrapped up a little to nicely at the end. With the majority of this book taking place in the past, I would have loved to have more of this couple in the present. But, overall this was a great read for me.

*"Tell me how much you love me."*  
*"More than my bike. Less than my dick."*

**So unexpected, so many feeeeeeeels, and I freaking loved it!**

### 4.5 stars

I loved this book! Absolutely loved it! It's technically a biker book, but primarily it's a love story and Callie and Asa's journey is an intensely emotional ride. The love story is beautiful, but it's hard, and it's not all happy times, but I was riveted the whole way through.

The book begins by replaying the final dramatic scene of *Craving Constellations* when a mysterious girl (Callie) barges into the MC compound waving a gun around and screaming. Biker, Grease, jumps in to soothe her, and the connection between them even during this short and intense interaction, absolutely sizzles. The story then shifts back five years to give us the heart-clutching story that led to those dramatic events.

Callie is a rebellious 16 year old, out at a party when she runs into trouble. She is rescued by smokin' hot biker, Grease, who looks after her and sees her safely home – where we get to see him as sweet, protective and respectful Asa. But that one brief interaction brings Callie into Asa's world and the consequences are life-shattering. When Asa once again comes to her rescue, the bond that they started to form is solidified into something incredibly deep.

*"You're okay, sweetheart. You're okay. Just hold on, I'm not gonna let anything happen to you."*

Feeling strangely territorial over Callie, Asa realises the danger that she is in, so he steps up and claims her, vowing to look after and protect her. He whisks her away, setting her up somewhere safe and laying the foundations for their life together.

*She was mine – and goddamn if I could change that.*

This is not a conventional relationship. I know that a lot of readers had an issue with Callie's age, and to be honest, I initially did find it a bit skeezy. When they get together, Asa is 20 and Callie is a 16 year old high school girl with braces on her teeth. She is still 16 when he claims her as his old lady, and most of the action takes place when she is 16 - 18. She is not innocent, although she is naïve in some ways, but the events of the story force her to grow up really fast, and accepting that this is a different world with different rules helped me to accept it. I thought that the issue of her age was handled well - the feelings between them are obviously there from the beginning but they don't rush into a full-on physical relationship. There is kissing and touching, and even though Callie isn't a virgin, Asa holds back and allows things to build naturally (although be aware that she is only 17 and technically under the age of consent for California (where she is living) when the sex starts - so if that sort of thing bothers you, you'll probably have issues with this book). But it's very clear that they care deeply for each other, and I could accept all that was happening between them.

I thought it was an amazing love story! Sure, they both make mistakes, but they are young, it's the first

relationship for both of them, and they are living in dangerous world under extreme circumstances so I wasn't expecting it all to be sweet and fluffy. But through all that they face, they never deny their feelings. Their love for each other is strong, and they find their own way to be together and create something special.

*"Tell me you love me," he growled ... "Tell me you're mine."*

*"I love you," I sobbed back, wrapping my fists in his hair.*

*His hips paused, leaving him only halfway inside me before he ordered again, "Tell me you're mine."*

*"I'm yours. I'm yours!" I pleaded, sliding one hand to his shoulder and digging my nails into his back until he slammed back inside me.*

*"That's right, baby. You're mine and I'm yours."*

The story is told from dual POV, but it's mostly from Callie's perspective. We see all that she is going through, and then get to see Asa's response to that, as well as how he is dealing with things between them. And the way that he is there for his girl is absolutely beautiful! Of course he is fiercely protective of her – he has been from the start – and that continues throughout the story as Callie is faced with drama after drama.

The timeline jumps a little bit, with a strong focus on the early years of their relationship, and some of the later years are skimmed, but I actually really like the flow of the story and the way it was put together. The whole time I was reading, I kept thinking back to that prologue and was waiting for the story to catch up to those events. I figured it would come about halfway through as we'd see what led them to that point, and then spend time seeing them resolve everything afterwards, but no! That moment is really the finish to it all. The real story is everything that happens before that. I was surprised but I think it worked really well. My heart hurt wondering how they were going to get to that dramatic point, but I loved the way it all unfolded! There is nothing stupid that tears them apart, they just keep getting hit again and again, and they deal with it the best that they can until circumstances outside of their control drive them apart and things become an absolute clusterfuck of heart-clenching devastation. OMG, it broke my heart! I cried more than once watching it all happen, but there are also some beautifully sweet moments in there and their continued love for each other, even through all of the drama, is absolutely beautiful.

