### **Sis\_p5ejoseph says**

About everything you need to know as a child.

---

### **Gavin says**

I loved that book !!!!!!!!!!!!!!!!!!!!!!! :);)

---

### **Maggie says**

It was interesting to learn about the different animals, the future, what the government's planning, cultures, weather, fun facts, and other things like that. It was fun to look at the pictures and read this book.

---

### **Emu says**

Funny information, kids would love this book!

---

### **Tristan says**

Fantastic book to keep in the car and read in small amounts of time and have handy when Mom needs to do errands. Took several months and great way to stimulate the brain in summer months.

National geographic kids almanac.(2012). Monterey, CA: National Geographic.

Citation created by: Susan Gasaway

Call number: 030

Description: In the lively style of National Geographic Kids magazine, this colorful page-turner excites young people about their world and everything in it. The National Geographic Kids 2012 Almanac is packed with fun-to-browse features, useful reference material, homework help developed by educators, and the kind of quirky facts that kids adore.

Content/scope: This almanac includes articles, games, photos, facts, and brainteasers on topics of high interest to elementary students.

Accuracy/authority: This is the 2012 copyright version of the almanac. It includes 40% new content. This is a New York Times best-seller.

Relation to similar works: Scholastic 2012 Almanac for Kids

Timeline/permanence: Reference contains up-to-date information (copyright 2012)

Cost: \$19.95

Rationale for Selection: This is high-interest reading material. Currently, the school has almanacs w/ a copyright of 2005. Current information is needed.

Professional Review: School Library Journal, 03628930, October 2011, Vol. 57, Issue 10

### **Anessa says**

THIS BOOK HAS LOTS OF INFO FOR KIDS.

---

### **Clarissa says**

National Geographic Kids Almanac 2010 is a great book put together by the talented staff of National Geographic Magazine. I love books like this for kids. I remember reading books like this over the summer. They are books that you can read over and over and never read the same thing twice; there's so much information packed in there. The audience I think this book would be good for are children aged 7-12. This book could appeal to an older or younger audience depending on interest and reading ability. This book could especially appeal to boys or reluctant readers, because it delivers the information in a quick non-traditional way. I would like to have this book in my class library. I think it's important to have books like this for those non-traditional readers.

### **Kate says**

I actually READ this

---

### **Brian Wong says**

Cool facts

---

### **Denoi Black says**

National Geographic Kids magazine is an amazing book that covers a lot of interesting facts about many different topics from the march of the penguins to the fascinating powers of the brain. Through reading this book I like how the book focuses on specific aspects of life such as lifestyle, fashion, business, travel and religion. I also like how the book appeals to a wide audience and includes other topics such as articles about diet, exercise, fitness, I would recommend this book to people who not only like to read but look at pictures because it is very visually pleasing.

### **Brittany Herrera says**

Title: National Geographic kids almanac, 2010 ([2010 ed.]). (2009). Washington, D.C.: National Geographic.

Name: Brittany Herrera

Type of Reference: Almanac

Call Number: 031.02

Description: This almanac grabs the attention of students in grades 3-5 with its detailed pictures. This book is divided into 10 sections. Kids are interested in such subjects as animals, history, nature, and cultures.

Review:

National Geographic has built a reputation for providing breathtaking images and this book doesn't disappoint, providing high-quality, full-color photographs or maps on every page, accompanying information about animals, nature, history, and cultures. The almanac is divided into 10 major sections with catchy titles such as "Your World 2012," "Awesome Adventures," and "Geography Rocks." Homework-help sections offer assistance with common student tasks--writing letters, conducting research, and giving speeches, for example. This edition also includes mobile media features. Readers with access to a smartphone can download a free QR (Quick Response) code reader at a website listed inside the book's cover and then scan the 10 codes sprinkled throughout the text to access videos or view further information or related projects. The same offerings, as well as frequently updated blogs, pictures, trivia, and articles, labeled as "Cool Clicks" in the book, are available online. Students can learn so much from this almanac and its online features. It is also a logical point for starting projects or for teachers to use when introducing concepts as varied as Pompeii, crystal caves, natural disasters, biomes, mythology, dinosaurs, jaguars, and energy. Ideal for reference and circulating collections.

### **Christopher says**

I've gotten an almanac every year since 2008, and this one is my second favorite. It has awesome facts, maps, diagrams, illustrations and photos.

---

### **Colleen says**

I think this book has a lot of facts.
