The Guardians: Earth (Guardians #1) S. Nicole Johnson

Werewolves are gorgeous model like men that turn into majestic wolves. Vampires can control themselves so that they can be with a human without drinking from them. Fairies are cute little winged creatures that fly around and do sweet things. Witches are one with nature and they can do amazing things with their magic. Demons stay in Hell.

Um, No.

Werewolves are mean vicious things that turn every full moon and kill at least one person, and that's on a slow night. Vampires can't control themselves for shit, they eat everything from animal to humans, and nothing can change that. Fairies are mean, chaos creating punks that enjoy other's pain. Witches can be decent, but if they tap into the wrong power they can really ruin your day. Demons walk the earth.

Everything you thought you knew is so wrong, luckily, the world has us to keep it all in check. We are The Guardians.

Keli Barrett says

With the common book being thought provoking, and a million lives in one, I find this book gracefully placed at the top of that list. The Guardians:Earth is funny, suspenseful, intelligent, and entertaining. It's an introduction to a whole new world and idea of supernatural. I'm in love with this book as a hummingbird is in love with nectar.

Sarah says

This is an amazing book! I recommend it to everyone! I was obsessed with this while reading, I love this author's writing, she's amazing and the humor in this story is amazing :D
I really am so happy that it's published, I really love the humor and romance in this story. And the originality, it's so unlike any other werewolf book that I've read.