*"I love you," he murmured into my mouth. "Best thing I ever did – taking you outta that house. I'd change a lotta shit that came after if I could, but even if I did, we still woulda ended up right here where we are now."*

*He kissed me hard as he laid me down on the bed.*

*"You're so beautiful," he whispered ... "What'd I do to deserve you?"*

*"You saved me," I whispered back.*

The thing that annoyed me the most about the story was... (view spoiler). But I do have to say that the excessive drama and the stuff that they have to deal with adds to the story, and the way that they deal with all of the fallout is what makes this book so amazing!

Like with the first book, the MC doesn't form a huge part of the story. It's the world that they live in, and definitely influences the lifestyle that they have, and the characters that come into their lives, but the actual goings on of the club is very minor, with most of the focus being on the relationship between Asa and Callie. So technically, you could read this one as a standalone as there isn't a huge amount of tie in with *Craving Constellations*, but I wouldn't recommend it just because that such a great book.

There is also a fantastic introduction to the next book. I loved the way that Casper is introduced into the story. It was such a surprise, but really clever. The sparks are already flying, and I think it's going to be another messy one, but I'm looking forward to it.

I loved this book! It sucked me in right from the very first page, and I was captivated the whole way through. I laughed, I cried, and I was fanning myself at all of the hotness. It wasn't always an easy read, with Callie and Asa having a bumpy road to travel with lots of shocks along the way, but I thought the story was beautifully told. I wasn't ready for the story to end when it did, and I would have liked to see some more of them after that ending, but I figure (and hope) that with the characters of the next book so closely tied in with them, they'll form a big part of that story.

Fantastic – 4.5 stars.

### **4.5 “You belong with me” Stars**

I'm so glad I gave book two of this series a shot because this story was so much better than the first book of this series. Callie and Grease's story starts when Grease walks into a party to find a beautiful young girl drugged who is sporting purple braces (I loved the braces). He is propelled to not only save her but to claim her as his own.

*“I lost everything in one single night and I didn't understand it.”*

*“Part of me had wanted to stay with her and take care of her, and the other part of me wanted to just get back to where my fucking world made sense.”*

Callie has to grow up quickly in this book when she survives something horrific and Grease steps up to claim her and take care of her. The two have such an epic love story.

Their story was not only believable but memorable. Even amongst Callie's horror, her youth and the distance between Oregon and California. I loved their scenes together, I love Gram and I just loved Grease's pov.

*“Tell me how much you love me.”*

*“More than my bike, less than my dick,” he answered with a straight face.”*

All Grease has ever wanted is for Callie to come to Oregon but high school, jobs, messed up best friends and jail time all keep these two in a long distance relationship. I just loved Grease's pov especially his jail time scenes. I thought the author did a stellar job on his feelings through this incredibly hard situation.

*“I was missing goddamn everything. I wasn't fucking ready. I just needed a little more time. Just a few more goddamn minutes. Holy fuck. It couldn't be over already.”*

Overall, the author developed a story that spans a good number of years while taking Callie from a teen girl to a woman. The writing and the connection that the author delivered totally worked for me and I was invested in this couple the entire read. My only beef is that the ending was way too abrupt and just not enough for the journey.

*"You're my family," he mumbled, kissing me and then rubbing his lips down my neck. "You're everything."*

## **Guilty Pleasures Book Reviews says**

### **2.5 Stars**

I've been impatiently waiting to get my hands on Craving Redemption since I finished Craving Constellations, Dragon and Brenna's book (LOVED Craving Constellations). This is a weird review for me because I couldn't put Craving Redemption down, but there were parts I had to skim through because I was just uncomfortable reading them, as well as the last half of the book seemed rushed.

Callie is a typical sixteen year old girl, sneaking out and pushing boundaries that her parents set. Twenty year old Asa is a member of the Aces MC. One night he walks into a party Callie has snuck out to go to and ends up saving Callie from what could have been a really bad situation, little did they both know the events of that night would tragically change Cailie's life.

Asa immediately feels protective over Callie but knows he has to leave her, he is too old and experienced for her. Events occur that bring Asa immediately back into Callie's life and leads them on a roller coaster ride of

heartbreak, emotional ups/downs, tragedies and finally happiness.

Craving Redemption starts where Craving Constellations ends, then the flashback immediately begin, throughout the book Asa and Callie went through incredibly hard times, times that would break most people. The story was really good, Asa had good intentions and Callie was a strong young lady. I loved seeing Dragon, Poet and the crew. BUT for me, after all the drama Callie and Asa suffered throughout the years the ending was rushed. I also felt there were a lot of holes where the story just jumped from time frame to time frame towards the middle to end of the book.

