When Lilianna takes a trip with her grandmother to beautiful, romantic Maui, she expects the best accommodations and treatment. She has learned to expect preferential treatment to make up for the lack of love in her family. When she meets stern Barnabas, part owner of the resort, she is determined to show him the meaning of fun, especially since he disapproves of her. The two are so different that it will take a miracle for them to admit there are feelings between them.

A fun read! My only comment is it was too short, I would have liked the character's to be developed more, especially their love story. But for \$0.99 I'm not complaining!

A story that shows that no matter what we've done, or where we've been, God can save us and turn our circumstances for our good. I love the background for the story is beautiful Hawaii.

#### **T!. Love, Suite Love**

A very entertaining short novel. I enjoy the Christian based books the best. Looking forward to the next one. Highly recommended author.

I am not a fan of love stories, especially short love stories. But I do love Colleen Coble's writing. I decided to

read this short not too deep book. Everything happened way too fast to be believable but this author always holds my interest.

Another sweet story about how love finds you in the strangest situations sometimes. The story is about Liliana who is a snobbish, rich girl who comes to Hawaii on a 2 month vacation with her grandmother who has been estranged from her since she was 5 due to an argument with her mother. This trip is to bring closeness to her grandmother who is elderly and to spend some time recovering from a sudden breakup of an engagement. Liliana is an all about me type of person.

But events happen and things change and her heart softens and after a health scare with her grandmother she sees that her grandmother faces death with happy anticipation. This leads to discussion of God and a renewing of her heart and acceptance of Jesus Christ. Then things move along and events continue to happen that change her life forever.

It reminds us again that our hearts are empty unless God has residence.

A good short story reading of romance. A little different writing for Colleen, as I am used to reading mysteries.

I enjoy reading books by Colleen Coble. Her characters are down to earth and easy to identify with. In Love, Suite Love we meet Liliana who is a rich, snobby girl who wants to spend time with her grandmother who she hasn't been able to spend time with because of a difficult relationship with her mother and grandmother. She meets Barnabas who is part owner of the hotel area where they are vacationing in Hawaii. They are brought together by a young girl whose mother has abandoned her and working together they are able to help the little girl and themselves.

#### **Short and sweet and a fun read**

It's nice not to have to slog through 300 pages to finally see a couple realize they were meant for one another. A nice quick and satisfying read for sure.

**Short, but heartwarming**

A good story about God's providential care and planning. I enjoyed how Colleen combined a romance with God's redeeming grace
