This is actually one of the first manga where I remember really loving the arc. As someone who was a big fan of Urd throughout the series, the final chapters of this manga harken back to when Urd was revealed as being half demon and half goddess. Mara, who is mentioned to have once been good friends with Urd, decides that she's going to use a device to split Urd's two heritages up, making one evil demon Urd and one kind goddess Urd.

I remember adoring Urd's belt made of keys when I read them as a kid. However, since having tried to make one, I have realized that that is a lot of useless keys and would make for an extremely heavy and unhelpful belt.

That book was good. too bad the boy had to be turned in to a girl....lol!

This volume of Oh My Goddess is a great one. The art gets better and better. Also, here, you will enjoy a whole bunch of stories with an old flame for Urd, an extreme makeover for Keiichi, fun bike races, unexpected exorcisms and sexy softball games. You never get bored with three goddesses living under the same roof. Highly recommended.

Well, this was an interesting experience. I read the English and Japanese versions of this manga side by side.

There are a few things that don't match up, but for the most part, the changes make sense in context.

Gotta love Urd. Just saying.

Timothy says

Another classic Oh My Goddess volume, where we:

- learn more about Keichi's past
- learn more about Urd's and Mara's past
- and the Demoness Urd storyarc

Dony Grayman says

Edición española, tomo 10.

Sarah Crawford says

The first thing is a series of color pages showing all three goddesses separately. All three drawings are very well done.

Let's Have Fun: Megumi complains to Keiichi about a boy's baseball team kicking the girl's team off the field. Urd suggests the two teams play a game to determine which team will take over the other.

Belldandy is up first and walks. Skuld gets an out. The game goes on and the boy's team takes a major lead. Urd then changes into a uniform that reveals a lot of cleavage, and the boy's team gets so distracted they fall behind.

There's an Adventures of the Mini-goddesses segment next.

Remember the Sad Times: Megumi brings over a puppy that she wants the group to keep. It likes everyone except Keiichi, who it continually bikes. The dog saves them from being run over. Megumi finds its actual owner, and Keiichi finds out why the dog is always gnawing on him.

Adventures of the Mini-goddesses next.

Karaoke Friend: Keiichi wins a trip to a hot springs, but he never actually entered any contest. It turns out Mara is also there, but they all agree to a temporary truce. Mara and Urd get into various competitions; it's revealed that Urd is half-demon and half-goddess. The whole stay is a trick, though.

Adventures of the Mini-goddesses next.

Urd Turns 100% Evil. While on a walk Mara attacks Urd. Mara has cloned a copy of Urd and shows it to her in the lab. Mara plans to take the demon-half from Urd and put it into the clone. The clone Urd is now the Lord of Terror, and she kidnaps Skuld.

Skuld Strikes Back: Clone Urd kisses Keiichi and Belldandy sees it. Meanwhile the real Urd has escaped and freed Skuld.

More Adventures of the Mini-goddesses.

Well, this was an interesting experience. I read the English and Japanese versions of this manga side by side. I'm glad I did that, though. Between teeny tet that made the kanji hard to understand and kanji I just didn't

recognize because I finished my minor and went no further with classes.

Gotta love Urd. Just saying.