What bothered me the most was first half of the book was mostly about Callie at sixteen and seventeen years old and her relationship with Asa. Honestly, I felt icked out reading about a sixteen/seventeen year old's full out sex life with an adult, it kinda made me feel like a perv, so I skimmed those parts. . I mean HONESTLY I NEVER EVER again want to read about a sixteen year old girl with pimples and braces giving a blow job to a twenty year old man, yes I skimmed it but the mental damage has been done, what was read cannot be un-read. I was very disappointed because it took until 95% in the book before we get to present day and their story pretty much ends at about 96%, the rest of the book is setting up book three. I would've like more of present time with Asa and Callie. That being said I did read it all in one sitting hoping that they jumped back to present day sooner than they did. I won't re read this one but I will read Craving Constellations over and over again. I hope the next book is more present day based, I'm just not a huge fan of reading a book where a large part of the story has YA age characters. If you don't mind the sixteen/seventeen year old angle, than I think you will enjoy this book a lot.

This book was awesome. I really enjoyed Asa and Callie's story. I know some people had a problem with Callie's age at the onset of their relationship, but it didn't phase me at all. Right or wrong, I thought it was hot. I mean let's be real, I knew a lot of 16 year olds hooking up with way older guys when I was 16. It's just real life.

This was actually a 5 star read for me until about 90%. Then it just fell apart. You know when a book has major prologue foreshadowing and then the story builds and builds and builds toward how we got to that prologue, ending in a blazing explosion of awesomeness?

Well this book built and built and built and it was awesome...until the explosion of awesomeness I was expected was totally ripped away and replaced by a half assed deflating balloon.

Color me sad.

Anyway, up until that point I was enthralled so 4.5 Stars. Can't wait for the next one.

## Alpha Possessive Heroes says

### 3.5 DAMNATION STARS!

**Craving Redemption** is one of the books that I've been anticipating this year.. so that being said, this pains me but I'm going to post a mini rant and give a low rating for this book.

I'm not put off with their age difference, In my opinion it's pretty damn hot that they met when Callie was still at a young age with braces and all. *lol!*

I even fell in love with Grease aka Asa. He's alpha, loveable, fuckable, lickable.. *typical MC hero that makes you want to dry hump the legs.*

**What else do I like?.... sadly, that's all that worked for me. Now I'm off to rant.**

Basically 90% of the book was mostly their history! **WHAT.THE.FUCK?!**

So the prologue was gripping, it started out pretty intense. It's the present day and we see Callie pissed about her brother getting shot and she blamed it all in Asa. Then Chapter 1 up to fuckin 75 (*or something!*) was all about their past journey, retelling how they met, fell in love, how they dealt with the issues.. *yada yada!*

There were a lot of things going on that wasn't even gripping or angsty. MC problems, stupid best friend issues, long distance relationship issues and add up a whining heroine..

Cassie and Grease together? I felt the connection but they were mostly apart. I didn't like the whole long distance thing going on, specially when the reason was nonsense! I loved Grease but he spent mostly away from Callie, only visiting once every six weeks and I'm supposed to believe that he was faithful to her? And to point out that while they were apart, they hardly talk on the phone too.. so yeah. This pissed me off.

I could go on and on but my point is- I felt like there were a lot of unnecessary issues that the author focused on and topic that she over looked.

After reading the prologue and the long ass build up story, I was ready for some intense reunion! Around 90% of the book I started to panic as there were only few pages left! I was like "*omg! It's going to be a cliffy!*" but then voila! The author did the easy way out of "*I'm sorry. I love you. The End...*" Once again. **WHAT.THE.FUCK?!**

**Did the author ran out of ink or paper? just sayin'..**

I get that the author wanted a solid background with Grease and Callie but she pretty much focused on it.

**Overall** Craving Redemption has so much potential. I enjoyed Cassie and Grease love story better than Brenna and Dragon but I'm just completely baffled on how the author executed the whole damn book. A cliffhanger would have been much better than giving your readers an ass ending!

Will I read the next book? Maybe.

Next story is going to be Farrah and Casper and to be honest, I don't give an F about them. Farrah ticked me off in this book and Casper was.. not so memorable. *sigh*.. I don't know how the author will work these two together. Oh well.

Sorry if I came off pretty hard in this review. I'm just heartbroken and pissed. This is just my own opinion and well.. I basically do not have any filter- I type in what I feel so please do not get offended by this.

I'm glad that a lot of people liked this book though.

So yeah.

**3.5 Stars** and this is mainly because of Grease.
