I will definitely be looking for more books by this author, and can see myself re-reading this book in the future

This book is narrated by the same character all of the way through, which I feel is becoming more rare as time goes by and authors choose to use multiple voices to narrate.

I found myself settling into this book with ease and the time passed quickly while reading it, I didn't want to put it down as I was enjoying it but it didn't have a grip on me that meant I couldn't put it down. I really liked the characters and felt they were described well, allowing me to picture them and feel like I knew them.

The one problem I had with this book, was that I found the business to be rather unbelievable. I do not see how it would be possible to offer all they do, have a big enough premises and gain a loan to pay for it all. It is fictional though so I tried to ignore this fact, I do believe that it should have been more realistic though. This is the reason I have scored the book 4 out of 5 stars rather than the full 5

You don't have to be a mum to love this book, but any mums out there will wish they could step into the story and go for a coffee!

This is the first book I have read by Mink Elliott but this book does actually follow on from her previous book The P\*\*\*ed off Parents Club, having not realised this when I first brought the book I was a little bit hesitant about reading it in case I felt like I didn't follow the flow of the book by not already being introduced to the characters but I didn't find this at all, there were a few mentions of The P\*\*\*ed off Parents Club but I still found I was on track with the storyline.

The main character in this book is Roxy who is our typical mum struggling to try and balance out the different aspects of her life, work, money and weight being her main struggles alongside trying to raise daughter Joey and be the loving wife to Jack. I do not have kids but even I found I could relate to her character constantly trying to struggle through the worries of life so Roxy was an easy character to connect to.

The storyline was very easy in the typical chick lit style which made it a great beach read. The book gets off to a great start so we are absorbed straight into the story. There are a great mix of characters in this book some you will love, others you will have your guard up from the moment you meet them. There was some great humour in this book most of which came from little Joey who I loved.

Cute in parts but largely pretty dire. I've read lots of mum-lit in my time so it's not literary snobbism talking when I say that this was really pretty stupid and unrealistic. Examples- manager of her business absconds after embezzling thousands of dollars and she "laughs at how ridiculous a human being" he is. Really?! Waitress is given "twenty four carat" diamond ring by her cafe manager boyfriend? Really?! That'd usually only set you back about \$5 million. Just dumb.

Rating: 4/5

I read Mink Elliott's debut novel *The Pissed Off Parents Club* a couple of years ago when it came out, and really enjoyed it. As a mum, I could relate to a lot of what the main character Roxy was going through as a new mother, and found it to be quite a funny and good read. Mink is back this year with a follow-up to that book, joining the character of Roxy and her husband Jack again in Australia this time, with a new addition on the way too. I was looking forward to finding out what these characters have been up to, and I have to confess that the cover is really good, and I love the bright yellow because it's really fun and bright, much like the story inside!

Roxy is now living in Australia with her husband Jack, and now three year old daughter Joey, and struggling to adjust to life in the sunshine, without her friends and family around her to help out. She's looking for a new job as they need money, and is shocked to find out she's expecting another baby, something she wasn't entirely sure she wanted. She then starts up a mums cafe with best friend Shoshanna, and is determined to make a success of it. I really liked Roxy from the beginning, she was just as I remembered her from the previous book and a bit of a disorganised mum, something I'm sure a lot of mum's reading it will be able to relate to! Roxy struggled to juggle her job, being a mum to Joey and being a good wife to Jack, as well as being herself and in that respect, I think Elliott has done a great job in creating a realistic and believable character in Roxy.

The setting of Australia was great, and it made a nice change from the hundreds of chick lit books I seem to read that are set in London at the moment as well! It was nice to be all cosy under my blanket reading about the beautiful sunshine of Australia, and the funny escapades Roxy and co manage to get themselves into. Her cafe was a great idea, yes it was a bit idealistic how quickly and easily Roxy and Shoshanna managed to set it up and get it running, whereas in real life it'd take ten time longer and be much more a struggle to become

a success, but I guess that's the escapist fun of reading it in books! The cafe was a really good thing and made for a great storyline within the book. I have to say I really liked Roxy's best friend Shoshanna as well, and although I totally didn't agree with the actions that she had in the book, I felt it was realistically portrayed and well written.

I have to comment on the way Roxy and Jack handled their relationship, and I think a lot of parents of young children will be able to relate to the troubles that they went through. I was really willing them on and hoped that they'd get the happy ending that they both deserved. The book has a lot of light-hearted humour, especially relating to their precocious and adorable daughter Joey, who has some great one-liners in the book, and there is a lot to make the reader smile. Yes, some things happen too easily, but the obstacles Roxy comes up against and the way she works through them is great and I really loved her as a leading lady. I think the ending of the book was open enough to bring back these characters for a third time, so we'll just have to wait and see for now. I definitely recommend Just Another Manic Mum-Day to anyone who likes a light-hearted and happy read, and especially to mum's who want something to relate to as they're reading! It's a great book and I really enjoyed reading it.

Having thoroughly enjoyed Elliott's first book I was really looking forward to this one and loved it too! The setting in Sydney was something new and the book had some really funny moments. A nice positive pick me up that has me thinking of emigrating again!

Was fun reading at first remind me of when I had my kids. However somehow everything was too smooth sailing, no excitement to the story. Though mothers to be can learn some things from it.

I was lucky enough to win this paperback book from a giveaway run by @Btweenthesheets on Twitter.

I found out that this is a follow-up to the author's first book The Pi\*\*ed-Off Parents Club and I was a bit worried that I would struggle to keep up with it seeing as I hadn't read the other book. It turned out that I worried for no reason because this worked well as a standalone book with a few references to what had happened before but nothing that didn't make any sense.

The main thing that I liked about this book was how easily I could relate to it with regards to the parenting side of it all. I found myself nodding my head in agreement at some of the stresses that Roxy and the other parents went through.

Roxy seemed very unsure about the move to Australia but was willing to give it a good go, her daughter Joey was such a handful and I enjoyed their interactions because it reminded me of my own daughter!

I liked the way this book had been written – it was funny and natural, almost like chatting with an old friend. I particularly liked the idea for the cafe and enjoyed following their progress as everything came together. Most of the characters were likeable with the only exception being Isaac, I disliked him from the very start.

The book ended with a great message for parents and really made me think about my life with children, it's very easy to take our lives for granted so it's always good to have a moment to appreciate what we have.

This was a lovely read that made me laugh but also made me think!

A joyful romp through the pitfalls of motherhood, relationships and work, mostly in Australia. I did wonder about the handling of the daughter, though! But perhaps that's the Aussie way? Or maybe I'm just old fashioned ...

Nice light-hearted sequel to "The Pissed Off Parents Club" but although it had some humourous moments i enjoyed reading I didn't relate to this as much as first book. Still good and a nice quick easy read for those that have read book 1 but preferred the first instalment more.

This book is absolutely ridiculous. But it does make opening a successful family business seem crazy easy, which is inspiring.

An entertaining and untaxing read, grab your cappuccino and relax..this is the story of a mum who has the brilliant idea to set up a cafe where mums and their children can go and be themselves, the sort of place we could all use once in a while, where you can find good company and good coffee while not worrying that the children are disturbing anyone. All while she is pregnant, in a foreign country, and renegotiating her relationship with her husband..
